

Med Obamas afgang dukker nukleart plasma atter op rundt omkring på globen

Paris, 19. jan., 2017 (*Nouvelle Solidarité*) – For et par uger siden annoncerede den tyske stellarator i Greifswald nogle særdeles lovende resultater inden for videnskaben om plasmafysik. I Frankrig, den 14. dec., ved lokaliteten for den Franske Atomenergikommission (CEA) i Cadarache, i det sydlige Frankrig, hvor ITER er ved at blive bygget, annoncerede forskningsteams stolt, at de opnåede det første plasma i WEST-tokamakken, søsterreaktoren til den kinesiske EAST (Eksperimental Avanceret Superledende Tokamak), der satte en milepæl en måned tidligere med en 60 sekunder lang, fuldt ikke-induktiv/stabil lang puls H-modus plasma under strålefrekvens opvarmning. (!) (for nærmere forklaring, se evt. <http://west.cea.fr/en/index.php>)

I Frankrig er WEST-projektet (Tungsten (W; wolfram) Miljø i Stabil Tokamak) en gen-konfiguration af den franske »Tore Supra« superledende tokamak til et prøveanlæg for ITER. Siden dens konstruktion i 1980'erne er Tore Supra tokamakken videreudviklet til at forbedre plasmaydeevnen og har endda sat verdensrekord med en stationær plasma, der varede over 6 minutter med en injiceret og ekstraheret energi på 1 gigajoule (GJ).

I dag tilsigter både EAST og WEST, i et eksemplarisk samarbejde for menneskehedens fælles mål, at kvalificere »teknologiske byggesten«, dvs., gennemføre tests på forhånd, på en mindre skala, af en ny komponent ved navn »divertor« (EU300 million), som vil være afgørende for ITER. Denne divertor, der befinder sig på bunden af vakuumkammeret, er en afgørende komponent, da den modtager det meste af varmen og partikelstrømmen, der kommer fra det centrale plasma. Dens

funktion er at ekstrahere »asken« (helium) og en del af varmen, der produceres af fusionsreaktionen, samtidig med, at den minimerer kontamineringen af plasmaet af de andre urenheder.

Nu, hvor denne store milepæl er passeret, fortsætter man med forberedelserne af WEST-tokamakken til den første, eksperimentale kampagne i foråret 2017, med hensyn til at validere flere andre nye komponenter og teknologier for den 54 meter høje, gigantiske ITER fusions-tokamak.

Læsere i dag bør mindes om, at ITER begyndte i 1985 som et Reagan-Gorbatjov initiativ med ligeværdig deltagelse af Sovjetunionen, EU, USA og Japan. Dengang mente to forskere, Alvin Trivelpiece (USA) og Jevgenij Velikhov (USSR), at det næste skridt i fusionsforskning ville overstige budgettet for enhver nation, og at samarbejde ville være internationalt fordelagtigt. Siden da har USA skåret sin finansiering af ITER ned, alt imens Kina, Indien og Sydkorea har tilsluttet sig, og andre, såsom Iran, er i færd med at tilslutte sig.

Det næste stadium i menneskets evolution

Leder fra LaRouchePAC, 19. januar, 2017 – De næste dage vil se mange revolutionære udviklinger, kvalitativt nye udviklinger, der ikke ligner noget som helst andet, som tidligere er set i menneskehedens historie. Men én ting ved vi, som allerede er uundgåelig og ubestridelig. Deres system er færdigt. Det er forbi, og kommer aldrig tilbage. Jo, de kan lave ballade, som de netop gør. De kan lave et blodigt rod, hvis de får lov – men de vil aldrig være i stand til at bringe dette system

tilbage fra graven. Gud ske tak og lov, at vi er færdige med det, for altid.

Så snart, vi kendte resultatet af præsidentvalget, sagde Lyndon LaRouche, at det ikke var USA, der havde afvist Hillary Clinton, Barack Obama og alt, hvad de stod for – det var hele verden, der havde afvist dem. Det var et globalt fænomen. Uanset, hvad Angela Merkel måtte mene, så havde verden fået nok af deres myrderi og uplyndring – af Det britiske Imperiums uforskammethed og hybris igennem tre århundreder. Verden havde besluttet at lade dem tilbage i mudderet, og gå videre. Videre til det næste stadium i menneskehedens evolution, som allerede er begyndt.

Det næste stadie i evolutionen er et helt, indbyrdes forbundet kompleks – moralsk, fysisk, psykologisk og videnskabeligt – alle disse aspekter tæt sammenvævet, som det altid har været i Lyndon LaRouches tankegang. Ét ord for dette nye stadium af vor arts evolution er det »Nye Paradigme«. Det Nye Paradigme, hvor, som Helga Zepp-LaRouche så mindeværdigt har sagt det, »vi bliver virkelig menneskelige«. Dets nye »platform« for økonomisk udvikling inkluderer Verdenslandbroen, som hr. og fr. LaRouche for første gang lancerede som en idé for omkring tredive år siden, og som nu er i færd med at blive virkelig gjort under lederskab af Kina og Putins Rusland.

Med seneste nyt-udviklinger, der vælter frem for hver dag, der går, er projektet for Kra-kanalen igennem Thailand, som Lyndon LaRouche har kæmpet for siden 1980'erne, pludselig kommet tilbage på toppen af dagsordenen. Det forestående nummer af *EIR*, dateret den 27. januar, vil citere ham fra et interview i Singapore-avisen *Fortune Times* fra 2014, om Kra-kanalen:

»Opdel Øst- og Sydasiens maritime område i tre hovedkategorier: Kina, en gigant; Indien, en gigant; og så den maritime forbindelse, i hele Sydøstasiens maritime områder. Tilføj indvirkningen af sådanne tre-i-én maritime og relatede forbindelser, til de fysisk-økonomiske relationer

til de amerikanske kontinenter mod øst, og til Mellemøstens underside og Afrika. Så kommer udviklingen af Kra-kanalens potens til syne som ikke alene et eminent muligt træk, men som en strategisk, politisk-økonomisk kraft for hele planeten.«

LaRouche bemærkede også, at den primære opposition til Kra-kanalen internt i Asien er Singapore, og at hovedkilden til modstand fra Singapore er helt igennem globale, britisk-imperiale, militærstrategiske interesser. Men, tilføjede han:

»Den blotte volumen af maritim handel mellem Asiens to store nationer [Kina og Indien], samt deres forbindelser gennem Sydasiens maritime områder, gør Kanalen til sandsynligvis at være det potentielt set mest fordelagtige, og også mest effektive, projekt for hele Stillehavsområdet og Det indiske Oceans område, samt for den samtidige udvikling af de store områder af planeten som helhed.«

Kina og Japan har lagt projektet for Kra-kanalen[1], der er en hovedforbindelse i den Maritime Silkevej, frem på bordet igen. Samtidig, som en del af Silkevejen for Afrika, har Kina engageret sig i Transaqua-projektet, det største infrastrukturprojekt, Afrika nogensinde har overvejet, som det rapporteres i *EIR*-magasinet fra 6. januar. Som Claudio Celani her skrev, så handler denne idé om »en vandvej, der vil være i stand til at genopfylde Tchad-søen og samtidig skabe en gigantinfrastruktur for transport, energi og landbrug i Centralafrika. Byggeriet af et sådant infrastrukturprojekt ville tilbyde jobs til millioner af afrikanere og lægge fundamentet for fremtidig udvikling.«[2]

Vidtrækkende, som det er, så er Verdenslandbroen blot en del af dette Nye Paradigme. Til dette hører også den nye, »økonomiske platform«, som udgøres udviklingen af det umiddelbare rum (dvs., Solsystemet). Det er fuldt ud opnåeligt, at, i den umiddelbare fremtid, vil nationer gå sammen om et rumprogram, hvis amerikanske komponent alene vil blive langt større end Kennedys Måneprogram. Og vi kan og må

have et succesfuldt, internationalt program for at producere stort set gratis energi til menneskeheden, på basis af kernefusion. Disse programmers nødvendige grundlag er et statsligt banksystem og en statslig kreditpolitik, der er målrettet herpå, og som må begynde med en genoplivelse af Franklin Rooseveltts beskyttelse gennem Glass/Steagall-bankopdelingsloven.

Lyndon LaRouches »Fire Nye Love« (til USA's, og verdens, omgående redning) er således den ene, enkeltsående forudsætning for USA's tilslutning til det Nye Paradigme.

Hele det overordnede design har ligeledes integrerede moralske og kulturelle dimensioner. Snarere end blot et forsøg på at beskrive dem, kan vi henvise læserne til Lyndon LaRouches »Manhattan-projekt«, som er disse dimensioners førende organisation i nutidens verden. Manhattan-projektets fejring af Martin Luther King sidste weekend legemliggør dette på den meste intense måde.

Der er ingen garanti for succes – meget langt fra. Kreativ, fri vilje – din skabende, frie vilje – kræves, hvis menneskeheden skal bevæge sig opad til dette næste trin, der vinker forude.

Vi slutter med Krafft Ehrickes ord fra 1966, som vi tidligere har citeret her i lederartiklen:

»Fødselstimen, det være sig for et nyt liv eller en ny æra, er sandhedens time, hvor vi udfordres af smerte, tvivl og frygt, og intensiteten af deres angreb forårsager de kompenserende kræfter af styrke, tillid og mod at rejse sig til sjældne toppunkter af intensitet og kraft. Verden synes at bryde sønder under smerten fra denne nådesløse konfrontation af det gamle og det nye.«

Vi kan vinde dette her.

Foto: USA's præsident Franklin D. Roosevelt, der i 1933 satte

Glass/Steagall-bankopdelingsloven i kraft, som indledte USA's udtræden af 'Den store Depression' og en udvikling, der ved slutningen af hans præsidentskab, ved hans død i 1945, havde gjort USA til den største fysisk-økonomiske magt, verden havde set.

Xi Jinping til FN i Genève: Intet er for vanskeligt

18. jan., 2017 – Præsident Xi Jinping holdt i dag en hovedtale i FN-bygningen i Genève efter et møde tidligere på dagen med dr. Margaret Chan, direktør for Verdenssundhedsorganisationen, og med chefen for den Internationale Olympiske Komite. Man afventer et udskrift.

Xis præsentation skitserede de højeste mål for verden af nationer, på en måde, der var rig på metaforer. Han sluttede med at fastslå sine fem, vigtige prioriteter.

Blandt de understregede ideer var nødvendigheden af at opgive krig og gå ind i en diplomatisk og politisk dialog for at løse problemer. Han fik spontan applaus, da han sagde, 'Selv den tykkeste is kan brydes'.

Da han sagde fra over for nejsigernes idé om, at visse problemer er for umedgørlige, og at et forsøg på at løse dem blot medfører ballade, sagde han, at kinesernes overbevisning er den, at »man skal ikke opgive at spise, fordi man tror, man måske får maden galt i halsen ... «

I en smuk behandling af verdens forskellige kulturer og religioner, citerede han igen et gammelt, kinesisk ord, der siger, 'den rigeste suppe er lavet af det højeste indhold af

forskellige ingredienser' ...

Før Xi afsluttede med sine fem punkter, udtrykte han sin egen metafor for at fokusere på, hvordan man skal tænke på økosystemet, når der med sikkerhed vil opstå problemer, selvfølgelig, med forurening og andre lignende ting i takt med, at menneskeheden gør fremskridt med nye teknologier. Xi sagde, at han husker, da han fik sin første schweizerkniv, og hvordan den kunne gøre så mange forunderlige ting. Han sagde, »Ville det ikke være vidunderligt, hvis vi havde en schweizerkniv, og når der opstår et problem, så tager vi bare kniven frem og fikser det ...«

Xi blev varmt introduceret af FN's generalsekretær Antonio Guterres og af generalforsamlingspræsident Peter Thomson.

**Kinesisk medie rapporterer,
at »Bælt-og-Vej«
får støtte fra
indflydelsesrig tysk**

politiker, Helga Zepp-LaRouche, på seminar i Stockholm

17. jan., 2017 – *China Radio Internationals* engelske webside, CRIEnglish.com, rapporterer i dag, at »Kinas Bælt-og-Vej-initiativ har fået støtte fra en indflydelsesrig, tysk, politisk aktivist, Helga Zepp-LaRouche, medstifter af Internationale Schiller Institut, sagde, at Bælt-og-Vej-initiativet ikke alene var en god idé, men også meget praktisk. Gennem at bygge infrastruktur, sagde hun, forbedres folks levestandard og fattigdomlettes, gennem et fokus på udvikling.

»Zepp-LaRouche talte på et indflydelsesrigt seminar (11. jan.) i den svenske hovedstad Stockholm, med deltagelse af henved 100 personer, de fleste af dem honoratiores fra diverse ambassader i byen.

'Geopolitik har været årsag til de to verdenskrige, og jeg mener, vi må gå over til menneskehedens fælles mål; jeg mener, det absolut er den substantielle udfordring for os at løse. Og jeg mener, at det kinesiske tilbud om at få en win-win-situation for alle lande i verden er det eneste, praktiske initiativ på bordet'«, sagde LaRouche.

»Det kinesiske forslag om Bælt-og-Vej-initiativet bringer henved 60 lande sammen i Asien, Europa, Mellemøsten og Afrika, for at fremme handel og samarbejde. Det blev først fremlagt som forslag af den kinesiske præsident Xi Jinping i 2013 og består af to hovedgrene – det Økonomiske Silkevejsbælte, og det 21. Århundredes Maritime Silkevej.«

»Helga Zepp-LaRouche optrådte på seminaret som medforfatter af en ny bog, *Fra Silkevejen til Verdenslandbroen* [sic], der er blevet oversat til kinesisk, arabisk og flere andre sprog. I

denne bog udtrykker hun sin stærke overbevisning om, at strategien med Bælt-og-Vej er et godt paradigme, der vil erstatte geopolitik.«

»Jeg mener, at det er en udvikling i den rigtige retning, for i begyndelsen tænkte folk, at det er enten Kina eller Rusland, eller Centralasien; enten nord eller syd, øst eller vest, men i mellemtiden har det strategiske partnerskab mellem Rusland og Kina løst dette problem.«

»LaRouche mener, at kun gennem udvikling kan krige og konflikter undgås, som hun føler, er de største fjender af udvikling og byggeri af infrastruktur, der i sig selv er befordrende for udvikling og forbedring af menneskers liv. Medforfatter Hussein Askary sagde, at deres bog havde til formål at udarbejde nogle meget praktiske planer, for eksempel, hvordan Irak kunne finde sin plads i ideen om Bælt-og-Vej.«

»Man behøver ikke at sende penge til Irak eller selv Afrika, for disse lande har resurser; det, som disse lande behøver, er teknologi. Og det er, hvad Kina stiller til rådighed. Kina leverer teknologi og spørger ikke, om man har penge eller ej, for, når ens naboer bliver rigere, vil man selv drage fordel af det, man skaber et marked, man skaber ny teknologi og innovationer.«

»Helga LaRouche forsatte med at sige, at hun mener, at Kina vil blive en virkelig model for relationer landene imellem, gennem samarbejdende udvikling.«

Artiklen ledsages af to fotos, der viser Zepp-LaRouche tale ved arrangementet, samt dias-billedet, der viser »Bælt-og-Vej-initiativet og LaRouche-planer.«

Xi Jinping på Davos Økonomiske Verdensforum placerer udvikling i centrum for global styrelse

17. jan., 2017 – I en vidtrækkende tale, der åbnede Davos Økonomiske Verdensforum i Schweiz, fremsatte den kinesiske præsident Xi Jinping krav om en reform af det globale styrelsessystem med noget, man kunne karakterisere som »globalisering på kinesisk«. Med en advarsel om faren ved at trække sig tilbage til en defensiv protektionisme, stillet over for de finansielle storme, sagde han, at det ville være ligesom at smække sig inde i et mørkt værelse, hvor man ganske vist er beskyttet mod regnen udenfor, men også vil mangle lys og frisk luft at indånde.

Samtidig fordømte han det nuværende, globale systems nederlag, den voksende ulighed, voksende fattigdom og arbejdsløshed. Og dog, »menneskets historie fortæller os«, sagde Xi, »at man ikke bør frygte problemer, men at de må konfronteres. Vi må møde udfordringerne og udstikke den rette kurs for økonomisk globalisering ... Hvis man er ræd for stormen og for at udforske en ny verden, vil man før eller siden drukne i havet.« Med henvisning til Kinas egen erfaring sagde han, »Vi har haft vores andel af at kvæles i vandet, og vores andel af malstrømme«, men »den globale økonomi er et stort hav, og man kan ikke undfly det, og heller ikke trække sig tilbage fra det«. Xi advarede også mod en handelskrig og sagde, at »ingen vil blive vinder i en handelskrig«.

Om den globale finanskrisen sagde Xi, at dette ikke var

forårsaget af »globalisering«, men snarere af, at »finanskapitalen ud tog overdrevne profitter og af, at finansiel lovgivning ikke har håndteret dette«. Alt imens globalisering har skabt betydelige problemer, så har mekanismerne for at løse disse problemer svigtet.

»Utilstrækkelig global styrelse gør det vanskeligt at håndtere disse problemer«, sagde Xi. »Der er et rungende krav fra det internationale samfund om en reform af det globale styrelsessystem, og som nu er en presserende opgave«, sagde Xi. »Og alle lande er ligeværdige medlemmer af det internationale samfund og fortjener at høres«. Desuden, forsatte han, »må globale konnektivitet udvikles for at alle kan opnå velstand«. I centrum for denne »globalisering« er udvikling, og udvikling er baseret på udviklingen af videnskab og teknologi, sagde Xi. »Dette er et produkt af os alle sammen, og ikke produktet af et enkelt individ«, sagde Xi. Med et citat af Lincoln, (og også Sun Yat-sen, uden at nævne nogen af dem), sagde Xi, »Udvikling er af folket, ved folket og for folket«.

Verdenssamfundet må udvikle en »dynamisk innovationsdrevet model«, sagde han. Kun gennem innovation og reform kan vi håndtere den sløve økonomi. For det andet, »bør vi udvikle en åben og indbyrdes forbundet fremgangsmåde for en udvikling af et åbent, win-win-samarbejde«. Og for det tredje, »er det afgørende at have en sund udviklingsfilosofi og model«, som er »afbalanceret, retfærdig og inkluderende«. »Nedbringelse af fattigdom, arbejdsløshed og uretfærdighed bør prioriteres«, sagde Xi.

Xi forsikrede sine tilhørere om, at Kina ville holde kursen, opretholde en solid vækstrate, fortsætte med sin strukturelle reform og åbenhed mod omverdenen, samt spille en større rolle i at dele sin vækst med andre. Xi pegede på G20-topmødet i Hanzhou, der placerede innovation i centrum for økonomisk udvikling, og på Bælt-og-Vej-initiativet, som vil afholde et stort topmøde i maj måned i Kina. »Hvis vi fortsætter med at

bygge et fællesskab for en fælles fremtid for menneskeheden«, sagde Xi, »kan vi skabe en bedre verden«.

Xi Jinping i Davos: Vær ikke bange for at udforske en ny verden

Leder fra LaRouchePAC, 17. januar, 2017 – Med verdens blik rettet mod ham, holdt den kinesiske præsident Xi Jinping hovedtalen for Davos Verdensøkonomiske Forum den 17. januar, hvor han fremlagde det, hans Udenrigsministerium beskrev som »en gennemarbejdet plan for det menneskelige samfunds fremtidige fremskridt«.

Xi sagde, at den globale finansielle krise var forårsaget af, at »finanskapitalen udtag overdrevne profitter og af, at finansiel lovgivning ikke har håndteret dette«, og at der er voksende internationale krav om fundamentale reformer. Han præsenterede Kinas Bælt-og-Vej-initiativ som et åbent tilbud til alle nationer, fordi »udvikling er af folket, ved folket og for folket« og er baseret på voksende produktivitet baseret på udviklingen af videnskab og teknologi. Og han understregede, at menneskets historie »fortæller os, at man ikke skal frygte problemer, men at de må konfronteres ... Hvis man er ræd for stormen og for at udforske en ny verden, vil man før eller siden drukne i havet«.

Den totale intellektuelle og moralske bankerot af det gamle, døende paradigme reflekteredes godt af en forvirret establishment-deltager i Davos, Moises Naim fra Carnegie Institut, der blot kunne sprutte: »Der er enighed om, at der foregår noget enormt, på globalt plan og på mange måder uden

fortilfælde. Men vi ved ikke, hvad årsagerne er, eller hvordan man skal håndtere det.«

Men dét ved Xi Jinping og Vladimir Putin, og dét ved ligeledes Lyndon LaRouche og de amerikanere, der er kloge nok til at lade sig lede af hans videnskabelige og strategiske tænkning. Inkluderer dette mon den næste præsident i USA, Donald Trump?

Som Putin sagde ved en pressekonference i Moskva, mens Xi endnu talte i Davos: »Jeg kender ikke hr. Trump ... Jeg ved ikke, hvad vil gøre på den internationale arena, så jeg har intet belæg for hverken at angribe ham, kritisere ham eller forsvere ham.« Det, der står klart, fortsatte han, er, at der foregår »et 'Maidan' i Washington for, at Trump ikke skal indtage embedet ... [og] at binde den nyvalgte præsident på hænder og fødder, med hensyn til implementeringen af hans løfter forud for valgkampagnen til det amerikanske folk og det internationale samfund«. Med hensyn til dem, der lakkede det løgnagtige dossier, så »er de værre end prostituerede, de har ingen moralske grænser«, udalte Putin med eftertryk.

Det, der står på spil, er epokegørende, som Helga Zepp-LaRouche understregede i en strategisk vurdering, der udgives i det kommende nummer af *EIR* (se hele artiklen på dansk: <http://schillerinstitut.dk/si/?p=17403>)

»Det uhørte hysteri hos de etablerede medier og de neokonservative på begge sider af Atlanten over Donald Trumps valgsejr giver stof til et førsteklasses lærestykke i den faktiske dynamik, der netop udfolder sig på den strategiske scene. Det demonstrerer med al mulig tydelighed og for selv den mest naive tilhænger af den politiske korrekthed, at det her ikke drejer sig om det ene partis interesser over for det andet parti. Det drejer sig om et døende imperiums metoder over for frembruddet af et nyt paradigme, hvis præcise indhold endnu ikke er entydigt defineret, men som i hvert fald er et nej til globaliseringen ...«

Dette imperium er ikke det samme som nationerne USA eller Storbritannien; det er de oligarkiske kræfter, der får opfyldt deres krav om magten fra det neoliberal, transatlantiske finanssystem og det militære forsvar af den unipolare verdensorden, og som er fuldstændigt ligeglade med de undersåters ve og vel, der tilfældigvis også bor i deres stater. Det er mod dette imperium, at der er en global revolution i gang, og som er kommet til udtryk i både Brexit, i Trumps valgsejr og i nejet til Renzis folkeafstemning i Italien ...

Imens vokser det nye paradigme frem i form af en ny, økonomisk verdensorden, hvor BRIKS-staterne og Kinas politik med Den nye Silkevej tilbyder et win-win-samarbejde til alle verdens nationer, hvor alle kun kan vinde gennem gensidig fordel. Såfremt det lykkes for Trump at samarbejde med denne nye kombination, hvilket man først vil få at se, når han er indsat i embedet, kunne en ny æra for menneskeheden begynde, hvor suveræne nationer samarbejder om et skæbnefællesskab for menneskehedens fremtid, og hvor imperiets æra (endelig) bliver lagt i graven.«

Med Trump, der ser den nye internationale virkelighed, er Obama og EU rasende

Leder fra LaRouchePAC, 16. januar, 2017 – Nyvalgte præsident Trumps seneste og mest substantielle interview gør det ganske klart, hvad det nye paradigme for verden er, i den umiddelbare fremtid. Trump prioriterer en aftale om reduktion af atomvåben og sandsynlige reduktion af sanktioner mod Vladimir Putins

Rusland. Han erklærer, at NATO er »forældet«, og at dets europæiske medlemmer hverken støtter dets militær eller bekæmper jihadistisk terrorisme. Han forudsagde, at Den europæiske Union sandsynligvis vil opløses, og at dette vil være en god ting.

Til trods for de hysteriske udbrud, som dette interview med Londonavisen *Times* og det tyske *Bild Zeitung* har frembragt fra den europæiske elite og Obamas ambassadører dér, så ser Donald Trump ganske enkelt den nye virkelighed – det nye paradigme – og indikerer, at han *muligvis* vil være med til at skabe den.

Putins Rusland er ansvarlig for muligheden af at afslutte 15 års uafbrudte krige i Mellemøsten og Nordafrika, og for et nyt sikkerhedskoncept, som han deler med Xi Jinpings Kina, og som kan brække ryggen af international terrorisme. I morgen vil Xi holde hovedtalen på Davos Verdensøkonomiske Forum. Han er ansvarlig for at være drivkraft bag en meget stor andel af den økonomiske og produktive vækst i verden, og for at tilbyde »et fællesskab af en fælles bestemmelse« gennem den Nye Silkevejsinfrastruktur, gennem at lede forskning og udvikling af fusion, og gennem at lede udforskning af Månen.

Et USA, der er blevet af med Nobels Krigspris-præsident Obama, tilbydes at tilslutte sig dette nye paradigmes institutioner og handlinger.

Frygt for og had til denne udsigt er kilden bag den intense kampagne for anti-russisk, anti-Trump propaganda i USA, der dirigeres fra britisk efterretning, men rækker dybt ind i en »få Trump ned med nakken-specialenhed« i efterretningstjenester under Obama. Denne kampagne er forgæves og destruktiv, og amerikanske »progressive« bør ikke lade sig forlede til at tilslutte sig den.

Som *EIR's* stiftende redaktør Lyndon LaRouche udtrykte det, »Som Trump i øjeblikket går frem, vil der komme en stor forandring internationalt. Det er ikke kun Trump. Det er de

andre elementer i systemet, der kommer sammen for at bringe en kraft i spil, som vil dominere planeten.«

Vil den amerikanske befolkning, der har stemt for at afvise det gamle paradigme med »globalisering, afindustrialisering«, få den nye administration og Kongressen til at gøre det, der er nødvendigt for at tilslutte sig den nye drivkraft for vækst og videnskabeligt fremskridt?

En bevægelse fra en national, upartisk appell er i gang – og er på denne webside – som kræver, at Trump, der lovede »det 21. århundredes Glass/Steagall-lov« under sin valgkamp, foreslår dette for Kongressen i sin første tale til dem. At gøre en ende på Wall Street-kasinoets forgiftning af den amerikanske økonomi er et første skridt. Men så findes der ingen statslig kreditinstitution efter Hamilton-princippet, til at genskabe Amerikas forældede, økonomiske infrastruktur – selv, når Kinas statsmidler, som det her rapporteres, netop søger at få en sådan institution, som gør det muligt for dem at investere i en ny, amerikansk infrastruktur. Obama sagde til vælgerne, at han anså revolutionen med fusionskraft/plasmateknologi for totalt unødvendig, og privatiserede NASA's store udforskningsprogrammer, med en forværrende virkning.

Tiden er nu inde til, at amerikanerne handler for deres fremtid, ikke deres frygt.

Kinas permanente repræsentant til FN

om menneskehedens fælles mål og Xis 'Win-Win'

14. jan., 2017 – Forud for præsident Xi Jinpings besøg i Schweiz og deltagelse i Davos-mødet, skrev Kinas permanente repræsentant til FN i Genève, Ma Zhaoxu, i dag en kronik i *Peoples Daily* om Xis hensigter ved begivenheden.

»Den internationale orden og ditto mønster oplever dybtgående forandringer«, skrev Ma, »som et resultat af verdensøkonomiens langsomme genrejsning, den hastige udvikling af anti-globalisering, intensiv geopolitik og voksende terrorisme. En række 'sort svane'-begivenheder har forbløffet planeten. Verden har mistet orienteringen gennem en mangel på effektivt lederskab og styrelse som følge heraf. Mod et sådant bagtæppe har det internationale samfund nu desperat behov for en løsning.«

Ma refererede til Xi Jinpings tale i FN i 2015 om »et samfund af menneskehedens fælles bestemmelse«. Han sagde, at Xis ideer »stammer fra den dybe visdom i den kinesiske kultur, der ligeledes er i overensstemmelse med kinesiske, diplomatiske traditioner, såsom de Fem Principper for Fredelig Sameksistens ... Ideen om et samfund for hele menneskehedens fælles bestemmelse vil udvide sin indflydelse med Kinas dybtgående deltagelse i global styrelse.«

Ma afsluttede med konceptet om Silkevejen: »Den gradvise forbindelse mellem Kinas 'Bælt-og-Vej'-initiativ og andre landes strategier langs med ruten har forbundet den kinesiske drøm med hele verdens drøm. Idet det følger princippet om at opnå fælles vækst gennem drøftelse og samarbejde, vil Kina indskyde ny kraft og nyt håb til den økonomiske udvikling af det eurasiske kontinent, og endda af verden som helhed.«

Foto: Kinas permanente repræsentant til FN i Genève, Ma

Kina vil dramatisk forøge investeringer i Nigerias økonomi

12. jan., 2017 – Efter et møde i Abuja med Nigerias udenrigsminister, lovede den kinesiske udenrigsminister Wang Yi i går yderligere investeringer til \$40 mia. i Nigeria, som kommer oven i de \$45 mia., Kina allerede investerer i Afrikas mest folkerige land. Wang understregede også, at de to nationer var strategiske partnere.

»I Kina har vi allerede finansieret for i alt \$22 mia. projekter i Nigeria«, sagde Wang, »og for \$23 mia. projekter er i gang. Vi er også i færd med at følge op på for yderligere \$40 mia. investeringer i en olieledning«, meddelte han, rapporterer *Daily Trust of Nigeria*. Kina er også involveret i det afgørende, regionale Transaqua-projekt. I december blev et forståelsesmemorandum underskrevet i Nigeria – som er leder af de fem lande, der er mest berørt af vandkrisen i dette område – med PowerChina, der vil betale for en foreløbig undersøgelse af muligheden for projektets gennemførelse.

Minister Wangs nigerianske modpart, Geoffrey Onyeana, genoptog de foregående møder om økonomisk samarbejde med kinesiske regeringsfolk og understregede Nigerias mangeårige og fortsatte økonomiske bånd til Kina. Han sagde, at »inden for infrastrukturområdet, som er et af den føderale regerings prioriteter mht. et program for diversifikation [fra olie], har den kinesiske regering vist en masse samarbejde med os i dette felt, og har hjulpet os inden for transportområdet –

især projekter for jernbaner og lufthavne».

Nigeria lovede også at lukke et handelskontor, som Taiwan har i landet, som en demonstration af standhaftig tilslutning til politikken med Ét Kina.

Briterne apoplektiske ved tanken om, at USA kunne tilslutte sig Menneskehedens fælles skæbne sammen med Kina og Rusland

*Leder fra LaRouchePAC, 15. januar, 2017 – I dag ankom den kinesiske præsident Xi Jinping i Schweiz, til både et statsbesøg i denne nation, og for at holde hovedtalen i Davos Økonomiske Verdensforum den 17. jan. Der ligger en særlig ironi i Xis meget ventede tale for denne organisation: Davos er måske *det emblematiske, internationale forum for den døende imperieorden*, der hastigt er i færd med at blive erstattet af det Nye Paradigme, under Xis og den russiske præsident Vladimir Putins lederskab.*

En artikel i *Xinhua* i dag gav forskud på nogle af de centrale temaer, som Xi forventes at adressere, mht. indholdet af denne nye orden »Et fællesskab af en fælles bestemmelse, et fælles hjem for menneskeheden. Siden Xi for første gang fremlagde dette koncept i slutningen af 2012, har det formet Kinas tilgang til global styrelse«, skrev *Xinhua*. Bælt-og-Vej-initiativet, konceptet med win-win-samarbejde og et »nyt sikkerhedskoncept« for at skabe universel sikkerhed, er alle en del af Xis politik. *Xinhua* citerede Tanq Qifang, en forsker ved Kinas Institut for Internationale Studier, der forklarer: »Konceptet med et fællesskab for en fælles bestemmelse transcenderer alle former for forskelligheder i menneskelige samfund og har de størst mulige fordele for alle som sit mål.«

Med alt at tage er Det britiske Imperium intet mindre end

apoplektiske over den amerikanske, nyvalgte præsident Donald Trumps udtalelser om, at han har til hensigt at normalisere relationerne med både Kina og Rusland, som han efter gjorde det klart i et interview med *Wall Street Journal* den 13. jan. Briterne afslører sig selv voldsomt, i deres forsøg på at invalidere Trump og torpedere enhver forsoning med Rusland i særdeleshed. Som Londonavisen *Guardian* indrømmede, så »frygter briterne, at en mere intens relation mellem USA og Rusland under Trump kan risikere at efterlade Storbritannien ude i kulden«.

I dag kommenterede Lyndon Larouche, at »som han [Trump] i øjeblikket går frem, vil der komme en stor international forandring. Det er ikke Trump alene. Det er de andre elementer i systemet, der kommer sammen for at bringe en kraft i spil, som vil dominere planeten. Ikke, fordi de bruger knytnæver, men fordi de bruger hjerner. Jeg har altid foretrukket hjerner frem for knytnæver«, bemærkede han.

Helga Zepp-LaRouche forklarede, at det, som briterne »forsøger imod Trump, er en 'farvet revolution'. Trump udsættes for tiden for en kampagne med løgne og »falske nyheder«, i lighed med det, briterne i årtier hemmeligt har orkestreret imod Lyndon LaRouche, som deres dødelige fjende. Der er ét enkelt slag, der kan leveres for at gøre en ende på denne farvede revolution, erklærede Zepp-LaRouche: Indiker, at det, man gjorde mod Lyndon LaRouche, var den største uretfærdighed, for hvilken USA har betalt en høj pris i årtier, og implementer omgående LaRouches Fire Love, begyndende med en tilbagevenden til FDR's Glass-Steagall.

Hun fortsatte: Det er, fordi i hele verden, på højeste regeringsniveau, som vi har fået direkte og indirekte at vide, »Lyndon LaRouche anses for at være den eneste amerikaner, de kan stole på – simpelt hen fordi, han har bevist, at han er en verdensborger såvel som en amerikansk patriot. Han har altid befundet sig på dette niveau, som Xi Jinping nu taler om«, med et fællesskab af en fælles bestemmelse for hele menneskeheden,

erklærede Zepp-LaRouche.

Helga Zepp-LaRouche: Donald Trump and the New International Paradigm

HUSSEIN ASKARY: Thank you very much everybody for attending the seminar, "Donald Trump and the New International Paradigm." Your Excellencies, and ladies and gentlemen, we are very, very pleased that we have a special guest. It's all clear that the interest for this theme is very big, and this is a very special; there are many expectations on the new administration and new policy, but there are also many challenges around the world. And we have the honor of having Mrs. Helga Zepp-LaRouche, the founder and chairwoman of the International Schiller Institute, who has not only followed at very close range, followed developments internationally, both strategic, economic and cultural, but she herself and her

association were actually contributing to what we call this new paradigm in international politics. But this new paradigm in international politics of course, we will hear from Mrs. Helga Zepp-LaRouche.

We will have Mrs. Helga Zepp-LaRouche's presentation and then I will make a short presentation and then we'll have a break.... [applause]

HELGA ZEPP-LAROUCHE: Good day, ladies and gentlemen. We are in indeed in very, very fascinating times. And I think there is much reason to be hopeful. I know that for the last 16 years, most people in the United States and Europe thought there is no great future. But I think that there is [annulation? 2.29] of strategic realignments which have shaped up over the last three years, but especially in the last year, where one can actually see the potential for a completely new kind of relation among nations is on the horizon and that we may actually have the chance to bring a peaceful world.

Now, obviously, in the system of globalization as we have known it, especially since the collapse of the Soviet Union, that system is completely unhinged and this is cause for a lot of freaked out reactions by those people who were the beneficiaries of that system of globalization, but I will hopefully be able to develop that this is a temporary phenomenon, and it will be replaced by some more optimistic developments.

What we see right now is a completely new paradigm emerging, a system which is based on the development of all, a "win-win" potential to cooperate among nations and obviously the idea for what was the axiomatic basis of the globalization system since '91 to insist on a unipolar world, is failing, or has failed already. And with that, a system which tried to maintain this unipolar world with the policy of regime change, of color revolution, or humanitarian intervention, or so-called humanitarian intervention to defend democracy and human

rights, which obviously has led the world to a terrible condition, but this is now coming to an end.

So obviously, the statement by Francis Fukuyama at the end of the Soviet Union that this was the "end of history" and that there would be now only democracy, was really pretty sure; because you have a complete backlash right now, which takes

different forms in different in different parts of the world against this system of globalization, and in the Asian countries it takes the form of more and more countries joining with the New Silk Road perspective offered by China, the offer to work

together in a "win-win" cooperation with the Belt and Road Initiative which is now already involving more than 100 nations and international organizations; and is already engaged in the largest infrastructure project in the history of mankind.

This new paradigm economic system, already involves 4.4 billion people; it is already in terms of spending, in terms of buying power in today's dollars, 12 times as big as the Marshall Plan was after the Second World War, and is open for every

country to join, including Sweden, including the United States, including every other country on the planet. And I will talk about that in a little while.

And in the trans-Atlantic sector you have a different kind of anti-globalization revolt, which is still ongoing, it's not yet settled how this will turn out. It started in a visible form with the vote of the British population in June last year with the Brexit, which was the first real upset; everybody was totally unexpecting it, except a few insiders. This anti-globalization revolt was obviously continued with the election of President Donald Trump in the United States; it was continued with the "no" to the Italian referendum organized by Prime Minister Matteo Renzi, to change the Constitution. And it's coming to all of these developments, Brexit, Trump, no to the referendum in Italy, is that is

caused by a fundamental feeling of injustice of ever larger parts of the population which were victims of that system, which increasingly made the rich richer, made more billionaires richer, but destroying successively the middle range of society, and making the poor poorer. It is my deepest conviction that

that revolt will continue until the causes of this injustice are removed, and it will continue, it will hold the measuring rod to President Trump, if he will fulfill his election promises; and if he would not do that I believe the same people would turn against Trump as they turned against Hillary.

So that means that the future of the European Union and the euro is very doubtful. We have elections coming in this year in France in April. This election as of now is completely up in the air. There is no firm prediction possible. You have a very tumultuous situation in Italy, where a coup was just attempted by Beppe Grillo and Verhofstadt [in the European Parliament] which failed, trying to get the Five Star Party into the Liberal Group [ALDE] in the European Parliament, which was rejected by the Liberal Group so it didn't function. Then you will have elections in Holland, and in September in Germany which, you know, the star of Mrs. Merkel is also no longer as shiny as it may have been a while ago.

So we are looking into dramatic changes.

Now, let me start with the Trump election. Now, I have in my whole political life, which is now becoming quite long, several decades – I have never in my whole political life, seen such hysteria on the side of the neo-cons, on the side of the

mainstream politicians, on the side of the liberal media, as concerning Trump. Now, admittedly, Trump does not fulfill the behavior code of Baron von Kligel, who was a German in the 18th century who developed the code for good diplomatic behavior.

But what was caused Trump, is that he simply promised end the political paradigm which was the basis of eight years of George W. Bush and eight years of Barack Obama, which was a direct continuation of the Bush-Cheney policy.

And it was a good thing, because it was very clear that if Hillary Clinton would have won the election in the United States, that all the policies she was pursuing, including an no-fly zone over Syria, and an extremely bellicose policy towards Russia and China, would have meant that we would have been on the direct course to World War III. If you have any doubts about that I'm perfectly happy to answer questions about that, in the question & answer period.

So the fact that Hillary did not win the election was extremely important for the maintenance of world peace. And I think that of all the promises that Trump made so far, the fact that he said, and by the appointment of these different cabinet members, if they all get through the nomination process in the Senate, that he will normalize the relationship between the United States and Russia, is, in my view *the most important step*. Because if the relationship between the United States and Russia is decent, and is based on trust and cooperation, I think there is a basis to solve all other problems in the world. And if that relationship would be in an adversary condition, world peace is in extreme danger.

So from my standpoint, there is reason to believe that this will happen. The Russian reaction has been very moderately, but optimistic that this may happen. If you look at the appointments, you have several cabinet members and other people in other high posts who are also for improving the relationship with Russia, such as Tillerson who is supposed to become Secretary of State; General Flynn, who is a conservative military man but also for normalization with Russia, and many others, so I think this is a good sign.

Now, if you look at the reaction of the neo-con/neoliberal faction on both sides of the Atlantic to this election of Trump, you can only describe it as *completely hysterical*. The *Washington Post* today has an article "How To Remove Trump

from

Office," calling him a liar, just every derogative you can possibly imagine, just an all-in-one unbelievable; the reaction in Germany was – von der Leyen, the Defense Minister, in the morning after the election said she was "deeply shocked," this was "terrible," this was a catastrophe, and it keeps going like that. So they have not recovered.

And then naturally, you have the reports by the different U.S. intelligence services, Clapper, Brennan, Comey from the FBI, they all put out the fact that that it was Russian hacking of the emails of the DNC and Podesta which would have stolen the election, because they would have shifted the view of the Americans to vote for Trump.

Now, I think this is ridiculous. Not only have many cyber experts, also in Europe but also in the United States, already said that all the signs are that it was not a hacking but an insider leak giving this information out, is more and more likely, and there's absolutely zero proof that it was Russian hacking. Naturally, what is being covered up with this story is that was the "hacking" about? It was "hacking" of emails that proved that Hillary Clinton manipulated the election against Bernie Sanders! That is not being talked about any more; but if there was any thought, I would say, look there, and there are many people who recognize, for example, a very important French intelligence person with the name of Eric Denécé who is a top-level think tanker in France who said: Well, it is quite clear why they put out this story, because the neo-cons had to expect the great cleanup and many of them would lose their positions, and this is why they basically all agreed on this story and changed the narrative.

The real narrative is that it was the injustice of the neoliberal system of globalization which simply violated the interests of the majority of the people, especially in the "rust belt." Hillary Clinton in the election campaign was so arrogant that she didn't even go to Ohio or some of the other states which are formerly industrialized. Where, you have to see that the United States, contrary to what mostly is

reported in the Western media in Europe, the United States is in a state of economic collapse. They have for the first time, a shrinking life-expectancy; there is one indicator which shows if a society is doing good or bad, and that is if the life-expectancy increases or shrinks. In the United States it's shrinking for the first time for both men and women. In the period of 16 years of Bush-Cheney and Obama, which you can take as one package, the suicide rate has quadrupled in all age brackets; the reasons being alcoholism, drug addiction, hopelessness, depression because of unemployment. There are about 94 million Americans who are of working age who are not even counted in the statistics, because they have given up all hope of ever finding a job again. If you have recently travelled in the United States, the United States is really in a terrible condition; the infrastructure is in a horrible condition, and people are just not happy.

So the vote, therefore, the narrative, that was the reason why Hillary was voted out because she was being perceived as the direct continuation of these 16 years, and so the attempt to change that narrative by saying it was "Russian hacking" is pretty obvious.

Now, however, we have now I think ten days or nine days left, until the new President comes in. And this is not a period of relaxation, because again, in an unprecedented way, the old team of Obama is trying to create conditions for the incoming President Trump to force him to continue on the pathway of Obama. For example, just a couple of days ago, they started a deployment of a U.S. and NATO troops to be deployed at the Russian border in the Baltics, in Poland, and Romania, through the German city of Bremerhaven, where 6,000 troops landed with heavy military equipment; for example, the U.S. Abrams tanks, Paladin artillery, Bradley fighting vehicles, 2,800 pieces of military hardware, 50 Black Hawk helicopters, involving 1,800 personnel; 400 troops to be attached to the 24 Apache helicopters.

Now, obviously, the deployment of this is supposed to

be a provocation against Russia and it's supposed to make it very difficult for Trump to start to improve relations.

A second area where you can see this effort to pin Trump down is the question of the THAAD missiles in Korea, where basically now North Korea has claimed to be able to be able to launch their ICBM anywhere, any time; and according to Chinese experts, the United States is entirely to blame why North Korea is behaving this way.

South Korea with the outgoing President Park Geun-hye, who may be impeached soon, actually in days or weeks, she agreed to have a special brigade of 1,000-2,000 task force which is supposed to eliminate the Pyongyang command under conditions of war, including Kim Jong-un; and obviously this is aggravating the situation because given the history of such things, one is not sure when is the moment of such action.

Thirdly you can see it with the deployment of the U.S. aircraft carrier group *USS Carl Vinson* to the Asia, in the vicinity of China. This aircraft carrier is of the Nimitz-class nuclear-powered, and it will arrive exactly on 20th of January, the day Trump is will take office. *Global Times*, the official Chinese newspaper, said that this deployment is set to disrupt potential talks between China and other countries in the region; naturally, also it's supposed to put a sour note on the U.S.-China relations.

There are other efforts to change and determine the narrative in the post-Obama period. Ash Carter, the U.S. Secretary of Defense, just gave a press conference where he said that it was only the United States which was fighting ISIS in Syria. Now, that takes some nerve to say that, because everybody in the whole world knows that without President Putin's decision to militarily intervene in Syria starting in September 2015, and with the tremendous support of the Russian Aerospace Forces for the fighting of the Syrian troops, this military situation in Syria would have never developed. And it was to the contrary, the very dubious behavior of the United States supporting various kinds of terrorist groups which prolonged this process and slowed it

down.

But also in the attempt to pin down the narrative, of course, John Kerry, who a week or so ago, gave a speech saying that it was the British Parliament which would have prevented the U.S. military intervention in Syria. Now – I mean, all of these

people must think that the whole world has a very short memory, because I remember very vividly that it was Gen. Michael Flynn, in his capacity as head of the DIA, [Defense Intelligence Agency], who had put out a public statement that it was the

intention of the Obama administration to build up a caliphate in the region, in order to have regime-change against Assad, and he was then fired by [DNI] Clapper. And it is of a certain irony that just on Friday, when Trump met with Clapper, Brennan and

Comey, in the Trump Tower where these three gentlemen wanted to impress Trump with their story about the Russian hacking; the other person who was with Trump was General Flynn, who is now in the driver's seat [to be National Security Advisor]. So anyway, you can expect the truth not be suppressed forever. And as a matter of fact, it was in the moment shortly before the U.S. military intervention in 2013, the U.S. military action was prepared to occur Sunday evening; we had gotten that from

well-informed circles in Washington, and then in the very last minute the chairman of the Joint Chiefs of Staff, Gen. Martin Dempsey went to Obama and said, "You should not start a war where you don't know how it ends. And if you don't ask the Congress you will be impeached, or you run the risk of being impeached." And only because of that Obama went to ask the U.S., Congress, the U.S. Congress voted no, and the U.S. military intervention was prevented.

So this was quite different. And you know this attempt to fix the narrative will not be successful.

Now, I cannot tell you what this Trump administration is going to be. I think I mentioned the one point, I'm pretty

confident about: I think we will see probably only by February or even into March who will be actually in his cabinet, who will get approved by the Senate. But there are other interesting elements, for example: Trump had promised in the election campaign to invest \$1 trillion into the renewal of the

infrastructure in the United States. That is very good, as I said, because the United States urgently needs repair. It will, however, only function if at the same time, another promise by Trump, namely, what he promised in October in North Carolina,

that he would implement the 21st Century Glass-Steagall Act, will also be carried out, because the trans-Atlantic financial system remains on the verge of bankruptcy. You could have a repetition of the 2008 financial crash at any moment; and *only* if you have a Glass-Steagall law in the tradition of Franklin D. Roosevelt,

what Roosevelt did in 1933 by separation of the banks, by getting rid of the criminal element of the banking system, and then replacing it by a credit policy in the tradition of Alexander Hamilton, can you remedy this situation. Otherwise, you cannot

finance \$1 trillion in infrastructure.

But one step in a positive direction is the fact that for example the former deputy foreign minister of China, and chairwoman of the Foreign Affairs committee of the National People's Congress, Mme. Fu Ying, made a speech in New York, about

six weeks ago, where she said that indeed the Trump infrastructure program can be a bridge to the New Silk Road program of China. And that is quite the case: Just yesterday, Trump met with Jack Ma who is the chief executive of Alibaba, a

Chinese e-commerce firm, and Jack Ma said that he can help Trump to create 1 million jobs in the United States by initiating a platform for U.S. small businessmen to sell to Chinese consumers over the next five years, and vice versa,

how the Chinese can invest in the United States. Trump afterwards said this was a great meeting, we will do great things together; and Jack Ma said that Trump was a very smart man and they got along very well.

So this is very good, because the Schiller Institute already in 2015 published a report for the United States to join the New Silk Road, which is a whole approach how you have to have a fast train system for the United States; as you know, China built as of the end of 2014, 20.000 km high-speed train systems. China wants to have to 50,000 km by 2020, connecting every major city in China with a fast train system. And the United States has none.

So the United States urgently needs a fast train system connecting the East Coast, the West Coast and the Midwest. Build some new science cities in the South, get rid of the drought in the Southwest, California and the other states. So there are

many, many things which urgently need to be done.

OK. Now, let me make a few remarks about the Schiller Institute, given the fact that many of you may not know much about us. And I want to underline the fact that we are not commentators on this whole question, but that we are responsible for many of the ideas which are now coming into effect.

The Schiller Institute was created by me in 1984, and it was, at that time we had the still the intermediate-range missile crisis, which brought the world to the verge of World War III; if you remember, the Pershing 2, the SS20, where there was a very

short warning time, in permanent alert; and the relationship between Europe and the United States was really in a terrible condition.

So I created the Schiller Institute with the idea that you needed an institute, a think tank to put the relations among nations on a completely different basis. One of the most important aspects of the work was to work towards the establishment of a just, new world economic order, in the

tradition of the Non-Aligned Movement. And there, my husband, already in 1975, had proposed to replace the IMF with an International Development Bank, which would organize large credits for technology transfer from the industrialized countries to the developing sector, to overcome the underdevelopment.

That proposal went into the Colombo Resolution of the Non-Aligned Movement in 1976 in Sri Lanka. So we had the idea that that policy had to come back on the agenda, that we had to create economic development in the southern hemisphere, so that every human being on this planet could have dignified potential their lives, develop all the potentialities embedded in them.

But from the beginning, we said that such a new world economic order can only function if it's combined with a Classical Renaissance, that we have to reject the popular culture as it is associated with modern globalization, because it is

depraved and degenerate. And that we had to go back to the revival, a Renaissance of the best traditions of every culture and have a dialogue among them. For example, in Germany, obviously you would emphasize the German Classical culture of Schiller, Beethoven, the whole Classical music; in China, you would emphasize Confucius; in India you would emphasize the Vedic writings, Tagore, and so forth. So you would go and revive in every country simply what they have contributed to universal history and make that known.

Now, the present policy, of a "win-win cooperation", is exactly an echo of what we had proposed since '84, and to replace geopolitics with an approach of the common aims of mankind. In 1984, my husband, Mr. LaRouche, also uniquely predicted the collapse of the Soviet Union. He said if the Soviet Union would stick to their then-existing policies of the Ogarkov Plan, that they would collapse in five years. Now, there was nobody else who said the Soviet Union would collapse; it was completely unthinkable, but we observed the economic problems and on Oct. 12, 1988, my husband and I made

a press conference in Berlin, in the Bristol Kempinski Hotel, where we said Germany will soon be unified – also nobody believed that at the time – and Germany should adopt the development of *Poland* as a model for the transformation of the Comecon with high technology.

Now, in '89 therefore, when the Berlin Wall came down, we were the only ones who were not surprised. As a matter of fact, we immediately published a report, how the unified Germany should develop Poland, and we called this program, the "Productive Triangle Paris-Berlin-Vienna," which is an area the size of Japan; it had the highest concentration of industry and the idea was to develop development corridors from that Productive Triangle to Poland, Warsaw, to Kiev, to the Balkans, and transform the Comecon that way. It was before the D.D.R. collapsed; and here if that had been picked up, maybe the Soviet Union and the Comecon would not have collapsed.

Anyway: Because you had Bush, Thatcher and Mitterrand, they did not like this at all, so in '91, when the Soviet Union collapsed, we immediate proposed to prolong this program of the Productive Triangle into the Eurasian Land-Bridge: The idea that

you would connect the population and industrial centers of Europe with those of Asia, through development corridors. The Iron Curtain was no longer there, so it was the natural thing to have infrastructure corridors to develop the landlocked areas of Eurasia.

Now we proposed at the time to all the countries of Eurasia, and the only country which responded positively was China. So in 1996, they organized a very big conference in Beijing, called "The Development of the Regions along the Eurasian Land-Bridge," and I was one of the speakers there. And China at that point

declared the development of the Eurasian Land-Bridge to be the long-term perspective of China until the year 2010.

As you know, then came '97 the Asia crisis; '98 the

Russian GKO crisis, so this whole development became interrupted. But it basically did not stop us from making conferences about this proposal on five continents, all the U.S. cities, all the European cities; even in Latin America, São Paolo, Rio, New Delhi, even some African countries, Australia. We kept organizing for this idea that the natural next phase of the evolution of mankind would be the infrastructure connections of the entire planet.

Obviously, what happened in '99 also was the repeal of the Glass-Steagall Act in the United States, which gave way to the unregulated speculation, leading to the present bubble.

Now, in September 2013, when Xi Jinping in Kazakhstan announced the New Silk Road, we simply took all the different studies we had made in these 24 years, and published them, and we called it: "The New Silk Road Becomes the World Land-Bridge." This is a comprehensive proposal which has the yellow line there in the middle between China and Central Asia; this was the initial One Belt, One Road proposal by China, and we added simply – they had the Maritime Silk Road – but we had a whole infrastructure program for Africa, for the South of Europe, the Balkans, many corridors, including a Bering Strait Tunnel connecting the Eurasian infrastructure with the American system, with highways and high-speed trains all the way to Chile and Argentina. And eventually, when all of this is built, you can go by maglev train from the southern tip of South America to the Cape of Good Hope in Africa.

We published this proposal; and the actual book you can find at the book table, including an early report about this, from 1997. The first report we published in German, in '91. This is not just about connection of infrastructure, but it has all the scientific conceptions of Mr. LaRouche's notion of physical economy.

Mr. LaRouche is probably the only economist in the West who deserves that name, because all the other neo-liberal

economists have been so wrong in their predictions that they should probably take another job. Mr. LaRouche has given up his own scientific method and in this report you find there such extremely important

conceptions as the connection between energy flux density in the production process and the relative potential population density, which can be maintained with that energy flux density; and there are other such important conceptions.

So this report was immediately published in China; the Chinese translated it into Chinese. We presented it in China in 2015. It was recommended by all the people who presented to all Chinese scholars, as the standard text on the Silk Road; and it

has been sent to all major faculties and universities in China.

It was also published in Arabic, as you will hear about from Hussein Askary. And it is now coming out shortly in Korean, in German, and we have requests in other languages to come out also.

So, while we were publishing these reports, the New Silk Road promoted by China which has a few different names – first they called it One Belt, One Road; now they call it the Belt and Road Initiative; I always call it the "New Marshall Plan Silk

Road," so that people get an idea. In any case, this policy of China has taken on a breathtaking dynamic. (Next slide)

In the meantime, many of these proposals are in different phases of realization. It has the Maritime Silk Road which is the outer line. In the meantime, China is building six economic corridors – as I said, it involves 70 nations, and over 30 international large organization, 4.4 billion people, and trillions in investments. And as I said, already now it's 12 times bigger than the Marshall Plan was.

(Next slide). This is the original One Belt, One Road, connecting China and Central and West Asia through an economic corridor. In June 2015, China and the five Central Asian governments agreed to build that and additional routes

are being planned to go into Afghanistan. One is already going into Iran; when President Xi was in Iran last year, he promised, – or they both promised that they would extend this New Silk Road beyond Iran into Iraq, Afghanistan, Syria, Turkey.

(Next) This is the new Eurasian Land-Bridge which connects China with Western Europe and it has shortened already the transport time for cargo, to two to three weeks from China – different cities, Chengdu, Chongqing, Yiwu, Duisburg, Lyon, Rotterdam, Hamburg, from five weeks via ocean. Already by mid-2016, there were over 2,000 rail shipments from China to Europe, and it is picking up speed. All the cities in Europe that are termini, such as Madrid, Lyon, Duisburg, they're all happy; they realize that they have tremendous benefits from it.

(Next. No, the next one, the China-Mongolia) This is China-Mongolia-Russia corridor. In June 2016, the three presidents signed a trilateral economic partnership, at the 11th Shanghai Cooperation Organization meeting; and this corridor alone involves 32 projects.

(Next) This is the China-Pakistan economic corridor, which is creating 700,000 new jobs in Pakistan. It will produce 10,400 MW power capacity and the investment of 46 billion by the Chinese in this corridor equals all the foreign investment since 1970 in Pakistan.

(Next) This is the China-Myanmar-Bangladesh corridor. This creating for the first time an express highway between India and China, and it goes through Bangladesh and Myanmar. This corridor will be 1.65 million km long; it will encompass 440 million people.

(Next). The China-Indochina Peninsula corridor. This will be a highway/rail and high-speed transport system connecting the ten largest cities of the region.

(Next) Africa – Djibouti-Ethiopia. [showing picture of refugees instead] Leave this picture please; this is very

important. Because as we know Europe has been in large part destabilized by the refugee crisis, and there is a very big incentive, one would think, for Europeans to help develop Africa.

But so far, it is not coming from Europe, it's coming from China, India and Japan.

So, the Djibouti-Ethiopia railway just opened yesterday, so this is extremely good news. It opened yesterday, from Djibouti to Addis Abeba, 750 km and it was built by China; it employed about 20,000 Ethiopians and 5,000 Djiboutian, and it will be connected to the standard gauge railway in Kenya, which again, created 30,000 jobs. And this will obviously, among other things, transform the port of Mombasa and it will take cargo and passengers to the Ugandan border in one-tenth of the time it takes by road. A professor from the University of 'Nairobi School of Diplomacy', Prof. Gerishon Ikiara, said, and I agreed, that this whole program will "radically transform African participation in global trade in the next two decades and will catalyze the industrial transformation of Africa."

Now, there is another extremely important project (next), which is the Transaqua project. Here you see the cover story of a Memorandum of Understanding between the Lake Chad Basin Commission and the Chinese engineering firm PowerChina. Now PowerChina is the company which built the Three Gorges Dam and several other large projects so they really know what they're doing; and they agreed with this contract to do a feasibility study about the Transaqua project.

This is the largest infrastructure project ever entertained in Africa. It was developed in the late '70s by an Italian firm Bonifica, and there, in particular, Dr. Marcello Vichi. Mr. LaRouche has promoted this project since he got news of it, because it was a perfect way of solving many problems at the same time. As you know, Lake Chad is shrinking; it is

presently only about less than 10% of its original size, and it affects the life of the entire people, 40 million people, in the Chad Basin. And naturally, it is already having drought effects and so forth.

The concept is simply to transfer the water from the Congo River, using the unused discharge of the Congo River water going into the ocean. Now, the Congo River is the second largest river in the world and it discharges 41,000 cubic meters/second into the ocean – unused. And the idea is to take only 3-4% of that

water and bring it into Lake Chad. There was a big campaign trying to convince the people in the different states along the Congo River, that it's stealing their water, and so forth, but that was really an effort by the Greenies and it has no substance to it whatsoever.

First of all, the idea is not to take the water from the Congo River, but from the west bank tributaries at an altitude that allows to bring water per gravity until the C.A.R./Chad watershed, which is an elevation of 500 meters, and then pour it

into the Chari River which is a tributary of Lake Chad. So this way you would create a 2,400 km long waterway which would bring eventually 100 billion cubic meters of water per year into Lake Chad and also create navigable infrastructure.

Obviously, the Republic of Congo would be also a big beneficiary because it would give them access to a navigable waterway, electricity production, regulation of rivers and so forth.

PowerChina is now financing a feasibility study for a first phase of the project which would involve building a series of dams in the Democratic Republic of Congo, the Republic of Congo, and the Central African Republic. It would also potentially

generate 15-25 billion kilowatt-hours of hydroelectricity through the mass movement of water by gravity; it would potentially create a series of irrigated areas for crops, livestock, of an area of 50-70,000 sq km in the Sahel zone in

Chad, in the northeast of Nigeria, in the north of Cameroon, and in Niger. It would also make possible an expanded economic zone basically creating a new economic platform for agriculture, industry, transportation, electricity for 12 Africa nations.

So PowerChina has put up \$1.8 million for the first phase of the feasibility study and if the construction starts, this is a big project so it's not expected to be finished overnight, but it will take generations: But it will create livelihoods for 40 million people in the basin. And this is just one project, but there are many others. For example, Chinese Foreign Minister Wang Yi is just on a five-nation tour through Africa [Jan. 7-12] and was already in Madagascar, in Tanzania, is going to Zambia, Nigeria, Republic of Congo, and he's inviting all Africa nations to join the Belt and Road Initiative.

(Next) This is the expanded program of railways, nuclear power, just transforming the entire African continent. (Next) These are development plans for Latin America. The blue lines you see there, these are the longstanding, proposed high-speed railway routes in Latin America, which the Schiller Institute has proposed. In 1982, when Mr. LaRouche was working with President José López Portillo of Mexico on these projects, he called it "Operation Juárez," to refer back to the best traditions of Mexican-American cooperation. And these are all projects which are obvious. If you look at the map of Africa or Latin America, you don't see that kind of infrastructure! If you see some railway, you see it as a small line from a mine to the port to exploit the raw materials, but you don't have infrastructure. And we had this idea, which Alexander von Humboldt, by the way, proposed in 19th century, so it's not that revolutionary; it's sort of obvious.

The red lines are the various Chinese proposals since the BRICS summit in Brazil in July 2014. The solid red line is the northern route of the Brail-Peru transcontinental rail line. This was already agreed upon between the governments of Brazil and China a year ago; but then they had the coup in

Brazil, Dilma Rousseff was impeached, so this came to a halt; also the new government in Peru is very reluctant. But there's a big movement: I just addressed a conference of economists in the Amazon region two months ago, and there's a whole movement, also associated with Fujimori party, who absolutely won the fight for that rail line because it is the step to the future.

There are three additional lines, one line would be including Bolivia into this rail line, and three additional lines through Argentina and Chile; China also wants to build three tunnels between Chile and Argentina to connect the Pacific and the Atlantic.

(Next) This is the Nicaragua Canal which is in the early stages of completion, also built by China. This will increase the speed of global shipping between Belem and Shanghai and cut the current route across the Atlantic and around Africa by 10% of the time.

So I can only mention the most important projects. There are many, many others. For example, China and Ecuador are building a science city in Ecuador where President Correa at the recent state visit of President Xi Jinping said that the collaboration between Ecuador and China will mean that Ecuador soon will be on the same level as all industrialized countries. They have the idea to overcome poverty forever. The science city is going to have the most advanced fields of science.

Bolivia – Bolivia, which used to be a coca producing country, is now cooperating on space projects with China, with Russia, with India. So there is a completely new mood! I talked with many Africans – there was a big conference in Hamburg just a couple of months ago, where the Africans said, there is a completely new mood in Africa, there is a new paradigm: China, Japan, India are all investing, and the Europeans, if they don't shape up, they will become marginal and irrelevant. So there is a completely new optimism caused by this dynamic.

Now, just on a diplomatic level, this process of

integration is going absolutely rapidly, especially since September last year, when you had on Sept. 2-3, the Eastern Economic Forum in Vladivostok where the integration of the Eurasian Economic Union and the Belt and Road Initiative was on the table. The Japanese Prime Minister Shinzo Abe participated in that conference, and Japan is now massively investing in the Far East of Russia, in terms of energy cooperation. Putin was just in Japan, as a state visit; Abe will go on a state visit to Russia this year. They're talking about settling the conflict concerning the Northern islands, the Kuril Islands. They're talk about a peace treaty between Russia and Japan, and obviously there is a complete strategic realignment going on. President Duterte changed the role of the Philippines from being the aircraft carrier for the United States in the South China Sea, to now, collaborate with China on economic cooperation, and also with Russia. The same by

the way, goes for Turkey, which is now shifting and working with Russia, Iran and Syria, to bring peace to the region.

So there is a complete strategic realignment going on, which the Western media and Western politicians have just not got it yet. But this is very, very interesting.

So, then this continued from Vladivostok, immediately afterwards on Sept. 4-5, the G20 Summit in Hangzhou, where China took real leadership in saying the future recovery of the world economy must be based on innovation and he made very clear that this innovation must be shared with the developing countries, not to hold up or hinder their development.

So, it's a completely new paradigm, and I'll say something about that in a second.

Then you continue to the ASEAN meeting in Laos, the BRICS meeting in Goa, India in October, the APEC meeting in Lima in November, and it is involving all of these organizations and spreading very fast.

Why is Europe not joining this? Look, Europe is in bad shape. The EU is collapsing, the people in Italy hate by now the ECB, they hate Merkel, they have Schäuble, they hold

Merkel responsible for the suffering of the population in Italy which is now reaching dimensions like Greece; Greece was destroyed – one-third of the Greek economy was destroyed by the austerity policy of the Troika. And you know, there's *nothing* left of the idea of unity in Europe. There are borders being built, Schengen is dead; look at the Eastern European countries, they're simply not – the Eastern European and Central European countries are reorienting towards China! The 16+1 this is the Central and East European Countries, they have extensive infrastructure cooperation with China. China is building up the port in Piraeus port in Greece; they're building a fast railway between Budapest and Belgrade, and many other projects.

But the problem with Europe is that at least the European EU bureaucracy and some governments, like the German one, they are still on the old paradigm, the geopolitical paradigm of globalization, of neoliberal policies, and they don't understand that what China has proposed and what is now the basis of a very close and determined strategic partnership between Russia and China they have put on the agenda a different model: To overcome geopolitics by a "win-win" strategy.

Now, most people at least in Europe and in the United States have a very hard time to think that. They cannot imagine that governments are for the common good, because we have not experienced that for such a long time. The common idea of all the think tanks, or most think tanks, is "China must have ulterior motives"; "China is just trying to replace the Anglo-American imperialism, with a Chinese imperialism." But that is not true! I mean, I'm not naïve: I have studied this extensively. I was in China for the first time in 1971, in the middle of the Cultural Revolution. I have seen China, how it was then, I travelled to Beijing, Tientsin, Qingdao, Shanghai, and to the countryside, and so I know what *enormous* transformation China has made in this period.

I went back to China in '96, after 25 years; already

then it was breathtaking. But if you look, the Chinese economic model which has transformed 700 million people from extreme poverty to a decent living standard; and China is now committed to develop the interior region as part of their building of the New Silk Road, to eliminate poverty from China totally by the year 2020, and there are only 4 % left in poverty right now.

Now, China is offering their Chinese economic model to all participating countries in this New Silk Road conception and it is in the interest of Sweden. It would be in the interest of Germany because Germany is still, despite the Green insanity which has deformed many brains, is still a productive country.

The German 'Mittelstand' is still producing, I think, the third largest number of patents in the world. It is their natural interest to find cooperation not only in a bilateral cooperation, but in investments in third countries. It would be in the *best interest* of Germany – if Germany is freaked out about the refugees, which really has meant a complete destabilization of the country, why is Germany not cooperating, with Russia, with China, India, Iran, in the reconstruction of the Middle East? I think, now that the Syrian government has started to rebuild Aleppo, at least building the hospitals, the schools, the Schiller Institute had proposed already in 2012 a comprehensive proposal for the development of the entire Middle East, from Afghanistan to the Mediterranean, from the Caucasus to the Gulf States, and it would be in the absolute self-interest because – sure you have to destroy ISIS and the terrorists with military means. But then you have to create conditions where young people in Syria, Iraq, Afghanistan, Yemen, have a reason to become doctors, scientists, teachers, so that they have a future, that that way you drive out terrorism forever!

And if all the big neighbors would cooperate: Russia, China, India, Iran, Egypt, Turkey, Italy, France, Germany, Sweden, you could change this region in no time! And you will hear about that soon from Hussein.

The same for Africa. The only minister in Germany who is reasonable is the Development Minister Gerd Müller, because he travels all the time to Africa and he says there will be the need for many millions of jobs for the young people of Africa in the next years; if we don't have them to create these jobs, many, many millions of people will flee from hunger and war and epidemics.

So would it not be in the self-interest that all the European nations join hands *with* the Chinese Silk Road initiative, and help to reconstruct and build up the economies of southwest Asia and Africa? I think that that mission would also

really help to overcome the disunity of Europe, because you will not solve that problem by looking at your navel; but you will solve that problem by a joint mission for the greater good of mankind.

So, I think that this is all possible. It can happen this year, it can start this year, because China has committed itself to have two big summits this year – one summit will involve all the heads of state of the Belt and Road Initiative, and it can be the year of consolidation of the new paradigm.

Now there are a couple of elements which are also important for this new paradigm, because we are not just talking about infrastructure, and overcoming poverty. The next phase of the evolution of man is not just to bring infrastructure to all continents on this planet, but to continue that infrastructure into close space around us. This is the first time formulated in this way by the great German-American space scientist and rocket scientist Krafft Ehricke, who was the designer of the Saturn V of the Apollo project. He had this beautiful vision that if you look at the evolution over a longer period of time, life developed from the oceans with the help of photosynthesis; then you had the development of ever higher species, species with a higher metabolism, higher energy-flux density in their metabolism.

Eventually man arrived. Man first settled at the

oceans and the rivers; then with the help of infrastructure, man developed the interior regions of the continents; and we are now with the World Land-Bridge picture – go back to the first image – this

will be, when it is built, the completion of that phase of the evolution of mankind, by simply bringing infrastructure into all landlocked areas of the world, and you will have – with the help of new methods to create water, with modern technologies,

create new, fresh water. For example, if you have peaceful nuclear energy you can desalinate huge amounts of ocean water; through the ionization of moisture in the atmosphere you can create new waters to solve the problem of desertification.

Right

now all the deserts are increasing; with these new technologies you can reverse that, make the deserts green, and just make this planet livable for all human beings!

But this is not the end: Mankind is not an Earth-bound species. Mankind is the only species which is capable of creative discovery, and the collaboration of all nations for space exploration and space research is the next phase of our evolution. Now China has a very ambitious space program. They already landed the Yutu rover in 2014. Next year, they will go to the far side of the Moon, and eventually bring back helium-3 from the far side of the Moon, which will be an important fuel for

fusion power economy on Earth. Right now, we are very close to making breakthroughs on fusion power. The Chinese EAST program [Experimental Advanced Superconducting Tokamak] has reached, I think, 50 million degrees for plasma for several seconds. And just a couple of days ago, the stellarator in Greifswald, Germany, reached 100 million degrees for – I've forgotten how many seconds. But it means that in a few years, we can have fusion power! And that will create energy security, raw materials security, on Earth.

So we're looking at a completely new phase of civilization, and the far side of the Moon is very important

because will not have the disturbances of cosmic radiation, as you have on the Earth-facing side of the Moon; the Sun and the Earth – this far side is shielded from a lot of this radiation so it will be possible to put up much better telescopes, you will be able to look into Solar System, into the Galaxy, into other galaxies much, much farther than so far.

And I don't know if any one of you have seen these pictures from the Hubble telescope: If you have not done that, please, go home or next weekend, take the time to look at these pictures from the Hubble telescope. I saw them, and I was completely excited, because now we know that there are – at least – 2 trillion galaxies! Now, I have a good imagination, but I cannot imagine that. It's just too big. And when you see these pictures which have already been taken, you have galaxies which look like the Milky Way; then you have totally different nebulas; you have all formations. And not one galaxy is like the other. Just imagine how big the Universe is?

And we know very, very little! But man is the only species which *can* know! No donkey will ever know about the great galaxies or – no dog will ever be able to breed rabbits to have better breakfast. They all like better breakfast, but they don't know how to do it. Man is capable of overcoming every limitation, and the mind of man is a physical force in the Universe. We're not outside of the Universe, but what our mind invents or discovers, *is* part of the Universe. And that is a very exciting thing.

And there is lots to be found out about what is the origin and essence of life. What governs the laws of the Universe? What is the role of the mind in the Universe? I mean, these are all extremely exciting questions, and they all prove that man is not an Earth-bound species. So there is no need to be a Greenie, because we can bring man's knowledge applied to expand our role in the Universe. Even the ESA is now talking about a "Village on the Moon."

Krafft Ehricke at the time had said, that building an

industrial center on the Moon as a stepping stone for further travel of space will be important. And you now see the shaping up of new economic platforms. The first platform, Mr. LaRouche has

developed this notion of an economic platform to signify a period of economic development which is governed by certain laws, like for example, the development of the steam engine created a new platform; the development of railway created a new platform; fission is creating a new platform. And that platform is always governed by the most advanced technologies of that time. And you can already see that this infrastructure development of close-by space, the first platform is simply that man is able to reach the orbit! That's not self-evident. If you would have told man in the Middle Ages that you will get on a spaceship and go into orbit, he would have said you're crazy!

Now we can already see we have manned space travel and we can now connect to where the Apollo project stopped after the assassination of Kennedy, 40 years ago; but now China, India, Russia, they all continue that process. India has also been

extremely ambitious space project.

And so, the first economic platform will be simply to leave the planet Earth and to go into orbit; the second economic platform of space research will be to have an industrial base on the Moon and to eventually start to produce raw materials from

space. Because you will, as this continues, not always transport materials from the Earth for your space travel, but once you have fusion as a propulsion fuel where the speed will become much larger, you will be able to take materials from asteroids, from other planets, for your production and your requirements in space. And then longer space travel between planets as the third platform, which is already visible.

Now, I could – this is very exciting, and once you start to think about it, it shows that mankind is really capable of magnificent achievements, and that we should really

overcome geopolitics. Geopolitics is like a little, nasty two-year-old boy who is not yet educated and who knows nothing better than to kick his brother in the knee. Now that's about the level of geopolitics.

What Xi Jinping always talks about is that we have to form a "community of destiny for the common future of mankind," and that is exactly what the Schiller institute set out in '84, when we said we have to fight for the common aims of mankind. And these common aims of mankind must come first, and no nation should be allowed to have a national interest or the interest of a group of nations, if it violates this higher common aims of mankind. And the areas of working together, a crash program for fusion, space cooperation, and breakthroughs in fundamental science.

All of this however must be combined with a Classical Renaissance, a dialogue of cultures on the highest level, and we have already very successfully at Schiller Institute conferences, practiced that, where we had European Classical music, Bach,

Beethoven, Verdi, Schubert, Schumann; Chinese Classical music, Indian poetry. You have this coming Saturday in New York, a beautiful event on style of civilizations, of cultures, where we will have a Chinese professor talking about literati painting.

You know, in Chinese painting, you have poetry, calligraphy and painting, in one. And for Westerners, it's a complete revelation, because this does not exist in European painting. People get completely excited because they discover that there are beautiful things to discover in other cultures! And once you study and know these other cultures, xenophobia and racism disappears! Because you realize that it's beautiful that there are many cultures, because there are universal principles to be

discovered in music, one musician will immediately understand another musician because it's a universal language. Scientists speak a universal language; they understand each other.

And so the future of civilization will be a dialogue between Plato, Schiller, Confucius, Tagore, and many other great poets, scientists of the past. So, if you give every child access to these things, which is also in reach, I can see that we will have a new era, a new civilization of mankind. And I would invite all of you to not just look at it, but be part of it.

[applause]

Xi Jinping i Schweiz og Davos

14. jan., 2017 – Den kinesiske præsident Xi Jinping vil besøge Schweiz 15.-18. januar og vil – for første gang nogensinde for en kinesisk leder – deltage i Davos Økonomiske Verdensforum. Den kinesiske præsident vil begynde sit besøg den 15. jan. med bilaterale forhandlinger, som vil forsætte den 16. jan.; dernæst deltager han i Davos som taler, og den 17. jan. vil han besøge FN's kontorer i Genève.

I et interview til Xinhua understregede den schweiziske ambassadør til Kina, Jean-Jacques de Dardel, at fokus for schweizisk-kinesiske relationer ligger på samarbejde og innovation. Allerede under den schweiziske præsident Johann Schneider-Ammanns besøg i Beijing i april sidste år, indgik de to sider en aftale om et Innovativt Strategisk Partnerskab. Dette er den første aftale nogensinde af denne art, som Kina har indgået med et andet land.

»Kina ønsker mere innovation, og Schweiz er en mester i innovation. I denne henseende er det fornuftigt at koncentrere os om innovation for at fyldde de bilaterale relationer med liv«, sagde de Dardel. Både den schweiziske strategi »Industri 4.0« og den kinesiske »Made in China 2025« forfølger de samme

mål, dvs., at forbedre produktion, fjerne det unødvendige og styrke den teknologiske drivkraft for vedvarende udvikling, sagde han.

Schweiz har besluttet at anerkende Kinas status inden for markedsøkonomi. »Vi er overbevist om, at inklusion er bedre end eksklusion«, sagde de Dardel.

Kina har forpligtet sig til multi-lateralisme og er parat til at spille en langt større rolle i beslutninger omkring verdensøkonomisk politik, sagde ambassadøren. Han gav eksempler på dette, inkl. den succesrige organisering af G20, konceptet for og implementeringen af Silkevejsinitiativet og landets indsats for at skabe Asiatisk Infrastruktur-Investeringsbank (AIIB).

Schweiz var det første, vestlige land, der officielt anerkendte Kina i 1950; det var det første land, der indgik en frihandelsaftale med Kina i 2007, og det har også anerkendt Kinas fulde status i WTO. Det schweiziske elevatorfirma Schindler var det første, vestlige foretagende, der indgik et joint venture-selskab med et kinesisk selskab allerede i 1970'erne. Schweiz og Kina har fortsat 20 samarbejdsformater, fra industrielle til andre omkring juridiske spørgsmål og spørgsmål om menneskerettigheder. Den schweiziske ambassade i Beijings chargé d'affaires, Alain Gaschen, kaldte Xi Jinpings besøg for »et vigtigt skridt fremad i udviklingen af bilaterale relationer«, i et eksklusivt interview med CCTV.

Som han har for vane, når han besøger et andet land, skrev Xi Jinping en kronik om fredagen i Neue Züricher Zeitung forud for sin ankomst. Han skrev: Den kendte schweiziske digter og Nobelhædrede Carl Spitteler sagde engang, at der ikke findes større lykke end at have venner, der deler det samme synspunkt og den samme skæbne, som én selv.« Han gennemgik også historien om de to landes særlige relation, som refereret i ambassadør Dardels interview med Xinhua

Kina og Rusland advarer Seoul og Washington om deployering af THAAD

13. jan., 2017 – I kølvandet på et møde i går i den Sjette Russisk-kinesiske konsultation om sikkerheden i Sydøstasien, advarede Rusland og Kina om, at de har til hensigt at tage »modforholdsregler« som respons til den foreslæede deployering af Terminal High Altitude Defense System (THAAD) i Sydkorea.

Disse modforholdsregler er designet til at beskytte Kinas og Ruslands interesser og den strategiske balance i området, som de anser for truet af THAAD-deployeringen. Begge nationer har, gennem deres Udenrigsministerier, opfordret USA og Sydkorea til at adressere disse sikkerhedsspørgsmål og standse den planlagte deployering. Ifølge TASS advarede Ruslands Udenrigsministerium om, at, ved at forfølge THAAD-deployeringen, vil Washington og Seoul »forhøje spændingerne og styrke våbenkapløbet i området, såvel som også udvide militære øvelser« og »skade den regionale stabilitet og sikkerhed«. I betragtning af det »høje konfliktpotentiale« og den »komplekse og følsomme« situation på Halvøen, understregede Ministeriet, er det afgørende at søge »fælles bestræbelser, der har til formål at finde en meningsfuld strategi, der ville vise vejen ud af det nuværende dødvande og være med til at afgøre spørgsmålet om atomvåben og andre problemer, som Korea-halvøen konfronteres med.«

Xinhua understregede, at de to nationer insisterede på målet med at »fjerne atomvåben fra Korea-halvøen for at sikre fred

og stabilitet».

Kinesiskbygget afrikansk jernbanelinje, der forbinder Djibouti og Addis Abeba, tages i brug

11. jan., 2017 – En multimilliarddollar, kinesiskbygget jernbaneforbindelse, der forbinder Afrikas Horn med kontinentets udstrakte indlandsområder, blev officielt åbnet den 10. januar og udgør en vigtig milepæl i Kinas spirende indflydelse i området. Den 750 km lange jernbanelinje forbinder havnebyen Djibouti ved Det røde Hav og Addis Abeba, hovedstaden i indlandsstaten Etiopien, Afrikas hurtigst voksende økonomi. Jernbanen forventes at reducere rejsetiden mellem de to byer fra tre dage via veje, og til blot 12 timer med tog. Det anses også bredt for at være begyndelsen til et trans-afrikansk jernbaneprojekt, hvor en 2000 km lang linje vil forbinde Djibouti, beliggende ved mødestedet mellem Det røde Hav og Adengolfen, en port til Suezkanalen og en af verdens travleste skibsrouter, tværs over Afrika til Atlanterhavet.

Jernbanen blev for 70 % 's vedkommende finansieret af Kinas Exim Bank og bygget af to store, statsejede selskaber – China Civil Engineering Construction Corp. (CCECC) og China Railway Construction Corp. Det er det seneste symbol på Kinas voksende tilstedeværelse i Afrika, et kontinent, der traditionelt har befundet sig under Vestens koloniale indflydelse. Jernbanelinjen er den første, elektrificerede jernbane, bygget

med standardmål, på kontinentet, bygget med kinesiske standarder og teknologi.

Under indvielsesceremonien i går morges sagde Yuan Li, præsident for CCECC, at åbningen af den nye jernbane var »en drøm, der gik i opfyldelse« og »endnu et symbol for det kinesisk-afrikanske venskab«.

NYHEDSORIENTERING JANUAR 2017: Farvel til krigens paradigme?

Hvad vi skal gøre – nu!

I USA, i lighed med Danmark og andre lande, er der nogle helt afgørende ting, der må gennemføres, som Lyndon LaRouche har fremført som fire nødvendige love, der må implementeres omgående.

1) Der skal indføres en Glass/Steagall-bankopdeling, men under den overskrift er der mange andre ting, der må ske. Man må gå igennem bankernes og finansverdenens aktiviteter i lighed med det, man gjorde i USA, da Roosevelt blev indsat som præsident, så man får renset op og får adskilt tingene i legitime finansielle aktiviteter, der er vigtige for realøkonomien, og så spekulation, som skal helt ud af de normale banker. Man vil så få nogle mindre almindelige banker, som man kan hjælpe, hvis de får problemer, mens alle de andre spekulative aktiviteter ikke får lov til at belaste staten og skatteyderne, når de får problemer pga. fejlslagne

spekulationer. Derefter skal der

2) skabes kredit til investeringer. Staten må gå ind og regulere det ovenfra og i den udstrækning, det er nødvendigt, med statslige kreditter sikre, at der bliver foretaget de nødvendige investeringer i samfundet og dets produktive aktiviteter. Det skal bl.a. udmønte sig i

3) store infrastrukturprojekter, der kan opgradere hele økonomien. Man kan bare skele til de enorme investeringer, Kina har foretaget siden 2008, hvor Kina har brugt over 1000 mia. dollars om året på infrastruktur og i dag har verdens største og bedste netværk af højhastighedstog. Programmet for Den Nye Silkevej er da også centreret om opbygning af grundlæggende infrastruktur, ikke blot i Kina, men i stadig større dele af verden. Når det gælder Danmark, har vi et forældet jernbanenet, der skal fornyes i form af et nationalt magnettognet eller højhastighedstognet i forbindelse med bygningen af en Kattegatbro. Vi skal så hurtigt som muligt have bygget den faste forbindelse over Femern Bælt og en Helsingør/Helsingborg-forbindelse. Der er masser af motorveje og andre projekter, der bare venter på at blive bygget. Der er så meget, der skal bygges, at vi kommer til at planlægge, hvordan vi kan få nok kvalificeret arbejdskraft og byggekapacitet for at kunne få alle de mange projekter realiseret. Alle disse projekter er nødvendige som en del af at løfte den danske økonomi op på et højere produktivitetsniveau, og samtidig skal vi have langt mere gang i forskning og udvikling.

For fredens skyld må Obama opgive sin Nobelpolis

Leder fra LaRouchePAC, 10. januar, 2017 – Med blot få dage tilbage af sit præsidentskab fortsætter Barack Obama med at optrappe en potentiel krigskonfrontation med Rusland, mens hans regimeskiftkriges dødbringende kaos, i Libyen, Yemen og Afghanistan, fortsat forværres.

Foruden en ny, hurtig deployering af yderligere 6.000 soldater til Ruslands grænser, med fuld jord-og-luft kampbevæbning, er Obama og hans Pentagonchefer gået i gang med at skabe en 2.000 mand stærk »dræberenhed«, der skal uddannes til at myrde nordkoreanske ledere. Obama har indledt, været med til at starte eller fortsat ni separate krige, mens han har været præsident, alle uden bemyndigelse fra, eller blot væsentlige konsultationer med, Kongressen. Han er den eneste præsident i USA's historie, der har været i krig hver eneste dag i to konsekutive embedsperioder, som kongresmedlem Ron Paul påpegede på sin webside 9. jan. Hans dronedrab stiller George W. Bush' i skyggen, og hans erklærede politik for dronedrab fjerner grundlæggende set enhver grænse for præsidenters magt til at dræbe via droner overalt i verden.

Nogle af disse handlinger, såsom Obamas massive, \$115 mia. store bevæbning af saudiarabiske styrker for at bombe og invadere Yemen, har haft et sandt folkemord til følge; nogle af disse handlinger har næret fremvæksten af flere terroristgrupper; andre truer med generel krig med Rusland og/eller Kina.

At denne krigspræsident kan prale med en Nobels Fredspris er en vederstyggelighed og en trussel mod freden, både i krigen i Syrien, og i hele verden.

Den 9. jan. krævede Schiller Instituttets præsident Helga

Zepp-LaRouche, at præsident Obama tilbageleverede Nobels Fredspris, som han fik i 2009 kort tid efter, at han overtog embedet. Pentagon har netop annonceret »dræberenheden« i Korea – en afgående præsident sammen med en koreansk regering, der selv er ved at blive fjernet gennem en rigsretssag! – samt de store, nye styrker, der nu deployeres, for at »standse russisk aggression« i Europa.

Det er nødvendigt at respondere til sådanne eskalerende krigshandlinger i Obamas sidste dage i embedet, med et krav om, at han omgående skal tilbagelevere sin Nobels Fredspris; og at dette krav udbredes internationalt og fortsætter efter, at han har forladt embedet.

Hvis Obama tvinges til at opgive sin uretmæssigt tildelte Fredspris, vil hans administrations forsøg på at tvinge det tiltrædende Trump-team til at *fortsætte* disse krige og stormagtskonfrontationer blive slået ned. Hans sidste øjeblikks optrapninger er nu i færd med at skabe så meget kaos og forvirring for hans efterfølger som overhovedet muligt.

Krigene, og truslerne om krige, kan få deres helt eget liv, med mindre de tilbagevises, og det på en synlig og stærk måde.

For fredens og udviklingens skyld må Obamas fredspris inddrages eller opgives.

Silkevejen omfatter

uddannelse, kultur og den 'bløde forbindelse'

3. jan., 2017 – Bredden og målene for Silkevejen er skitseret i en artikel i *Peoples Daily* den 2. jan., der starter med en opsummering af nogle af de projekter, der er gået frem i løbet af 2016, såsom de næsten 2000 togafgange mellem Kina og Europa, og færdiggørelsen af Qamchiq-tunnelen i Usbekistan. Men der er mere i Silkevejen end den »hårde«, fysiske infrastruktur, siger Huang Rihan, adm. dir. for Bælt & Vej Instituttet ved Centret for Kina og Globalisering.

Den 22. juni, sidste år, opfordrede præsident Xi, i en tale for det Lovgivende Kammer i Usbekistans Øverste Forsamling i Tasjkent, til opbygning af en grøn, sund, intelligent og fredelig Silkevej, rapporterer artiklen. Huang forklarer, at en grøn Silkevej fremskynder miljøbeskyttelse og intensiv dyrkning for bæredygtig udvikling. »En sund Silkevej betyder et tættere samarbejde omkring sundhedspleje og sundhed blandt relaterede lande. En intelligent Silkevej opfordrer til kultivering af mennesker og gensidig udveksling. En fredelig Silkevej tilsligter en implementering af et koncept for fælles, omfattende, samarbejdende og vedvarende sikkerhed i Asien, og dernæst en promovering af verdensfred og stabilitet.«

Zhao Lei, en professor ved den Centrale Partiskole, forklarer: »Tidligere så folk for det meste 'Bælt-og-Vej'-programmer inden for felter som energi og infrastruktur. I 2016 er samarbejdet mellem Kina og landene langs ruterne blevet udvidet til uddannelse, kultur, sundhedspleje og telekommunikationer.« Det er den »bløde forbindelse«, der bringer mennesker sammen, sagde han.

USA's nye Kongres åbner i dag, med et land, der forfølges af sandheden

Leder fra LaRouchePAC, 3. januar, 2017 – USA's 115. Kongres tages i dag i ed i en tid, hvor den sandhed bliver mere og mere åbenlys for ethvert blot nogenlunde menneskeligt væsen, at der må komme et skifte i USA's politik, bort fra økonomisk kollaps, krig og løgne. Hold af LaRouchePAC-aktivister var på stedet for at modtage kongresmedlemmerne med detaljerne for denne bydende nødvendige proces i form af en handleplan – genindfør Glass/Steagall-loven og sæt USA på en kurs for produktivitet gennem et nyt kreditsystem, og forny det forpligtende engagement over for videnskab og økonomisk udvikling.

Ydermere er sandhedens lys i færd med at brænde huller i Obama-administrationens aktuelle, store favoritløgn, nemlig, at det dæmoniske Rusland er i færd med at 'hacke' Amerika i stumper og stykker. For det første måtte *Washington Post* i dag bide i det sure æble og trække sin påstand tilbage, som avisen fremkom med i sidste uge, om, at Rusland havde hacket et elektricitetsselskab i New England, med mulige blackouts til følge. *WP*'s forsideartikel i dag lyder, »El-selskab i Vermont har tilsyneladende ikke været utsat for russisk hacking«. *WP* havde urigtigt rapporteret, at selve værket var blevet hacket; at den skadelige software (malware) kunne forbindes til Rusland; og at der var fare for et blackout på værket – Burlington Electric. Intet af dette var sandt.

Man bør huske på, at dette er den samme *Washington Post*, der, sammen med *New York Times*, oprindeligt fremkom med den

påstand, at Rusland hackede den Demokratiske Nationalkomites computere og opsnappede e-mails fra John Podesta, Hillary Clintons kampagneleder, og med disse e-mails, der senere blev offentliggjort af WikiLeaks og således på ulovlig vis greb ind i valgresultatet (til Trumps fordel).

I denne sammenhæng udtalte WikiLeaks' grundlægger og redaktør, Julian Assange, sig offentligt imod denne påstand og sagde, at han er 1000 % sikker på, at Rusland ikke leverede hackede e-mails til WikiLeaks. »Vi kan sige, og har sagt, gentagne gange i løbet af de seneste to måneder, at vores kilde ikke er den russiske regering, og ikke er et nationalt parti.« Dette, og mere, sagde Assange i et eksklusivt interview i sidste uge med Sean Hannity fra Fox News, der vil blive udsendt i sin fulde udstrækning (første del) kl. 22 den 3. januar. Dette er første gang nogensinde, at Assange giver et interview til en Tv-kanal, og hans foreløbige kommentarer får allerede stor opmærksomhed internationalt og skaber ravage for Obama-flokken, inklusive for det Republikanske Partis russofober.

Disse afsløringer understreger den pointe, Lyndon LaRouche for nylig kom med, om Obama-præsidentskabets sidste dage: »Husk, hvem, der står bag Obama.« Han refererer til det døende, britiske City of London/Wall Street slæng. Men, tilføjer han, i takt med, at deres system udånder – og så længe der ikke gennemtvinges et skift i politikken for at udslukke det – så er de farlige og i stand til at udføre grusomheder.

I Sydvestasien skal man se hen til dette netværk i forbindelse med de ansvarlige for massenedskydningen i Istanbul nytårsaften. De tyrkiske myndigheders og samarbejdende, asiatiske regeringers efterforskning er stadig i gang og holdes hemmelig, men LaRouche bemærkede: Led efter de britisk-tjetjenske netværks hånd i denne grusomme handling. Ud over visse empiriske 'signatur-fakta', der er knyttet til hændelsen, er der den grelle realitet med en sådan handlings onde formål – at forsøge at sabotere det igangværende tyrkisk-russisk-iranske samarbejde om en syrisk våbenhvile,

forhandlinger i Kasakhstan i næste uge og en politisk løsning. Den tyrkiske vicepremierminister, Numann Kurtulmus, bekræftede imidlertid i dag, at Tyrkiets forpligtelse forbliver resolut.

Samme dag som massenedskydningsforbrydelsen fandt sted i Sydvestasien – hjemstedet for Det gamle, britiske Imperiums »Store Spil«, med alle dets årtier med blodsudgrydelser – holdt den kinesiske præsident Xi Jinping i Østasien sin årlige nytårstale, hvor han specifikt udtalte den sandhed, at menneskeheden kan handle på en måde, hvor der er fred i verden. Efter en gennemgang af Kinas præstationer i 2016, især inden for rumforskning, Bælt-og-Vej og præstationen med at løfte 10 millioner borgere ud af fattigdom, sluttede Xi:

»Det kinesiske folk har altid troet på, at verden er et fællesskab. Vi kinesere aspirerer ikke kun til et godt liv for os selv, men vi håber også, at mennesker i andre dele af verden har et anstændigt liv. I øjeblikket plages mennesker i visse lande og områder stadig af krige og uroligheder; mange lider under sygdomme og katastrofer. Vi håber inderligt, at det internationale samfund vil gøre en fælles indsats, arbejde i den overbevisning, at menneskeheden har en fælles skæbne som et fællesskab og bygge vores planet op til at være et mere fredeligt og fremgangsrigt sted at leve.«

Parlementarikere fra Sydkorea til Kina for at drøfte deployering af THAAD-missiler

2. jan., 2017 – Otte parlamentarikere fra Sydkorea fra landets hovedoppositionsparti, Koreas Demokratiske Parti, inklusive Moon Jae-in, der er den førende præsident in spe, vil besøge Kina den 4. januar til et tredages besøg. Formålet med besøget er at forsøge at lette spændingerne med Beijing over den planlagte deployering af amerikanske missilforsvarssystemer i Sydkorea, sagde en af de delegerede til Sputnik i dag.

De sydkoreanske parlamentarikere forventes at afholde et møde med den kinesiske udenrigsminister Wang Yi under deres besøg.

»Vi vil sige til Beijing, at vore præsidentkandidater, inklusive Moon, kræver, at spørgsmålet om THAAD-missilerne skal genovervejes af den næste regering«, sagde partimedlem Song Young-gil til *South China Morning Post*. »Samt, vi vil også diskutere Kinas rolle i løsningen af de iskolde relationer mellem Sydkorea og Nordkorea.«

Formålet med THAAD (Terminal High Altitude Area Defense), som Sydkorea i 2016 gik med til kunne deployeres på dets territorium ved slutningen af 2017, skulle angiveligt være det, at imødegå trusler fra Nordkorea. Det er nu blevet til et hovedirritationsmoment i relationerne mellem Beijing og Seoul, rapporterer Sputnik. Kina og Rusland har gentagne gange udtalt deres modstand mod deployeringen af THAAD med det argument, at missilernes virkelige formål er at modvirke de strategiske våbensystemer, der befinner sig ikke alene i Nordkorea, men også i Kinas bagland og Ruslands fjernøstlige regioner.

Kinas præsident Xi understreger betydningen af BRIKS-samarbejdet i brev til BRIKS-lederne

Søndag, den 1. januar, 2017 – I et brev til de fire andre BRIKS-ledere opfordrede præsident Xi Jinping de fem lande til at intensivere deres partnerskab i det kommende år, for en lysere fremtid. »BRIKS-samarbejdet, en model for samarbejde mellem fremvoksende markeder og udviklingslande, har bragt fordele til befolkningerne i BRIKS-landene og ydet store bidrag til at styrke den globale, økonomiske vækst, forbedre den globale styrelse og promovere demokratiseringsprocessen i de internationale relationer«, skrev Xi til lederne af Brasilien, Rusland, Indien og Sydafrika. I BRIKS-samarbejdets andet årti, der indledes i 2017, vil BRIKS-nationerne gøre større fremskridt i deres samarbejde og spille en større rolle i internationale anliggender, sagde den kinesiske præsident. »Konfronteret med voksende usikkerhed og ustabilitet i den

internationale situation må BRIKS-landene styrke solidaritet og samarbejde og beskytte fælles interesser.«

BRIKS-topmødet, der vil blive afholdt i Xiamen, Kina, i september måned, vil have fire aspekter: en intensivering af pragmatisk samarbejde for fælles udvikling; styrkelse af global styrelse for i fællesskab at imødegå udfordringer; gennemførelse af mellemfolkelige udvekslinger for at konsolidere offentlighedens støtte til samarbejde; og promovering af opbygning af mekanismer til etablering af et bredere partnerskab. »I overensstemmelse med en åben, inkluderende og win-win-ånd i BRIKS vil Kina arbejde sammen med andre BRIKS-lande for at gøre Xiamen-topmødet til en succes og avancere BRIKS-samarbejdet til et nyt niveau«, sagde Xi.
