

Systemer er menneskeskabte – Du kan ændre dem når en bryder sammen

Schiller Instituttets ugentlige webcast m. Helga Zepp-LaRouche d. 1. april 2020

Den 1. april. Da Helga Zepp-LaRouche gav et overblik over den fatale krise som menneskeheden står overfor, påmindede hun seerne om at "Systemer er menneskeskabte", og kan forandres når de bryder sammen.

Hendes mand advarede, så tidligt som i 1973, om at det globale neoliberale system, der kom til da Nixon afsluttede Bretton Woods systemet, med dets politiske holdninger til billig arbejdskraft, billige råmaterialer og den spekulative kasino-økonomi, ville lede til nye globale pandemier. Hvis du sænker levestandarder, vil lavere livsformer tage over, sagde han.

Vores nutidige dobbelte virusangreb, fra coronavirus pandemien til kollapset af finanssystemet bekræfter præcisionen afa LaRouche's advarsler. Det som gør situationen værre, er Vestens moralske arrogance. De som promoverer Grønne "løsninger" i dag, ville dømmе menneskeheden til et folkemord meget værre end Hitlers.

Der er dog en reel modstand mod disse politikker. Hun beskrev den passion, som udvistes af nogle unge mennesker på et ungdomskonferencekald med hende i tirsdags, hvor mere end 70 personer engagerede sig i diskussioner om hvordan man skal gå fra det kollapsede system, til et Nyt Paradigme ved at

mobilisere med agape og de magtfulde ideer som vores bevægelse har.

Samtalerne mellem præsident Trump og hans modparter i Kina og Rusland repræsenterer et træk i den rigtige retning – bidrag med os i at organisere vores internationale konference for at sikre at disse ideer bærer frugt. Ben (Schiller Instituttet) <http://schillerinstitute.nationbuilder.com/>

Schiller Institute New Paradigm Webcast, April 1, 2020 With Helga Zepp-LaRouche

– Systems Are Manmade – – – You Can Change Systems When One Breaks Down –

HARLEY SCHLANGER: Hello, I'm Harley Schlanger from the Schiller Institute. Welcome to our webcast with our founder and President Helga Zepp-LaRouche. It's April 1, 2020. We're clearly in the midst of one of the most profound crises in modern history with the combined effects of a financial system that's blowing out, and as well with the expanding pandemic of coronavirus. It's clear that the old way of thinking no longer works. So, Helga, what's your assessment, especially with the situation in the United States seeming to be heading out of control?

HELGA ZEPP-LAROUICHE: It is an unprecedented crisis, and I think none of us has experienced anything like that in our lifetime. Maybe it was like that in the world wars, but it quickly is developing such a seriousness of the situation. I think that reality dawns on some people belatedly, but it is unavoidable, because the elements are that not only the coronavirus is hitting the United States and Europe, but it will really be extremely bad for the developing sector. We will come to that in a second. But I think first to start with the United States, yesterday's White House coronavirus taskforce meeting, which was given by President Trump and his

health advisors [Dr. Anthony] Fauci and [Dr. Deborah] Birx was really completely sober and sobering. What they basically said is that if everything is being done right now, maybe the number of deaths can be reduced to 100,000 or 240,000 people. But if things go wrong, it may be 1-2 million. Right now, it does not look like this is going to be an easy job. If you look, for example, to situations like New York and New Jersey where you have the hotspots, with the highest infection rates exponentially growing right now, it is quite desperate. Despite Governor Cuomo trying to get sufficient ventilators for the expected outbreak, he said he was only able to get 2500 ventilators in two weeks from now from China, but that he is lacking 15,000. Obviously all the other states in the United States were in a bidding war to get ventilators until FEMA took it over, and is now organizing it centrally. Ventilators are in the critical phase of the coronavirus infection, that which is lifesaving. If there are no ventilators, then these people will just die. It is a very serious situation. For an industrialized country, it has unbelievable social consequences. For example, they let out the prisoners in Rikers Island, a famous prison, and they are now, because they have no other place to go, hanging out in Penn Station where they get food deliveries from the guardian angels. Then, you have 114,000 homeless children in New York alone, who used to get meals in the schools. So, you have all kinds of social consequences which really show the underlying problem of the lack of infrastructure investment, the privatization and dismantling of the health system over the last decades; all of that is now really coming to a point of complete crisis. There are incredible efforts being made to retool some of the industries, there is an air bridge which has been established with many planes from China and other Asian countries – 50 planes all together. There were yesterday, the first Russian airplane coming to the United States delivering medical support. So, there is an incredible mobilization going on, but it is also very clear that this is a pandemic, and you will have mass unemployment. Some people

are saying that the unemployment in the United States may go up to 30%; so this is really an unbelievable crisis.

SCHLANGER: Helga, you talk about the crisis affecting the United States, and how desperate it is. What are we seeing now in countries like Africa? India has got a total lockdown; Indonesia is now in the midst of a developing crisis. This is obviously much more dangerous in the developing sector.

ZEPP-LAROUCHE: If you think that the United States is a very well industrialized country – or, at least it used to be. If you go to Africa or the other developing areas of the world, supposedly developing, not so developing countries, it will be really very bad. You have some countries like South Africa, Kenya, Lagos is completely overwhelmed already, where you don't have that kind of a health system. And you have already infectious diseases; you have HIV, tuberculosis, famine, malnutrition. This is really a powder keg. The head of the World Health Organization [WHO], Dr. Tedros, said that both in the United States and in Africa, the next two weeks will tell how bad the crisis will be. But so far, there is a certain delay factor, because of the poor transport connections of the African continent to the rest of the world, it arrived relatively late. But now it's there, and there is the absolute danger that this will spread. You have half of the world de facto locked down; that's incredible! You have India, a country of 1.3 billion people, in a lockdown. But that obviously is relative, because many day workers – people who just work for a day's pay in big cities like Delhi – are now all fleeing these big cities, because they don't earn any money, and they have absolutely no reserves. So you see these pictures where these poor people get on crowded buses, where they are absolutely not in a position to keep social distance, and then they are trying to rush home to their rural areas. But there is no health system. Despite the fact that Prime Minister Modi had quite some success with the "Clean India" campaign, and the "Modi Care" where he tried to improve the

health care system, naturally this is all not enough. You have places like Jakarta in Indonesia – 10 million people in one city. Half of the people don't have access to clean water. A similar situation is in many developing countries, including Mexico, including Peru. So, we are really looking at an unprecedented world crisis. The danger is that this will overwhelm the health systems; there is not enough production possible. The winter, which is now developing in the Southern Hemisphere, will favor the spread of the virus. You really will probably see many millions of people dying. I think this makes very clear that we need urgently a completely different system. Nothing will be like it was before. I think we have to go into a mass mobilization internationally; which the Schiller Institute is already engaged in, to establish a new world economic order. We have called for that for a very long time, but immediately in this situation it requires a summit of the most important powerful countries: China, Russia, India, the United States. They have to establish a new system. What we need is a completely new system. All the rules of the liberal economy, of the neo-liberal model, the cheap labor markets, the out-sourcing, all of that has to be replaced; and it has to start with the immediate building of a world health system where a decent health system is being built up in every single country. That must be the beginning of an industrial revolution for the whole world. Nothing short of that will do. That means we need a New Bretton Woods system, and a new credit system to finance that. If you agree with that, then help us in this mobilization, because what is at stake are the lives of many millions of people, and maybe yourself.

SCHLANGER: Over the last few days, President Trump had discussions with President Xi Jinping of China and President Putin of Russia. Do you see this as a positive step towards the idea of a summit? These are bilateral discussions, but so far we haven't seen a response to your call on the level needed.

ZEPP-LAROUCHE: I think it's a step in the right direction. The fact that Trump and Xi Jinping re-established contact, that there were discussions between the health ministers, that the United States started to accept this air bridge, that Trump started to discuss with Putin. All of these things are very positive, but they fall short. Also, the proposal by UNCTAD [UN Conference on Trade and Development], which proposed to have \$2.5 trillion for building up the health sector in the developing sector, is a step in the right direction. \$1 trillion is for debt write-off, \$1 trillion is for Special Drawing Rights from the IMF, \$500 billion is for a world health Marshall Plan. That is very positive, but when you count that, it's still proverbial peanuts; because to build up a world health system needs much more than \$500 billion. That's for all the developing countries, not just for one country. It's for the entire 180 or so developing countries; if you divide it, it's just not enough.

SCHLANGER: There's a lot of talk about the time lag in doing the emergency mobilization, getting the equipment, and other things. To me, the real time lag is the almost 45 years since your husband first sounded the warning in 1974 that a shift in the financial system to a neo-liberal new kind of colonial system would lead to this kind of pandemic. People obviously weren't listening. The idea that there was no warning is completely false, isn't it?

ZEPP-LAROUCHE: The first memorandum that the economic financial policies of the IMF and World Bank would lead to pandemics, he issued in 1973. Then in 1974, he initiated a Biological Holocaust Taskforce, which presented their findings of a study at the end of 1974. I was just rereading a report which he also initiated in 1985, which is one of several large studies which absolutely predicted why this would happen. There is a connection between the biological sphere – the biosphere – and the economy. If you lower the living standard and the energy of the system of the economic society, then

lower forms of life of the biosphere just take over. He compared it at that time, and I think this is a very fitting image for today, he said that the cheap labor orientation towards the developing sector and keeping development down in the so-called Third World, has to be compared to Schachtian economics in the concentration camps in Nazi Germany. He said a lot of deaths in the concentration camps came from forcing the people sitting in these camps to do hard labor. They would have to do work for 2-3000 calories, but they would only get food for about 1000 calories. Then it was just a question of time before they would die of over-exhaustion. That is a fitting image, because if you lower the living standard of the developing countries unnecessarily by denying them infrastructure, like the World Wildlife Fund did in all their campaigns to ruin the prospects for dams, for industrial development, just blocking development with phony arguments of ecologism. What you do then is you reduce the ability of people to withstand diseases. You lower their immune system, you make them susceptible to pandemics, and this is exactly what we see today. That was clear; we discussed it in no uncertain terms. He said, these policies would have more consequences than the genocide of Adolf Hitler. I absolutely want to repeat that. When you see people today who are indifferent, who say "I don't care. What do I care about Africa? What do I care about Latin America?"; these are people who are morally the equivalent of Nuremberg criminals. If you remember at the Nuremberg trials, the judges said, you either knew or should have known, about what was going on in the Third Reich. And concerning the condition of the developing sector, the exact same thing can be said. The people who are pushing no development, who are more concerned about the little snail in some corner than millions of people, these are people who are criminal. And that criminality absolutely has to stop. We have to start rebuilding the world. And every life in Africa, in Latin America, and in Asia is as precious as any child in Germany, or in the United States or any other place. I am consciously using this rather stark language, because

this complacency and this arrogance of the Euro-centrists, or the American-centrists has to stop. We are at a point of moral and economic breakdown crisis of the whole world. We need a new system, and that has to be mobilized, and it has to be gotten through. If we don't do that, we are risking our humanity either physically – because it is not yet clear if it doesn't lead to war as a consequence of conditions of a breakdown crisis – or it leads to our moral demise. I really think that we have to absolutely change this. We have to allow industrial development in every single country in the world, and we have to have a decent living standard. It is very easy, because China has shown the way, that you can bring infrastructure development as the precondition for development to every country. It is up to us in the so-called Western countries in Europe and the United States to absolutely change our ways.

SCHLANGER: I think it's also important going back to Lyn's warnings in the early 1970s that he identified individuals who were committed to population reduction, knowing this would happen. We're seeing some of these same kinds of comments. You had mentioned before, people talking about "Oh, isn't it wonderful! There are now blue skies!" There are people who are cheering on the demise of the elderly and the so-called "useless eaters", aren't there?

ZEPP-LAROUCHE: There is the flagship magazine of the British Empire, which is just coming out with that line today – {The Economist}. They say, isn't it wonderful that the economy is coming to a grinding halt? No CO2 emissions. We just have to make sure that after this crisis, we are not going back to normal. There are some other criminal people who call themselves economists, who also say that if this crisis stops and is over, we have to rebuild the economy and it has to be all based on climate protection. We have discussed the reasons why the Green ecology is exactly what caused this crisis; and if we would go back to the same policies which have caused

this crisis, then we clearly do not have the moral fitness to survive.

SCHLANGER: Helga, you've been talking about the rebuilding of the whole world health system. You had a conference call yesterday morning with young people, where you called on them to take responsibility for the organizing process to do this. What is your sense of the ability to mobilize youth today to take on this task?

ZEPP-LAROUICHE: I think this was very encouraging, because this was the first such international youth call, and it had about 70-75 young people from all over the world; from the United States, Mexico, Peru, Pakistan, Africa, Europe, China. I think the discussion really reflected that these young people are morally absolutely committed to make sure that they have a future. The idea that every country has the right to have a decent health system is obvious. They are committed to bring this message to a lot of other young people, to the universities. They are committed to spread it other organizations, especially in the developing sector. All of them are really tuned in to the approach that you need the world leaders of the most important countries to change the system. I think this is important, because people have not really thought about it. You cannot sit out this crisis; you cannot just wait until it's over. This is a pandemic, and it may come back in waves. It is intersected with the breakdown of the financial system, the collapse of the physical economy. The only to get out of that is to have a completely new system. Most people have not spent much thought on whether that is necessary or possible, or they say you can't do that. Yes, you can do it. Systems are man-made; they are not built in the physical universe. They are man-made, and you can change the system. If the old system is not suitable for the common good of the people, then it has to be replaced. We have specified many times what that must look like: You need a global Glass-Steagall banking separation, you have to end the

casino economy; you have to protect the commercial banks; you have to create a national bank in every country; you have to connect these national banks in a New Bretton Woods system which provides cheap long-term credit for clearly defined development projects. Then you have to have international cooperation. I think among the young people in particular, the idea that cooperation has to replace confrontation is a very easily understood idea. There were several especially young women – which made me especially happy, because I'm all for woman-power – and they especially emphasized that the passion which needs to be mobilized for that is agape. The change which has to occur must be based on a love for humanity. In this discussion, you could get an inkling of what the kind of new system will be like; namely, that the geopoliticians will be out. The people that think you can start endless wars just to make profit, this is an obsolete idea of troglodytes. The future must belong to young people who organize the world in different ways, in the interests of each country and vice versa. That was actually a very hopeful call, and I would urge people to get in contact with us to see how they can join it.

SCHLANGER: When you talk about troglodytes, look at what's going on in Europe with the European Union; the battles that are going on around the continuation of the neo-liberal policies. This is in complete contrast to what you're discussing with the young people, the complete absence of agape. Catch us up a little bit on what's going on in the EU.

ZEPP-LAROUCHE: It's almost a question of the past to talk about the EU. It's really right now a question mark as to how long this construct will remain in place. There is no solidarity; there is a big feud right now between Germany and Italy, France, and the other southern European countries. It's a little bit on the wrong issue; namely, this issue of Eurobonds, which I think is not a good idea. It's still in the realm of banking bail-out. Just to mention in parentheses, the Federal Reserve just yesterday opened their repo credit

facility to all other central banks. That means basically that they intend to help each other to bail each other out. The Federal Reserve earlier had allocated \$4 trillion for the bail-out of the U.S. banking sector which was characterized by Republican Congressman Thomas Massie as the biggest transfer of wealth from the ordinary people to the very rich and the bankers. This is part of the Eurobonds, so I'm not in favor of the Eurobonds. The conflict which has arisen between Germany and Holland and Austria on the one side, and these other countries on the other side, pertains to a real issue. That is that obviously the countries of the south – especially Italy and Spain, and increasingly also France – are really suffering an incredible exponential growth rate of this virus, and they have demanded some finance mechanism organized by the EU, which was blocked by Germany in particular and Holland and Austria. So, what these countries are saying is, this is the ugly face of Europe. The tone becomes quite nasty. For example, the Italian media and I think also Prime Minister Conte were saying that if that would have been the attitude of the other European countries at the 1953 debt conference in London, where half of the German debt was forgiven, which obviously was an extremely important factor in the reconstruction of Germany after the Second World War, if that had not been done, then Germany would still live on the garbage piles. So, the tone is becoming nasty, and everybody – Italy, Spain, Serbia – all say that they got more help from China, from Russia, from Cuba, even the small country of Albania was sending 30 health personnel to Italy to help. You can really see who is your friend, and who is completely only motivated by other reasons. This will remain, and I think this anti-China campaign which is coming from Pompeo, from {Foreign Affairs} magazine, from the Council on Foreign Relations, who are all still in this absolutely vicious campaign against China, I think that will vanish. Because people in this crisis see who is helping, and who is not. I think the situation in Europe maybe in a week or two weeks when we talk next time, the EU may not exist. That's not a bad thing, because it was a

bad construction from the very beginning. It could not work. It never existed. There is no European people. There are many nations and many cultures, but the European bureaucracy is an evil structure which is not in correspondence to the interests of their own members. The sooner it is replaced by something else – either a Eurasian alliance of sovereign states from the Chinese Sea to Vladivostok to Lisbon – or some other kind of new alliance of sovereign republics working together for a new world economic order. That does not mean that European countries cannot work together, but they should not be under the tutelage of some supranational structure. I think we will see big changes in this coming period. It requires the active intervention of as many state citizens as possible. So, please get in contact with us and help us to try to change the agenda on a large scale.

SCHLANGER: Toward accomplishing that goal, the Schiller Institute is going to have an international conference April 25-26. Just give us a little bit of a sense of what you hope to come out of that conference with.

ZEPP-LAROUICHE: We had to shift that conference which was planned for sometime, to be an internet conference, because you can't have physical conferences at this point. But in that lies also an advantage; namely, that you can reach much larger audiences. Therefore, people should start to register for that conference, because then you will be also supplied with additional information and materials you can read ahead of time to be prepared to participate as a more active person in this conference. What we will try to do is, we will try to discuss the issues at that conference which we think should be taken up these large governments. So, we will try to inform the population on the needed changes in the strategic alliance, the needed cultural changes, the need to go to a Classical renaissance of art and music. We will discuss the frontiers of science; what is necessary to defeat not only the coronavirus, but to really get a completely different sense of

space medicine, of breakthroughs in optical biophysics in redefining what life is. What do we need to know to be able to combat such problems much better? And naturally, what must be the principles of physical economy when we rebuild the world economy. So, you should definitely get in touch with us, register for the conference, and be part of it.

SCHLANGER: I would encourage everyone to join this mobilization with a very simple thing. Share this webcast! Pass it around! Get your friends to watch it. Then, go to the Schiller Institute website, the LaRouche PAC website, and study these ideas. It's these ideas which were generated from Lyndon LaRouche back in the 1960s and 1970s that are not only valid, but represent universal principles. It's through a return to those kinds of principles that we can restore mankind. Helga, thank you very much for your comments and for joining us today. As you always say, hopefully we'll see you next week.

ZEPP-LAROUCHE: Yes, let's do something to move mankind in a better direction.

Hovedprincipper i Operation virus ud af skindpelsen:

Sådan kan vi åbne Danmark op igen uden at risikere, at COVID-19 får overtaget

Udtalelse af Schiller Instituttets formand Tom Gillesberg den 30. marts 2020

Gennem nedlukningen af Danmark har man forhindret en overbelastning af sundhedssystemet. Det er fantastisk at man har kunnet reducere smittespredningen fra 2.6 til 2.0. Men hvad sker der, når man lukker op igen? Så kan man hurtigt komme i fare for italienske tilstande.

Kan man blot vente på at vi får "flokimmunitet" i Danmark? Er

det så galt?

Det kan meget vel være, at den reelle dødeligheden for COVID-19 er ikke 3,6 % som de nuværende tal indikerer men "blot" 0,3 % – 1,0 %, da der typisk er et stort mørketal i tallet blandt de, der er konstateret smittede med COVID-19. Netop derfor behøver man massiv testning både for COVID-19 og antistoffer imod COVID-19 for at få et bedre overblik over hvem, der er smittede, og hvem, der har været smittet.

Med hensyn til, om man skal bekæmpe COVID-19 og leve i en vedvarende kamp med den, indtil vi har en vaccine (som jeg mener), eller blot vente på en fremtidig flokimmunitet, står man tilbage med de uhyggelige tal. Hvis man ønsker at opnå en flokimmunitet for COVID-19 skal omkring 60 % af befolkningen have haft COVID-19. Det kræver at 60 % af 5,8 mio. danskere skal have haft COVID-19 = 3,5 mio. mennesker. Deraf skal 15 % sandsynligvis indlægges, så det bliver det 522.000 indlæggelser. 5 % skal sandsynligvis på intensiv, så det bliver det 174.000 intensivpatienter. Dør 1.0 % af de smittede er det 35.000 døde mennesker. Dør "kun" 0,3 % er det "kun" 10.500 mennesker, der mister livet.

Så længe det blot er tal, så virker 0,3-1,0 % som småting. Når det er menneskeliv, så er sådanne tab uacceptable, når vi har en mulighed for at reducere dem. Derfor var nedlukningen en god beslutning og derfor skal vi følge op med Operation virus ud af skindpelsen, så vi kan lukke Danmark mest muligt op uden at ende med italienske tilstande.

Vi skal åbne op, men uden at risikere italienske tilstande. Derfor må strategien ændres til at teste, teste og teste 50.000-100.000 om dagen. Teste både for COVID-19 og for antistoffer der viser, at man har haft virussen, for at finde syge, og smittede uden symptomer, for at kunne kortlægge og bryde smittekæderne og gøre det muligt at åbne Danmark, uden at virusset begynde at smitte for mange.

Det er godt at Kina sender værnemidler men vi skal også, og kan også, producere det vi mangler selv.

Forskellen mellem Danmark og Sverige bliver tydelig. Takket være Mette Frederiksens lederskab kan vi klare skærene mens Sverige er på vej imod en katastrofe der bliver tydeligere dag for dag.

Corona på verdensturné: Italien, Spanien, Frankrig og det nye epicentrum USA

EU i opløsning

USA og verdenskrisen

Global finansiel og økonomisk nedsmeltning

USA epicenter for den økonomiske nedsmeltning med massiv arbejdsløshed og massive finansielle hjælpeprogrammer. Man kan ikke både redde finansverdenen og menneskene. Red mennesker frem for det syge finanssystem.

Der er løsninger: iværksæt det nye økonomisk paradigme som Lyndon LaRouche og Schiller Instituttet længe har arbejdet for. Brug Lyndon LaRouches fire økonomisk love fra 2014.

Trump har lige forslået et infrastrukturprogram på 2 billion dollar. Men skal det lykkes må han lytte til Schiller Instituttet og LaRouche-folkene.

Meld dig til Schiller Instituttets internationale internetkonference den 25.-26. april her.

Verden behøver et topmøde mellem Trump, Putin og Xi Jinping for at etablere en ny verdensorden og et nyt økonomisk system. Ikke grøn dagsorden med anti-menneskelige nedskæringer, men et nyt retfærdigt økonomisk system i LaRouches ånd.

Bliv aktiv. Kontakt os.

Helga Zepp-LaRouche: 'Systemer er menneskeskabte' –Man kan forandre systemer, når de bryder sammen

Den 2. april 2020 (EIRNS) – Præsident Donald Trump leverede, d. 31. marts, en meget sober, og sandhedstyngende, rapport til nationen, i det Hvide Hus' daglige pressebriefing om coronaviruset, hvor han advarede amerikanerne om at må forvente en ekstrem krævende periode i løbet af de næste få uger, som coronapandemien rammer nationen med fuld kraft. Med alvorlig mine bekendtgjorde han, at hvis en dybtgående, national anstrengelse for afbødning finder sted, kan dødsfaldene holdes indenfor 100-240.000, baseret på beregninger fremsat af sundhedseksperter. Hvis dette ikke gøres, kan dødsfaldene stige til millioner. Han udtalte:

"Vores land finder sig selv i midten af en stor national prøvelse... Succes i den kamp vil kræve en massiv anstrengelse af vore fælles styrke, kærlighed og hengivenhed... Det kræver at hver eneste borger opofrer sig. Det kræver at hvert eneste firma opfylder sin patriotiske pligt... Ærlig talt er det et spørgsmål om liv og død... Dette vil blive smertefuldt, to meget, meget smertefulde to uger."

Tydeligvis rørt, berettede Præsident Trump igen om scenen, som han havde set, på Elmhurst Hospital i New York City: "Jeg så til, som læger og sygeplejersker gik ind i et hvis hospital i Elmhurst her til morgen. Jeg kender Elmhurst, Queens, jeg voksede op lige ved siden af det. Jeg kender hospitalet ganske godt, har set det hele mit liv, i mine unge dage. Og jeg vil

sige jer, at se scenerne med trailere derude og hvad de gør med disse trailere, det er kølehuse og ingen kunne tro det... Og jeg så hvordan lægerne og sygeplejerskerne gik ind i det hospital her til morgen. Det er som at se militærfolk gå i kamp, gå i krig. Deres mod er utroligt.”

Selvom Præsident Trump ikke nævnte dette i sin pressebriefing, truer krisen, produceret af den anden virus-casinoøkonomiens virus-med at eskalere eksponentielt over de næste 2-4 uger, med stadig mere og mere desperate tiltag (men fordømte) af redningspakker af centralbanken (Federal Reserve) for at redde verden finansboble. USA's officielle arbejdsløshed vil stige til mere end 32%, ifølge de seneste skøn, udgivet af centralbankens filial i St. Louis.

Hvad dette betyder, som Helga Zepp-LaRouche understregede i hendes ugentlige strategiske webcast, specielt når man betragter måden, hvorpå COVID-19-pandemien begynder at ramme udviklingssektoren, ”er en krise uden sammenligning, og jeg tror ikke at nogen af os har oplevet nogen lignende i vores levetid...

Der er steder som Jakarta i Indonesien-10 millioner mennesker i en by. Halvdelen af disse mennesker har ingen adgang til rent vand. En lignende situation findes i mange udviklingslande, inklusive Mexico og Peru. Så vi ser virkelig på en verdenskrise uden sidestykke. Faren er at dette vil overvælde sundhedssystemerne; der er ikke mulighed for at producere nok fornødent udstyr. Vinteren, som nu er på trapperne på sydlige halvkugle, vil begunstige virussets udbredelse. Vi vil sikkert se mange millioner mennesker dø. Jeg tænker dette gør det meget klart, at vi akut har brug for et komplet anderledes system. Intet vil være det samme som før.”.

Imens hun gav et overblik over den destruktive krise der konfronterer menneskeheden, huskede hun seerne på, at ”systemer er menneskeskabte”, og kan ændres når de bryder

sammen. Hun påpegede det lovende, personlige diplomati, som Præsident Trump har genetableret med Præsident Xi Jinping i Kina og Ruslands Præsident Putin, såvel som de "utrolige anstrengelser der gøres i USA for at omlægge nogle af industrierne. En luftbro er blevet etableret, med mange fly fra Kina og andre asiatiske lande—alt i alt 50 fly tilsammen. I går ankom de første russiske fly, med medicinsk udstyr, til USA.

"Så der foregår en utrolig mobilisering, men det er også meget klart at dette er en pandemi, og at vi får massearbejdsløshed og død."

Helga Zepp-LaRouche opfordrede til omgående handling:

"Jeg mener at vi skal begynde en international massemobilisering, som Schiller Instituttet allerede giver sig af med, for at etablere en ny, økonomisk verdensorden. Vi har efterspurgt dette i meget lang tid, men umiddelbart i denne situation kræver det et topmøde mellem de vigtigste og meste magtfulde lande: Kina, Rusland, Indien og USA. De må etablere et nyt system. Vi har brug for et fuldstændig nyt system. Alle den liberale økonomis regler, den neo-liberale model, markederne for billig arbejdskraft, udlicitering, alt dette må erstattes; og det skal begynde med en umiddelbar opbygningen af et globalt sundhedsvæsen, hvor et ordentligt sundhedssystem etableres i hvert eneste land. Det må være starten på en industriel revolution for hele verden. Intet mindre end dette kan gøre det. Det betyder, at vi har brug for et nyt Bretton Woods-system, og et nyt kredit-system til at finansiere dette.

"Hvis du er enig med dette," konkluderede Helga Zepp-LaRouche, "så hjælp os med denne mobilisering, fordi det som er på spil, er mange millioner menneskers liv, og måske dit eget."

Trumps plan og Wall Streets plan – de kan ikke sameksistere

Den 31. marts (EIRNS) – Præsident Donald Trump udsendte i eftermiddags et tweet, der, hvis der blev handlet på det, hurtigt kunne markere begyndelsen på en bedring – ikke alene af COVID-19, men også af det betændte kollaps i den amerikanske økonomi siden mordet på John Kennedy og lanceringen af Vietnam-krigen. Trump skrev: "Med renter for USA tæt på NUL er det tiden til at gøre noget ved vores igennem årtier længeventede infrastruktur-lovgivning. Det skal være MEGET STORT & DRISTIGT, to billioner dollars, og udelukkende være fokuseret på jobs og genopbygning af vort lands engang så storslåede infrastruktur! Fase 4."

Kan dette fungere? Med det demokratiske partis lederskab tvunget til at samarbejde med præsidenten i lyset af den værste krise siden 2. verdenskrig – ved at have vedtaget tre store humanitære bistands- og stimuleringspakker for at tackle den ødelagte økonomi og Wall Streets udplyndring af nationens folkesundhed, industri og infrastruktur igennem årtier – vil demokraterne næsten helt sikkert også støtte Trump i dette. Problemet ligger andre steder.

I næsten samme øjeblik som Trump udsendte dette historiske tweet, meddelte formand for Federal Reserve (USA's centralbank), Jerome Powell, at Fed-balancen har nået et historisk højdepunkt på 5,3 billioner dollars, efter alene i

denne uge at være steget med 12,4%. Endvidere tilføjede Wall Street-‘orakler’ at dette bare er begyndelsen, og at tallet ved udgangen af året sandsynligvis vil nå 10 billioner \$. Dette er helt sikkert ikke til gavn for realøkonomien, men går direkte til opkøb af stadig mere værdiløse derivater og andre spekulative papirer fra bankerne – og ikke kun Wall Street-banker, men også de vestlige centralbanker. Denne massive indsprøjtning af penge, der er absolut uden opbakning i produktion, er netop det som Lyndon LaRouche har peget på – siden Richard Nixon ødelagde Bretton Woods-systemets fastkurspolitik i 1971 – som den næsten sikre årsag til et hyperinflationært sammenbrud, som vil forvandle opsparinger, lønninger og pensionsfonde for det arbejdende folk i denne nation til toiletpapir – og man kan være sikker på, at dette ikke er med henblik på at løse problemet med at vores supermarkeder er udgået for toiletpapir.

At trykke penge som kredit med den hensigt at skabe produktiv velstand for fremtiden er det præcis modsatte af at trykke penge for at løskøbe dårlig spillegæld. Det ene skaber velstand, det andet stjæler velstanden fra den reelle økonomi for at støtte de (faktisk bankerotte) britiske imperialistiske oligarker, der driver City of London og Wall Street. Som LaRouche elskede at sige: Penge er dumme, kredit ved hvad den gør.

Trump har ført kampagne for en infrastruktur-lovgivning i årevis, længe før han besluttede at stille op som præsident. Han kæmpede også for det hamiltoniske “amerikanske system” og Glass/Steagall-loven, velvidende at foruden disse ville kreditterne til genoprettelsen af den amerikanske økonomi og infrastruktur blive suget op af Wall Streets bundløse hul. Men han har ikke haft den politiske styrke til at tage kampen op med Wall Street.

Denne “dobbeltvirus”-krise – COVID-19 og derivat-viruset – har allerede skabt en “faseændring” i befolkningens bevidsthed. Folk ved i stigende grad, at det gamle system er

dødt. Intet lapperi kan få det på fode. Men de er også bange, og ved ikke hvordan de kan forhindre den nye mørke tidsalder, hvis ansigt toner frem foran dem.

I dag afholdt Helga Zepp-LaRouche et to timer langt videokonferenceopkald med unge mennesker fra hele USA, Latinamerika, Europa, Afrika, Asien og Mellemøsten. Hun motiverede dem til at deltage i den påkrævede mobilisering af verdens nationer og folk, for at forlange at en bydende nødvendig række topmøder bliver afholdt af de fire stormagter samt allierede nationer, for at opbygge et alternativ til det gamle, døde paradigme – og bemærkede, at ungdommens lidenskab og visioner er en integreret del af enhver revolution og renæssance. Navnlig opfordrede hun dem til at mobilisere tusinder af mennesker internationalt til at deltage i Schiller Instituttets internationale konference, der afholdes online den 25.-26. april. Den samme appel gælder for alle læsere af dagens 'EIR Daily Alert'. Invitationen til denne konference sendes i den kommende Alert søndag 5. april. Vær venlig at planlægge at deltage, og organisér alle du kender til at deltage i denne afgørende begivenhed.

Den større udfordring: Udviklingslandene har brug for et nyt globalt sundhedssystem for at overleve

Den 30. marts (EIRNS) – Det stadig større skifte hen imod et

reelt samarbejde mellem USA og Kina i kampen mod pandemien, og den potentielle inkludering af Rusland betyder, at den store udfordring for deres dagsorden er at tilvejebringe moderne sundhedssystemer og hospitalsfaciliteter til adskillige udviklingslande, der selv mangler midlerne til at kunne bekæmpe virussets dødelige udbredelse. Idéen om skabelsen af en international udviklingsbank, lige nu til dette værdige formål, venter stadig på at blive sat på dagsordenen.

Den 29. marts udgav FN's Kommission for Handel og Udvikling (UNCTAD) en rapport og et forslag angående de første skridt hen imod dette formål. De opfordrede til at de industrielle lande skulle frigive \$2,5 billioner i alt, "for at udviklingslande kan håndtere chokket fra coronavirusset." De foreslog at afskrive omkring \$1 billion i gæld, baseret på modellen fra konferencen i 1953 angående den tyske gæld. I dette tilfælde var det halvdelen af al tysk gæld, som blev ophævet for at muliggøre efterkrigstidens genopbygning. Denne idé fra UNCTAD understøtter prompte de sidste dages forslag fra Argentina, samt kravet fra femten afrikanske lande til G20 om en generel afskrivning af gæld.

UNCTAD foreslår ligeså, at omfordele Den internationale Valutafonds "special drawing rights" (SDR) og tildele flere SDR-rettigheder til udviklingslande; og \$500 milliarder til en Marshall-plan for et offentligt sundhedssystem. De i alt \$2,5 billioner, som UNCTAD udpeger, er halvdelen af hvad de førende G20-lande, i deres telekonference d. 26. marts, blev enige om at bruge på deres egne økonomiers overlevelse og genoprettelse. Det er, igen, halvdelen af det som en enkelt centralbank, den amerikanske Federal Reserve, hektisk trykker for at forsøge at redde snesevis af billioner af de nu giftige aktiver i de spekulative markeder, som i stedet burde lukkes ned, imens krisen varer ved.

Særligt afgørende opfordrer UNCTAD's rapport til at tillade og tilskynde kapitalkontrol, hvor igennem udviklingslande kan

standse kapitalflugten.

"De økonomiske konsekvenser fra chokket fortsætter og er til stadighed svære at forudse, men der er klare indikationer på, at situationen vil blive værre for udviklingslandenes økonomier før de bliver bedre," sagde UNCTAD's generalsekretær, Mukhisa Kituyi. I løbet af februar og marts er kapital 'flygtet som en tyv' ud af hvert eneste udviklingsland, uden undtagelse; deres valutaer falder hurtigt i værdi; deres eksportindtjening er styrtdykket; rentesatserne på deres udlandsgæld er skudt i vejret; de har tabt turisme; og prisen på deres råvarer er faldet kraftigt. Etiopiens premierminister Abiy Ahmed Ali – som repræsenterede nødvendigheden for en gældseftergivelse – talte for dem, da han sagde, at disse nationer fuldstændig mangler midlerne til at kunne varetage de enorme programmer for bygning af hospitaler og produktion af hospitalsudstyr og den efterfølgende økonomiske genoprejsning, som de udviklede lande iværksætter.

Vi ser hvordan lederne af de industrielle lande har forfærdelig travlt med at genskabe de hospitalssenge og udstyr og den offentlige sundhedsinfrastruktur, som deres monetære sindssyge har stjålet fra deres befolkninger over de sidste 50 år. En ægte, ny økonomisk orden må nu opstå, grundlagt på fuldstændig anderledes økonomiske aksiomer end tilbedelsen af "mig først", "alfa", og business-uddannelsen.

En international udviklingsbank, der kan påtage sig jobbet for verdens sundhed og udvikling, som UNCTAD blot antyder i deres forslag, må igangsættes af, minimum, de førende videnskabelige og teknologiske nationer. Disse er Kina, USA, Rusland og Indien; og deres stigende tendens til at samarbejde over for denne store krise, må lede dem til at skabe et nyt internationalt kreditsystem – et Nyt Bretton Woods, som genopliver Franklin Roosevelts intention om at udvikle den underudviklede verden gennem eksport af kapitalgoder.

Schiller Instituttet vil afholde en international internetkonference, "Menneskehedens Eksistens afhænger nu af Etableringen af et Nyt Paradigme!", d. 25.-26. april for at realisere dette, som invitationen til konferencen forklarer.
