

Den nødvendige klare tankegang der kræves nu. International Fredskoalition møde #119 den 12. september 2025

HELGA ZEPP-LAROUCHE: Tak, og goddag til jer alle. Jeg tror vi alle er klar over, at verden er fuldstændig ude af balance. Vi befinder os i det, man kunne kalde jungleloven. Bare for at fremhæve udviklingen: Vi havde det formodede russiske droneangreb på polsk territorium, som nogle kalder den største hændelse siden NATO's grundlæggelse i 1949; vi havde mordet på Charlie Kirk, som helt klart har vidtrækkende betydning som en besked til alle politikere i USA og andre steder; vi havde det israelske angreb på Qatar; vi havde destabiliseringen af flere lande – Nepal, Serbien; vi har trusler mod Brasilien, Venezuela. Det er altså ikke en overdrivelse at sige, at vi virkelig står over for et meget vidtrækkende sammenbrud af den internationale orden. Jeg burde have nævnt den franske situation, som er tæt på at være umulig at styre, og den potentielle eksplosion af alting-boblen.

Vi har også dannelsen af et positivt alternativ, men lad mig først gennemgå nogle af højdepunkterne i den nuværende destabilisering. Onsdag den 10. september trængte flere russiske droner ind i polsk luftrum; omkring 16 droner. De blev opfanget i det nordvestlige Ukraine, og ifølge nogle eksperter blev de vildledt af det ukrainske luftforsvar, så de mistede retningen og fløj ind i Polen. Det er en forklaring. De blev på en eller anden måde skudt ned – enten styrtede de ned af sig selv, eller også blev de skudt ned af det polske luftforsvar. Under alle omstændigheder skete der ingen væsentlig skade, hverken på materiel eller på mennesker. Og

der er nu bekræftede rapporter om, at der var øjeblikkelig kontakt mellem det hviderussiske militær og det polske militær. Det hviderussiske militær advarede det polske militær om, at nogle russiske droner sandsynligvis var blevet opfanget af elektroniske modforanstaltninger og derfor fløj ind på polsk territorium. Chefen for den polske generalstab bekræftede modtagelsen af en sådan erklæring. Så ingen blev umiddelbart berørt, og ingen kom til skade. Men det forhindrede ikke krigshøgene i Vesten i at gå ind i et hidtil uset hysteri. Det tyske magasin Der Spiegel skrev for eksempel: »Russiske droner over Polen. Tyske politikere advarer om en optrapning af krigen.« Værst af alt var The Economist, der skrev: "Dette er den mest alvorlige indtrængen på NATO-territorium siden dets grundlæggelse i 1949. Den polske premierminister sagde: »Polen er tættest på en konflikt siden Anden Verdenskrig.«» Han opfordrede til en fuld mobilisering af NATO og påberåbte sig artikel 4 i NATO. The Economist skrev videre: «Dette er kun et skridt videre i den større krig med Rusland, som Rusland planlægger at indlede mod Europa.» Den britiske forsvarsminister John Healey sagde: «Ukraines væbnede styrker vil styrke NATO's luftforsvar over Polen.» De tyske medier, radio og tv, var så overdrevent dramatiske, at jeg vil spare jer for deres udtalelser. Præsident Trump sagde, at det meget vel kunne have været en fejlfunktion i disse droner, og den russiske regering sagde, at de ikke havde givet nogen ordre om at rette droner mod polsk territorium. Men det forhindrede ikke krigsfraktionerne i Koalitionen af Villige og deres håndlangere i medierne i at forsøge at øge hysteriet om den forestående krig med Rusland. Derfor synes jeg, at Robert Fico, Slovakiets premierminister, har helt ret i at kræve en uafhængig undersøgelse.

I en anden sandsynligvis relateret hændelse, selvom den tilsyneladende ikke er relateret, blev Charlie Kirk myrdet. Kirk ledede en meget stor organisation af unge mennesker, studerende, kaldet Turning Point USA. Han var i stand til at opbygge 3.500 afdelinger på universiteter over hele USA. Han

er et meget vigtigt element i MAGA-bevægelsen. Han blev skudt og dræbt. Præsident Trump reagerede straks på dette og sagde, at hans administration vil finde alle de involverede, herunder de organisationer, der finansierede hele operationen. Han beskyldte grundlæggende den venstreorienterede politiske opposition for på en eller anden måde at stå bag, hvilket ikke ligefrem var hjælpsomt i betragtning af den allerede ekstraordinære polarisering i USA, som gennem dette mord nu

når et farligt nyt stadie. Vi har rapporter fra folk på stedet om, at folk på venstrefløjen, religiøse organisationer og andre siger, at der var en vis jubel over dette drab, hvilket afspejler den dybe forvirring i befolkningen og den urimelige ophidselse af befolkningen.

Kirk havde allerede nogle år tidligere advaret om, at der var dødstrusler mod ham. Han havde skrevet på Twitter, at en sådan trussel eksisterede, og han henviste til »den person«. Det viser sig, at »den person« var en beboer i Las Vegas ved navn Ashton Cirillo, tidligere Sarah Ashton-Cirillo. Kirk, der længe var ven med den daværende senator og nuværende vicepræsident J.D. Vance, havde allerede i 2023 skrevet til præsident Biden og udenrigsminister Blinken og advaret om denne person. Ashton-Cirillo kan være eller ikke være relateret til dette, men det er klart, at et sådant miljø eksisterede. Senator Alexei Pushkov, formand for Informationsudvalget i Den Russiske Føderations Råd, har bemærket, at dette mord efter hans opfattelse er en klar besked til præsident Trump og alle andre fremtrædende personer i det amerikanske offentlige liv, der har lignende synspunkter. Men han mener, at den vigtigste besked er en advarsel til præsident Trump, der allerede har overlevet to nylige attentatforsøg.

Den anden vigtige begivenhed, der kom på forsiden af aviserne og er et alvorligt skridt i retning af jungleloven, var Israels angreb på Qatar på den bygning, hvor Hamas-forhandlerne mødtes for at drøfte en mulig aftale med

israelerne om gidslerne. De skulle have været dræbt, men det blev de ikke. Kun sønnen til en af Hamas-lederne blev myrdet. Men det er naturligvis en utrolig begivenhed, hvis man pludselig bomber Qatar, som er en af USA's nærmeste allierede, når de tilbyder deres hjælp til at lette forhandlingerne i en meget desperat situation. Qatars premierminister sagde, at dette angreb dræbte alle håb for gidslerne. Han kræver nu, at premierminister Netanyahu stilles for retten. Denne handling blev fordømt af alle arabiske stater, og den har helt sikkert gjort alting meget vanskeligere. Hvem vil nu tilbyde deres hjælp til forhandlingerne? Hvis man flytter forhandlingerne til Kairo, bliver man bombet i Kairo; hvis man gør det i Amman, bliver man bombet i Amman. Hvis dette ikke bliver rettet op med passende foranstaltninger, betyder det, at verden er taget endnu et skridt i retning af jungleloven.

Det store spørgsmål er naturligvis, om præsident Trump vidste det? Der er modstridende udtalelser, og nu er historien ikke særlig klar. Under alle omstændigheder ser det ud til, at Trump blev advaret for sent, da raketterne allerede var i luften, og derfor kom advarslen til Qatar, efter at angrebet havde fundet sted. Det eneste positive er, at for første gang stemte de fem permanente medlemmer af FN's Sikkerhedsråd, der straks blev indkaldt, alle for at fordømme Israels handling. Det er første gang, at USA har taget klart afstand fra Israels handlinger. Men det er naturligvis langt fra at afhjælpe situationen. Som I ved, er FN's Generalforsamling nu begyndt, og mange organisationer – herunder IPC – kræver resolution nr. 377 om forening for fred, hvorved beslutningsmagten ved et flertal på to tredjedele i FN's Generalforsamling flyttes fra FN's Sikkerhedsråd til FN's Generalforsamling for at træffe foranstaltninger til at afhjælpe situationen. Der er en fuld mobilisering i gang for dette, og vi vil også diskutere dette i dag.

Den eneste ekstremt positive udvikling, der hører til verdensbilledet, er det faktum, at vi ikke må glemme, at hele

denne strategi med spændinger, der omfatter fremskyndelsen af det russiske droneangreb på Polen, drabet på Charlie Kirk, angrebene på Qatar, destabiliseringen af Serbien og Nepal, angrebene i Latinamerika mod Brasilien og Venezuela – fællesnævneren for alt dette er, at det er en reaktion på, at der er ved at opstå et nyt verdensøkonomisk system med dette SCO-møde i Tianjin, Kina, i begyndelsen af september og de efterfølgende meddelelser om, at denne organisation planlægger at oprette en ny SCO-bank for at skabe kredit til infrastruktur og anden udvikling. Det er et

nyt system, der er ved at opstå, af lande, der i forening med BRIKS, Den eurasiske økonomiske Union, ASEAN, CELAC og Den Afrikanske Union – med andre ord med organisationer fra det globale Syd – er i færd med at organisere et nyt system baseret på FN-pagten, de fem principper for fredelig sameksistens, som et klart svar på Vestens forsøg på at etablere en unipolær verden i tiden efter Den kolde Krig.

Nu er der en ny udvikling, som jeg mener er af største betydning, nemlig at præsident Xi Jinping har tilføjet en fjerde til sine tre globale udviklingsinitiativer – det globale udviklings-, sikkerheds- og civilisationsinitiativ – nemlig det globale styringsinitiativ. Jeg vil opfordre alle til at læse dette i detaljer. Det er et meget imponerende dokument, der i detaljer beskriver, hvordan de internationale relationer mellem stater kan organiseres på basis af suverænitet, respekt for forskellige sociale systemer, ikke-indblanding, lige stemmeret uanset landets størrelse og ingen beslutninger truffet over hovedet på de berørte lande. Under alle omstændigheder er det en meget detaljeret plan for, hvordan man kan organisere en ny sikkerheds- og udviklingsarkitektur, som jeg har bedt om siden den særlige militæroperation startede i februar 2022. Sammen med mine Ti Principper er det en indførelse af, hvordan man kan sætte sig til forhandlingsbordet, som man gjorde ved den Westfalske Fred, og løse alle territoriale, historiske og andre

konflikter ved at have en struktur, hvor alle føler, at de er repræsenteret, og at deres interesser bliver varetaget, uanset om de er et stort eller et lille land. Jeg mener, at dette er et absolut brugbart dokument til at nå frem til en ny sikkerheds- og udviklingsarkitektur. Derfor vil jeg opfordre alle deltagere i IPC til at studere dette dokument inden næste uge. Jeg mener, at det fortjener at blive kendt af hele verden. Det giver mere ammunition til Schiller Instituttets nylige opfordring til de vestlige lande om at slutte sig til den globale majoritet i det nye system, hvis vi skal komme ud af denne krise.

Så selvom vi står over for en utrolig fare, er der også absolut lys for enden af tunnelen og en vej ud af dette. Jeg mener, at vi skal diskutere både farerne for verdensfreden og med eftertryk løsningerne for at komme ud af det. Mange medlemmer af fredsbevægelsen er meget opmærksomme på denne eller hin fare, men jeg tror, at meget få tænker over, hvordan vi etablerer en retfærdig ny økonomisk orden i alle landes interesser på kloden. Det er den eneste måde, vi kan opnå varig fred på. Det var det, jeg ville sige i begyndelsen.

Remarks during the Discussion:

I think a lot of important topics have been brought up. I think that unless there is a reversal and the Palestinians will get visas, if that does not occur, then I would suggest that IPC include in our mobilization that the UN General Assembly be moved to Geneva. Because I think that is the absolute precondition for any semblance of justice, because the Palestinians are obviously the people who are in the middle of being targetted for elimination. So, I would suggest that for your consideration.

Otherwise, I can only say that I just got a message which reported that in response to the assassination of Charlie

Kirk, Alexandria Ocasio-Cortez is cancelling her appearance at a weekend rally in North Carolina; obviously in response to the perceived threat to all politicians who have a distinct view on these matters. So, will that be followed by all other people? Will that be the end of politics in the United States and elsewhere? It just shows you that we really need to move to a completely New Paradigm which was outlined by Shakeel Ramay; and I also touched upon it with the Global Governance Initiative of President Xi Jinping. I have been convinced for a very long time that we cannot solve all the different problems one-by-one. Because we are involved in a systemic breakdown; and when you have a condition like that, you need to address the root causes. That means we have to go back to the principles of natural law, of sovereignty, of the UN Charter, and create a new system based on these foundations of the UN Charter and the Five Principles of Peaceful Coexistence, to build a system which functions. Unless we do that, I'm very concerned that it will get worse and worse in all these different fields.

Now, concerning the role of the British Empire, I would like to remind especially the Americans on this call that the role of the British subversion of the American republic needs to be addressed. Because the whole unipolar world, as it was pursued in the post-Cold War period by neo-cons in the United States, was based on the special relationship with the British Empire. And that is the root cause, because at a certain point the British establishment decided to subvert the American elites to adopt the model of the British Empire to rule the world together. I think unless that is clearly understood, we will not be able to solve these problems. I think the upcoming 250th anniversary of the American Revolution and American War of Independence is a very good reason to remind Americans what America was founded for, and why the principles of the American republic are fundamentally opposite to what the British Empire stands for and stood for.

So, I would urge people to really join our fight to go into New Paradigm; sign the newest statement by the Schiller Institute that the Western nations must join the Global Majority if we are supposed to come out of this crisis. Please sign this document, circulate it widely, and let's all move so the people in the Western countries develop an understanding for why there must be an alternative. Because the mainstream media do generally under-report, slander, mischaracterize, as if that would be the fight between the democracies and the autocracies. But nothing could be further from the truth. So, sign this new statement by the Schiller Institute and more importantly help us to organize as many people as possible to understand what that is all about.

[Later in the discussion] I think what you are saying is absolutely right. Because when you are confronted with a great evil which makes you feel helpless, the sign is a reflection of the fact that we are here because we want to do everything we can to solve the problem. But you are confronted with the situation that if the United States is backing Israel, everybody says what should a UN peacekeeping force do? Blue Helmets, yeah, we are demanding that; it has to be big enough so that the only hope is that the conscience of the Israeli population gets awakened to the point that they demand a change of this policy. There is a growing resistance inside Israel, but send a robust armed UN mission, well I cannot imagine how even a robust UN mission would be able to confront the military of the IDF backed by the United States. So, that does not seem to be a very promising way. What Shakeel was saying, that you have to first make sure the people know what the objectives of the Israelis are; the Greater Israel. There can be no doubt that that's the case. I think we should also demand that people who know this religious side of the thing much better, should speak out. Because when it refers to the Old Testament and supposedly in the Old Testament or not about the Analect being the reference point, I think we should demand that people who have studied theology, professors of

theology, people in the different churches who have much better knowledge about these matters than I would claim to have. I'm not exactly Biblefest [bible proof], as they say in Germany. I know something about the Bible, but I wouldn't claim to be an expert. So, we should demand that the churches speak out about this, because it has to be done competently, convincingly. I can only hear a deafening silence from most churches, so we should make that an issue.

But most importantly, I think what you said, we need to have love. And that is the most difficult, because then you are confronted with such an incredible evil and injustice is too mild a word. It's very difficult to mobilize love; but I absolutely know that if you do not overcome the impulse to be furious, or even hate, or be angry with a more positive feeling; namely the feeling of love for all humanity, you cannot find the solution. I know that because when you are rageful for whatever reason, your reason blends out. Therefore, I think the mobilization of love is really the most important. We should never give up hope on what I tried to express in the Tenth Principle, which I think is a very profound principle. Because concerning the nature of man being good, and that all evil is the result of lack of development, and that is a very hopeful idea. Because if it's a lack of development, it can be overcome through development. And even more importantly, man has an infinite capacity for self-perfection not only of the mind, but also of the beauty of the character. That characteristic is in correspondence to the laws of the physical universe. The proof of it is very easy. I could make a long presentation, but the short version is that it's proven by the fact that an idea which is created in the creative human mind has, when it's an adequate idea, an impact on the physical universe by being able to change it. That means there is a correspondence between the creative powers of the human mind and the lawfulness of the universe. That is why natural law is efficient, and why evil eventually brings down destruction on itself. You can violate natural law for a long

time, but you cannot violate it forever. This is, by the way, why we have named our cultural magazine in German *Ibykus*. Because for those of you who know the poem by Friedrich Schiller "Ibykus", it refers to the fact that there is a higher power of reason, and the Ibykus principle is that which calls on these superior forces which do exist. I would urge all of you to read the beautiful poem of "Ibykus." If you can do it in German, there are also competent translations; because that principle exists as a real force in the universe, I'm absolutely convinced. I think it should also give something for the Israeli people to think about, because if they do not rectify the evil being committed in their name, I'm not so sure that they will not bring about their own destruction; because these laws do exist in the real universe. That is my short answer.

Concluding Remarks:

It's funny, I had just thought about the same thing: Citizens of the world unite! That has to do with the fact that it's a variation of Karl [Marx], my favorite citizen of my hometown, Trier. He said, "Proletarians of the world unite!" I changed it into "Citizens of the world unite!" because that is where we are at.

I think we should do what Ingrid said with these letters. Everybody who is listening to this call should get this letter to their government and get other people to do likewise. I think it counts right now a lot.

Otherwise, I think a lot of good ideas came out of this discussion. I think this idea that we should get some theologians to address this issue is a very productive idea, because it's a scientific question. It's not something nebulous or that one cannot know about. Otherwise, I would say we should take the view that with the SCO meeting, a dramatic change has occurred. There is a new sense of confidence among the nations of the Global South; especially naturally with the

leadership of President Xi Jinping, President Putin, President Lula, Prime Minister Modi. I think that the task, that we have to convince the citizens of the Global North or the Global West to give up their arrogance, that there is something better sitting on a higher horse. Thinking that Europe is a garden and the rest is a jungle, you can see how much Europe is disintegrating and the jungle is already happily growing inside the European countries. You don't need any influence from the outside.

But we have to tell people that this is now the moment where the European and American citizens can make a difference by clearly expressing that they want to cooperate with the Global Majority. I was very happy when I read the Global Governance Initiative by President Xi Jinping, because I thought, "This is perfect! This is a complete echoing of what we have been fighting for with the new security and development architecture since almost 2.5 years now." It is a workable proposal; so let's get some professors, think tanks, elected politicians engaged in a discussion, and let them say that they want to cooperate. I think we could move this very quickly, because the popularity of these present governments—at least in Europe—is very dwindling. Macron has 17%; Merz has maybe 20% or 22% if at all; Starmer may have 5% (that's an educated guess). So, they're not exactly in a strong position. If we get some real discussion among the population that they want to be part of this world citizens unite movement, I think it can be done.

So, let's go out and multiply as much as we can.
