

**RADIO SCHILLER den 4. april  
2016:**

**Obama truer Kina og Rusland,  
trods topmøde om  
atomsikkerhed**

Med formand Tom Gillesberg

---

**Klokken er ved at falde i  
slag:**

**Konfrontation med atomvåben,  
eller win-win-samarbejde om  
Den nye Silkevej?**

**Af Helga Zepp LaRouche**

*Det seneste eksempel på denne, Den nye Silkevejs større  
tiltrækningskraft i forhold til den geopolitiske konfrontation  
med Rusland og Kina, har vi netop set i form af den kinesiske  
præsident Xi Jinpings besøg i den Tjekkiske Republik.  
Præsidenterne Xi og Zeman undertegnede en omfangsrig liste af  
aftaler inden for områderne højteknologi, infrastruktur og  
realøkonomi og fejrede den »Gyldne Stad« Prags rolle som  
»porten« ind til samarbejdet mellem Kina og Europa.*

*Netop dette samarbejde er ligeledes nøglen til løsning af flygtningekrisen, der blot har bragt frem for dagens lys, hvilket skrøbeligt fundament, EU er bygget på.*

Download (PDF, Unknown)

*Foto: Prags astronomiske ur er et af de ældste og mest omfattende ure, der nogensinde er bygget. Det blev først installeret i 1410, og senere genopbygget af Mester Hanus i 1490. Den kinesiske præsident Xi Jinpings besøg i den Tjekkiske Republik, med underskrivelse af mange aftaler om samarbejde, fejrede den »Gyldne Stad« Prags rolle som »porten« ind til samarbejdet mellem Kina og Europa.*

## **Uddrag fra Lyndon LaRouches dialog med ruslandsekspert Jens Jørgen Nielsen under Manhattan Projekt mødet, lørdag d. 26, 2016**

S: Mit navn er Jens Jørgen Nielsen, jeg kommer fra Danmark, og er kun her på visit. Jeg repræsenterer en organisation i Danmark ved navn Russisk-Dansk Dialog; og vi arbejder tæt og succesfuldt sammen med LaRouche-organisationen i Danmark, til hvilken jeg har et godt kendskab.

Jeg har et spørgsmål, der konkret vedrører Danmark. De ved selvfølgelig alle, at man i EU forfølger en politik i forhold

til Rusland, som vi, i min organisation, meget modsætter os. Vi mener, at den er tæt på at være selvmorderisk.

Men jeg har et spørgsmål, der aktuelt angår vores land, idet Grønland, som De sikkert ved, er en del af Det danske Rigsfællesskab. Såfremt vi rammes af klimaforandringer, som en del mennesker taler om at vi bliver, meget snart faktisk; så betyder det, at den nordlige del af Rusland, det arktiske område, snart på mange måder vil være interessant – der er et potentielle for masser af energi såvel som der er et økonomisk-socialt udviklingspotentiale i dette område. Jeg ville være meget interesseret i Deres syn på fremtiden og mulighederne for et potentiel samarbejde med Rusland i det arktiske område? Og desuden, hvad vil der ske, hvis vi ikke overkommer sanktionspolitikken i forhold til Rusland? Så for det første, Deres syn på mulighederne af et sådant samarbejde, og dernæst betydningen og konsekvenserne af sanktionspolitikken?

LAROUCHE: Det korrekte svar på Deres spørgsmål er en smule vanskeligt at forholde sig til. Ikke så meget for mig; men for mennesker i al almindelighed. Fordi folk opererer med udgangspunkt i nogle antagelser om disse spørgsmål, som jeg ved er falske. Det dominerende træk ved vores planet er antagelser, der er baseret på absurde overbevisninger.

Men de fleste lande i verden i dag tenderer desværre imodståbelige ideer om forskelligheder mellem nationerne. Det Transatlantiske område er for indeværende en ødemark. Lige netop nu.

Centrum ligger i Rusland og Kina. Det er her – med henblik på at opstille et referencepunkt -, at menneskehedens styrke på nuværende tidspunkt ligger. Det Transatlantiske samfund er, i form af dets historie, essentielt set et satanisk fællesskab. Det britiske system, for eksempel. Det britiske system er i sig selv et satanisk system! Ja, sådan ville irlænderne altid sige det. Den ærlige irer ville til hver en tid sige det på den måde.

Pointen er, at vi simpelthen må forstå hvad menneskeslægten er, og ikke hvad *folk* er. Hvad er menneskeslægten? Hvad er dens egenskaber? Hvad er effekten af den? Hvad er menneskehedens rolle i forhold til solsystemet og hvad der findes længere ude? Hvad er betydningen? Jeg kan sige Dem her og nu, at det Transatlantiske samfund er en ødemark. Det er ikke fuldstændig en ødemark, men det er under indflydelse af en ødemarks-tendens. Visse dele er det mere end andre.

Så jeg mener, at man er nødt til at anskue problemet rigtigt, og sige: at det vi er optaget af, med henblik på at forstå, hvad denne realitet går ud på, er, at vi nødvendigvis må tage 'Månen bagside' med i betragtning, og se på realiteterne i et perspektiv med udgangspunkt i 'Månen bagside', hvilket vi endnu ikke har gjort. Så vi har kun en 'skygge' af det. Og vi bliver derfor nødt til at bruge vort eget sind til at forstå, hvad kræfterne i det menneskelige sind er, for på relevant vis at lede os til den slags ting, som vi må tage i betragtning. Og folk må lære at tilpasse dem selv til den realitet, som de ikke allerede er bekendt med. Det er hele pointen.

Dette ser man for eksempel i Kina. Folk rundt omkring i verden forstår ikke dette Kina-koncept. De forstår det overhovedet ikke. Så derfor er vi nødt til at acceptere processen; at vi er på vej til at operere fra 'Månen bagside'. Vi er på vej til at opdage, hvad bagsiden af Månen er. Og fra dette standpunkt, når vi har udført det eksperiment succesfuldt, vil vi sætte en ny standard for beskrivelsen af hvad betydningen af menneskeslægten er. Bagsiden af Månen!

Vi havde et rumprogram op til det tidspunkt, hvor Obama knuste dette princip. Det må og skal genoplives; og det er hvad vi gør i Texas – i særdeleshed i Texas området. Vi rejser til bagsiden af Månen. Vi har endnu ikke gjort det, men vi arbejder på at komme til det sted på Månen. Men Obama skar det væk, og derfor er vi nødsaget til at fjerne Obama fra scenen. Og så lader vi ham gøre tingene bedre.

Derudover, er det ganske almindelige idéer, De egentlig ønsker at arbejde videre med.

S:[follow-up] Ja, mange tak. Måske De har givet mig et svar, fordi jeg gerne vil høre Deres mening, nu og her, om den Europæiske Union. Fordi vi netop nu, i Danmark, Tyskland og Frankrig diskuterer fremtiden for den Europæiske Union. Har den overhovedet en fremtid? Hvordan ser den Europæiske Union og fremtiden ud i Deres perspektiv? Har den, – vil den overhovedet have en fremtid? Hvordan ser De på det?

LAROUCHE: Fremtiden betyder, at Rusland og Kina, og andre områder rundt omkring på planeten, hvor fremtiden skabes, bliver en del af fremtiden. Disse ting vil overleve. Meget af den konventionelle opinion af i dag vil ikke overleve. Det er derfor vi har krige i det Transatlantiske fællesskab. Det er af denne grund, vi har haft disse krige, for vi har haft krige over anliggender, der ikke var de rette problemer at være optaget af. Og så, altså, er vi nødt til at bruge vore sind, og forstå, hvad menneskeslægten er i stand til at udrette? Og svaret er; vi må være i stand til at gøre det, som vi nødvendigvis må gøre. Og vi bliver nødt til at opdage disse ting, og vi bliver nødt til at lære hvordan vi skal gøre det.

## **RADIO SCHILLER den 29. marts 2016: Efter terrorangrebet i Brussel**

Med formand Tom Gillesberg:

---

# Uden en mission er I døde!

22. marts 2016 (*Leder fra LaRouchePAC*) – »Bankerotten i USA's økonomi er generelt set færdigt. Det er absolut færdigt«, erklærede Lyndon LaRouche kategorisk i sin **diskussion mandag den 21. marts med LPAC Policy Committee**, under den internationale webcast.

Mens de fleste amerikanere ser den anden vej og med frygt i sjælen forsøger at lade som om, at det ikke finder sted, så er det, vi i virkeligheden er vidne til, hele det transatlantiske finanssystems død – det er bankerot og står ikke til at redde. Men, vi er også vidne til en nations død, og dens befolknings død, fordi vores fornemmelse for en national mission – og de enkelte individers fornemmelse af formål og selve det, at have en identitet – systematisk er blevet fjernet af Det britiske Imperium, dets agenter og dets politik internt i USA. Intet har været så afgørende for denne operation som nedlæggelsen af NASA, som er kulmineret under Obamas præsidentskabs-parodi.

I går erklærede LaRouche: »Der er hele kategorier af folk, der under normale omstændigheder var produktive mennesker. De har ikke længere nogen rolle at udfylde. For det første sidder vi på toppen af en vulkan, som er det bankerotte, transatlantiske finanssystem, som kan – og vil – eksplodere i en hyperinflationsskabende nedsmelting, hvad øjeblik, det skal være. Tro endelig ikke, at den nuværende politik med endeløse bailouts og »helikopterpenge«, som tidligere formand for Federal Reserve, Ben Bernanke, holdt af at kalde det, kan holde stand. Man kan ikke forsøge at 'redde' for 2 billiard dollar værdiløse, spekulative finanspapirer med endnu en billiard finansielt affald, uden, at det eksploderer op i ens ansigt. De regeringer, der støtter op omkring denne galskab – såsom Obamaregeringen – er lige så skyldige i de forbrydelser,

der begås.

Det britiske Imperium er dømt til total undergang, understregede Lyndon LaRouche i dag, og de handler i total desperation: de vil ikke acceptere et nederlag, og de er parate til at dræbe en masse. Der er stærke indikationer på, at dette er i gang i USA, såvel som i Europa.

*Dødsfald som følge af narko-overdosis, alle kommuner, USA, 2002-2014. O.D.'s er steget til tårnhøje tal i næsten alle USA's kommuner under Bush' og Obamas præsidentskaber.*

Ud over det eksploderende finanssystem, så sidder vi også på toppen af nok en vulkan, som er den erklærede hensigt fra Det britiske Imperium – og fra deres marionet, Barack Obama – om at fremtvinge regimeskift i Rusland og Kina. Som Lyndon LaRouche i årevis har advaret om, så er kriserne i Libyen, Syrien og Irak, og international terrorisme generelt, alle sammen rettet mod et strategisk atomopgør med Rusland og Kina. De seneste »barbariske« terrorhandlinger i Bruxelles, som præsident Vladimir Putin kaldte det, er ingen undtagelse. Idet hun talte om de internationale sponsorer af terrorisme – som vi ved er Det britiske Imperium, der opererer under diverse flag – var talsperson for det russiske Udenrigsministerium, Maria Zakharova, ligefrem: »Man kan ikke støtte terrorister i én del af verden uden at forvente, de også dukker op i en anden.«

Rusland og Kina fortsætter med at spille deres rolle i at gå op imod dette vanvid, og bygge et Nyt Paradigme baseret på en mission for menneskeheden, der udfolder sig omkring win-win-samarbejde om grundlæggende forskning så som rumforskning, og samstemmende store infrastrukturprojekter her på planeten Jord.

Men for at det skal lykkes, må USA bringes med ombord i dette Nye Paradigme. Til en begyndelse må de nazister, der ønsker at

forvandle USA til en koncentrationslejr, afsløres som det, de er – lige fra FBI-hooligans, til Obamas drabsmaskine og til Wall Street-bankerne, der har folkemord i deres kølvand. At give dem en stærkt forsinket blodtud er en god måde at få humøret op og genoplive optimisme på.

Dernæst må landet genoprette sin fornemmelse for national mission omkring NASA's rumprogram, med Kesha Rogers' kampagne som spydspids for vore bestræbelser i denne retning. Dette vil gengive folk ikke alene produktive jobs, men selve deres fornemmelse for mening og menneskelig identitet. Og det er en kraft, som Det britiske Imperium ikke kan håndtere.

---

## **Putin kalder terrorangreb i Bruxelles for en »barbarisk forbrydelse«; Zakharova angriber vestlig støtte til terrorister**

22. marts 2016 – Idet han udtrykte sin dybtfølte kondolence over for det belgiske folk, har den russiske præsident Vladimir Putin »kraftigt fordømt disse barbariske handlinger« samtidig med, at han forsikrede »det belgiske folk om Ruslands absolute solidaritet med det belgiske folk i disse svære timer«, sagde talsmand for Kreml, Dmitry Peskov, i dag, iflg. en rapport fra *Sputnik*. »Præsident Putin har allerede sendt kondolencetelegram til Kong Philippe af Belgien i forbindelse med civile dødsfald i en række bombesprængninger i Bruxelles«, sagde Peskov til reportere.

»I takt med, at flere og flere mister livet, og vi mister kostbar tid, begynder folk at forstå, at denne politik med dobbelte standarder mht. bedømmelsen af terroraktiviteter, er en politisk blindgyde«, sagde talsperson for det russiske Udenrigsministerium Maria Zakharova kort tid efter, at der begyndte at indløbe rapporter om angrebene i Bruxelles, rapporterer *BRICS Post*. »De kan ikke støtte terrorister i én del af verden uden at forvente, at de også vil dukke op i en anden del.«

Med en anklagende finger rettet mod NATO for at forsømme forsvaret af sin egen baghave, og med et udfald mod NATO's generalsekretær Jens Stoltenberg, tweetede chefen for Ruslands parlamentskomite for udenrigsanliggender, Alexey Pushkov, at NATO-chefen har tilladt »folk at sprænge sig selv i luften lige under hans næse«, mens »NATO var optaget af at bekæmpe den imaginære, russiske trussel«, rapporterer *Newsweek*.

## **Hold op med at skjule katastrofen – Se den i øjnene, og tag ansvar!**

21. marts 2016 (Leder fra LaRouchePAC) – Finanssystemets kollaps kan ikke længere skjules for befolkningerne i Europa og USA. Bankerne er gået i panik – med en udvidelse af den

kvantitative lempelses pengetrykning, negative rentesatser, banker, der opkøber deres egne aktier for at bevare skinnet af solvens, og snak om »helikopterpenge«, som om penge var problemet. Det handler ikke om penge, men om realøkonomiens sammenbrud. Selvmordsraten blandt tidligere beskæftigede specialarbejdere handler ikke om penge – det handler om, at de er blevet skubbet til side af en satanisk politik, der kun er interesseret i penge, ikke mennesker.

Og alligevel accepterer de fleste mennesker det, af frygt – frygt for, at FBI og NSA skal »fange dem«, hvis de taler offentligt, hvis de taler om det, der er en åbenlys kendsgerning. USA og Europa er i forfald, i færd med at dø, mens Kina og Rusland vokser og lægger vægt på deres befolkninger, og verdens befolkninger, og de rejser ud i rummet, mens Obama lukker NASA ned; de bygger jernbaner i hele verden, mens Obama lukker dem ned, og de udvider uddannelse, mens Obama legaliserer narkotika.

Den amerikanske kulturs død kan ikke udtrykkes bedre end gennem den kendsgerning, at Obamaregeringen fremlagde en »Ven af retten«-brief (Amicus curiae) i en sag, der blev anlagt af Colorados nabostater for at standse Colorados legalisering af marihuana, som gör det umuligt at begrænse den narkotika, der strømmer over grænsen. Den største heroinepidemi i amerikansk historie, der nu berører hver eneste kommune i landet, stammer direkte fra legaliseringen af narkohandlen – eftersom netværkerne for pot er de samme som dem, der spreder heroin og kokain. Narkohandler George Soros var henrykt, da Højesteret i dag dømte til fordel for Obamas narkohandel og afviste at lade sagen mod Colorados narkopolitik komme for retten.

Chefen for Indiens centralbank, Raghuram Rajan, advarede i dag om, at verden befinder sig i en »voksende farlig situation« pga. de vestlige bankers tiltag med at trykke penge, mens deres fysiske økonomier er ved at kollapse. »Det internationale samfund har et valg«, fremførte Rajan. »Vi kan lade som om, alt står vel til med det globale, monetære ikke-

system og håbe på, at der ikke er noget, der går helt galt. Eller også kan vi begynde at opbygge et system, der passer til det 21. århundredes integrerede verden.«

Wall Street og City of London, der meget vel ved, at deres finansimperium er ved at smuldre, er af den mening, at det eneste svar er krig for at bryde den »trussel« mod deres magt, der kommer fra Kina og BRIKS-nationerne. Befolkningerne i USA og Europa bliver således tvangsfodret med en daglig dosis hysteri om »russisk aggression« og »kinesisk aggression«, i et desperat forsøg på at forhindre befolkningen i at se, at det nye paradigme, baseret på videnskab, udvikling og menneskeligt fremskridt, der er centreret omkring Kina og Rusland, er en kendsgerning. Selv, når amerikanere hader deres præsident og væmmes ved det klovneshow, der kaldes præsidentvalget, så forstår de ikke, hvorfor 80 % af det russiske folk støtter Vladimir Putin, og at over 90 % af kineserne støtter Xi Jinping.

Det er der en grund til. Det er baseret på at give befolkningen en fornemmelse af en fremtid, i en mission, der indbefatter fremskridt for hele menneskeheden – en vision, der engang var kendt som Det amerikanske System. Det må genoplives i Vesten og erstatte det døde pengesystem og den døende kultur. Alle borgere har ikke alene en andel i denne mission; de har også et ansvar for at virkeligøre den.

*Foto: Den tidlige bilfabrik Packard i Detroit, Michigan. Da fabrikken blev bygget, var den verdens mest moderne bilfabrik.*

**Info:** Indbyggertallet i byen Detroit er faldet betydeligt fra slutningen af det 20. århundrede og frem til i dag. Mellem 2000 og 2010 faldt indbyggertallet med 25 procent. I 2010 havde byen et indbyggertal på 713.000, et fald på mere end 60 % fra byens top-indbyggertal på 1,8 mio. ved folketællingen i 1950. Faldet skyldes, at Detroits industri, primært

bilindustri og maskinværktøjsindustri – realøkonomien – gradvist er blevet afmonteret, med den heraf følgende enorme arbejdsløshed. I 2013 blev byen erklæret konkurs, med en ubetalelig gæld på 1,8 mio. dollar.

Lyndon LaRouche har foreslået, at byens fabrikker ombygges – gennem Franklin Roosevelts politik med statslig kredit til investering i den produktive økonomi, i traditionen efter USA's første finansminister, Alexander Hamilton, også kaldet Det amerikanske System – til at deltage i produktion i forbindelse med LaRouche-bevægelsens foreslåede NAWAPA-projekt, samt i forbindelse med opbygning af et højhastigheds-jernbanenet i USA, og mens der endnu findes faglærte arbejdere, der kan være med til at videreføre deres knowhow til den unge, arbejdsløse generation, der aldrig fik chancen for at tilegne sig faglige, produktive færdigheder.

## **Putins strategi i Syrien: Det Westfalske Princip i praksis**

19. marts 2016 – Efter at der nu er gået flere dage, siden den russiske præsident Vladimir Putin gav meddelelse om den delvise tilbagetrækning af russiske militærstyrker fra Syrien, er de mere generelle principper, der ligger bag dette træk, ved at blive åbenbare for relativt kompetente iagttagere.

Fyodor Lukyanov, redaktør for *Russia in Global Affairs*, skrev i går en artikel i *Huffington Post*, hvor han går mere i detaljer med, hvorfor og hvordan, Putins strategi i Syrien har lagt fundamentet for en politisk afgørelse. Putin har gjort det, han sagde, han ville gøre lige fra begyndelsen, bemærker Lukyanov. Han bemærker desuden det fundamentale skel mellem det russiske og vestlige verdenssyn: »Fra Moskvas standpunkt kan kun støtte til legitime regeringer, selv de ikke-demokratiske, i det mindste sinke det overvældende kollaps af det regionale sikkerhedssystem og understøtte generel stabilitet. Alle ambitioner om at forbedre den måde, nationer regeres på, fører til ukontrolleret socio-politisk ekspllosion og nedtagelse af institutioner, hvilket er den bedste måde at skabe et vakuum for terrorisme på. Den vestlige fremgangsmåde er den modsatte: autoritære og dermed 'onde' regeringer bør erstattes af demokratiske, 'gode' regeringer. Det er derfor, det russiske mantra lyder 'rør ikke ved det, der er tilbage', alt imens det vestlige mantra er 'diktator må væk'. Dette er grunden til, at Ruslands fremgangsmåde over for Syrien var at styrke staten, i modsætning til de amerikansk anførte operationer for regimeskift.«

I henseende til at skabe betingelserne for en politisk afgørelse har Moskva ændret betingelserne på jorden. »Oppositionen har ikke længere noget håb om at vinde militært, og det samme gælder for regimet efter en eventuel exit af russiske tropper [selv om en iagttager påpeger, at der har været meget få russiske tropper på jorden, mens luftstøtte til den syriske hær fortsætter, -red.]. Moskva ønsker ikke at blive et gidsel for Damaskus' politik, der søger at bevare status quo«, skriver Lukyanov. »Men det er kun få i Moskva, der mener, at det nuværende syriske regime vil holde længe uden ændringer. Syrien har brug for dybtgående reformer for at genoprette staten. Og Moskvas beslutning om delvis at trække sig tilbage er også et signal til de syriske myndigheder om, at Rusland ikke vil gøre deres arbejde for dem.«

Krigen mod ISIS må nu vende sig mod en krig på jorden, ideelt set med en forenet indsats fra både regeringens og oppositionens styrker. »Men dette kan kun opnås gennem en politisk proces«, skriver Lukyanov. »Ved at intervenere i oktober viste Moskva oppositionen, at den ikke kan forvente at vinde denne krig«, konkluderer Lukyanov. »Ved nu her i marts at trække nogle styrker ud, sender Rusland det samme signal til regimet: det kan ikke forlade sig på russisk militærmagt for at vinde en total, militær sejr.« Syrien vil forandre sig, men det vil blive et Syrien, hvor Moskva kan indgå med alle parter, og dette vil give mulighed for en politisk afgørelse.

Den tidligere officer i MI6, Alistair Crooke, skrev også en artikel i *Huffington Post* og fremfører, at Ruslands tilbagetrækning ikke så meget er en tilbagetrækning, som det er en rotation af styrker, idet russiske styrker aktivt støtter den syriske hær dér, hvor den er i kamp mod ISIS. Men hvad så siden, man ønsker at kalde det, så er det »et temposkift, der med overlæg bruges til at metastasere politikken, til med et voldsomt stød at vælte politikken af sporet og ud på nye veje«. Efter Crookes mening kunne en kickstart af forhandlinger mellem parterne i konflikten være mindre vigtig for Putin end at fremtvinge reelt samarbejde fra USA's side, men han har under alle omstændigheder opnået begge dele. »Putins tilbagetrækning – eller rotation – har utvivlsomt galvaniseret den politiske ramme på forskellig vis. Det lægger pres både på Damaskus og på de oppositionsgrupper, der deltager i Genève-forhandlingerne – med mindre hele den russiske luftstyrke af en eller anden grund skulle blive tvunget til vende tilbage«, skriver Crooke. »Mere end noget andet, pålægger det USA det ubehagelige ansvar at standse sine allieredes (Tyrkiet, Saudi-Arabien og Qatar) bevæbning og finansiering af deres stedfortrædere i denne krig.«

Crooke fortsætter med at sige, at der er en fælles tråd, der løber igennem både krisen i Ukraine og Syrien for Putin: at undgå en konfrontation med NATO og Vesten, men han antyder, at

et arrangement i stil med Minsk-aftalerne ikke ville passe til Syrien. Syrien var før jihadiernes ankomst ikke en sekterisk nation, så den form for føderalisme, som Rusland gerne ser i Ukraine, ville ikke fungere i Syrien. Men den virkelig interessante del af Crookes rapport er indikeringen af, at det intense, russiske arbejde for at skabe våbenstilstand på jorden – flere end 40 sådanne lokale våbenhviler er blevet underskrevet – i realiteten er en flanke imod saudiernes potentielle sabotage i form af den Høje Forhandlingskomite. »Hvis Genève-processen slår fejl, vil vi få en proces fra bunden og op at se i stedet«, skriver Crooke. Han burde have sagt det ligeud: denne indsats er en flanke imod den saudiske sponsorerede Høje Forhandlingskomite. »På basis af disse aftaler, af hvilke nogle er blevet forhandlet af FN og andre af den syriske regering, vil lokale valg slutteligt blive afholdt. Dernæst regionale valg. Dernæst valg til parlamentet. Forfatningen vil blive revideret. Og slutteligt vil præsidentvalg blive afholdt under international overvågning. Kort sagt, så ville syrere – både hjemme og i eksil – slutteligt træffe beslutning om deres egen styrelse.« For at dette skal kunne lade sig gøre, er det dog afgørende med tillid mellem USA og Rusland. Der er intet andet valg på bordet nu, hvor regimeskift er taget af bordet.

---

## **Et håb for USA og Europa: Asiens og Ruslands lederskab**

*21. marts 2016 (Leder fra LaRouchePAC)* – Kollapset af de transatlantiske landes finanssystemer er nært forestående. Det er netop blevet signaleret i Den europæiske Centralbanks chefs meddelelse om, at de nu undersøger at kaste »helikopterpenger« ind i bankkonti i hele Europa; og i den tyske Centralbanks

chefs eksplorative offentlige udbrud imod denne inflationsskabende plan. Centralbankerne har forsøgt enhver form for bailout i syv år, og finanssystemerne er nu ved randen af et gennemgribende kollaps.

Nationerne må nu dramatisk og omgående ændre deres politik for at redde deres økonomier og befolkninger fra Wall Streets og City of Londons kollaps.

Og der er kun én kurs for ændring, der vil lykkes: den politik, der er modelleret efter præsident Franklin Roosevelt's politik – med nedlukning af Wall Streets kasinoer og udstedelse af statslig kredit til produktive formål – men koordineret på globalt plan.

Til at gennemføre dette kan lederskabet kun komme fra Asien: fra Kina, Rusland og Indien.

Kina er i færd med at bygge landbroer tværs over Eurasien og ind i det kollapsede Europa, og endda muligvis ind i USA via Beringstrædet. Inden for to år planlægger Kina at landsætte et rumfartøj på Månen bagfra og observere og undersøge universet på måder, der hidtil ikke har været muligt fra Jorden eller fra fartøjer i kredsløb. Kina og Indien er nu verdens mest dynamiske rumnationer.

Kinas »Nye Silkevejspolitik« med udstedelse af kredit og opbygning af broer, der spænder over kontinenter, med ny, økonomisk infrastruktur, står måske også på randen af at bringe økonomisk udvikling til Mellemøsten og Nordafrika. Dette er fundamentet for en varig fred og stabilitet. At føre den Ny Silkevejs udvikling gennem Mellemøsten og Nordafrika, og erklære ørkenen krig, er det eneste udviklingsperspektiv for hele denne region. Og det er den eneste basis for at vende Europas »flygtningekrise« omkring.

Vladimir Putins initiativ i Syrien har vendt kurserne for anliggender i Mellemøsten hen mod en forhandlet fred og stabilitet, for første gang, siden George W. Bush'

katastrofale krig i Irak.

Dette er lederskab.

Den ganske lille styrke, der har katalyseret dette lederskab, har været LaRouchePAC og Schiller Institututtet. Hen over 30 år er Lyndon og Helga Zepp-LaRouches politik med den »Eurasiske Landbro« blevet Kinas politik, især over for Rusland og Indien. I et gennembrud i sidste uge i Cairo blev det offentligt Egyptens politik, gennem en konference med repræsentant for Schiller Institututtet Hussein Askary og Egyptens transportminister som hovedtalere.

Ved afgørende konferencer 23. marts i Frankfurt og 7. april i New York City vil denne politik blive forelagt europæiske nationer og USA: Gå med i Den nye Silkevej, tag lederskabet i Asien og samarbejd med det, eller gå ind i en håbløs bankerot. Alt afhænger af disse begivenheders succesfulde indflydelse.

---

*Foto: Begyndelsen af Silkevejen, Xian, Kina. Kinas nye økonomiske Silkevejs-udviklingspolitik, »Ét bælte, én vej«, er åben for tilslutning fra alle nationer. (CC BY-SA 2.0)*

## »Vi kan skabe et mirakel« Interview med Helga Zepp-LaRouche

Jeg mener, at det nye paradigme allerede er synligt; jeg mener, at samarbejde om menneskehedens fælles mål om at overvinde sult og ophøre med ideen om krig som et middel til løsning af konflikter i en atomvåbenalder, er et 'must', hvis

*man ønsker at eksistere. Der er andre områder, f.eks. samarbejde om udviklingen af fusionskraft, som ville give menneskeheden energisikkerhed, ressourcesikkerhed; det fælles arbejde i rummet; jeg mener, der er så mange fantastiske områder, inden for hvilke vi kan blive virkelig menneskelige, så jeg tror, vi må vække befolkningerne til at se hen til disse løsninger.*

## **EIR intervernerer i NATO-konference i København**

*18. marts 2016 – »Fra Wales til Warszawa: at transformere NATO i et uforudsigeligt sikkerhedsmiljø«, lød titlen på den konference, som det danske Udenrigsministerium og den britiske og polske ambassade i dag var vært for. Titlen refererer til NATO-topmødet 2014 i Wales, Storbritannien, samt det forestående topmøde 8.-9. juli i Warszawa, Polen. Effekten af de forholdsregler, som der vil blive stillet krav om under konferencen, vil være at intensivere NATO's konfrontationskurs, især imod Rusland.*

Mødets præmis var, at NATO må være mere forberedt i sin tredje, nuværende fase. Disse karakteriseredes som: Fase 1: den Kolde Krig efter Anden Verdenskrig; Fase 2: indskrænkningen af NATO-styrker efter Sovjetunionens sammenbrud; og, Fase 3: den uforudsigelige trussel fra øst – fra Rusland – der begyndte for to år siden efter den »russiske

aggression« i Ukraine/Krim, og som inkluderer den russiske offensiv i Syrien og truslen fra syd – opkomsten af Daesh/Islamisk Stat, så vel som også andre trusler, som den førende, britiske taler kaldte »dragerne« (med reference til Kong Arthurs riddere), en vending, der blev gentaget mange gange under konferencen.

Der var en masse snak om at opbygge en troværdig »afskrækkelse« og om den politiske vilje til at anvende den, om nødvendigt; permanent fortsættende adaptation til uforudsigelige, farlige udfordringer; 360 graders årvågenhed over for trusler fra alle sider, osv.

*EIR* fik mulighed for at stille det første af to spørgsmål til panelet af hovedtalere: den danske udenrigsminister Kristian Jensen, Storbritanniens permanente repræsentant i NATO Sir Adam Thomsen, samt generalmajor Romuald Ratajczak fra Polens Nationale Sikkerhedsbureau.

*EIR* (præsenterer sig): »Jeg må sige, at jeg er uenig i nogle af antagelserne. I taler om den »russiske fortælling« [Kristian Jensens vending om russiske påstande om, at NATO's handlinger er i færd med at føre til konfrontation og krig]. Spørgsmålet er, hvornår er NATO's opbygning af beredskab i realiteten en provokation, en forøgelse af ustabiliteten? For eksempel taler man om, at USA's beslutning om at firedoble forsvarsbudgettet langs den russiske grænse, forøger faren for atomkrig.

På den anden side har vi nu en mulighed, medfredsforhandlingerne i Syrien, hvor USA og Rusland arbejder sammen, og hvor vi har sagt, at der må være et økonomisk element. Hvis USA, Rusland og Kina arbejdede sammen om at opbygge en Marshallplan for Mellemøsten, så ville det være en kongevej til både at reducere spændingerne mellem USA og Rusland, og til på samme tid at opbygge stabilitet i Mellemøsten. Uden denne økonomiske komponent vil dette ikke findes der.«

Udenrigsminister Kristian Jensen: (parafrase) Han støtter USA's beslutning om at føredoble budgettet for det europæiske område. Ikke for at forøge spændingen, men som en konkret respons til et konkret skift i Ruslands holdning. Rusland tog NATO's beslutning dette forår om at udvide NATO som en aggression, hvilket det ikke er. Ethvert land har ret til at vælge, om det ønsker at tilslutte sig NATO. Jeg er enig i, at vi må se på, hvordan samfund kan opbygges efter en krig. Danmark er meget involveret i Irak og Syrien, hvor vi har skubbet Daesh (IS) tilbage.

Storbritanniens NATO-repræsentant Sir Adam Thomsen: (parafrase) 1. Vi bør engagere Rusland, hvor vi kan – Iran-aftalen, den potentielle aftale i Syrien. 2. Hvis Rusland ikke længere respekterer de europæiske sikkerhedsregler, er det klogt at være forberedt, hvis dette brud skulle blive brugt imod én. 3. NATO's planlagte respons i øst er så let, som den kan være, når man konfronteres med Rusland, der sender signaler som at overflyve Bornholm [som Kristian Jensen sagde, angiveligt fandt sted under mødet, hvor hele den danske politiske klasse var til stede]; når man konfronteres med Ruslands overvældende evne til at mønstre styrker, som 80.000 tropper, inden for 72 timer, i sammenligning med 1.500 NATO-tropper i en forstærket troppetilstedeværelse. Rusland føler sig muligvis provokeret, men er det rimeligt?

Generalmajor Romuald Ratajczak, Polen: (parafrase) Vi ønsker i høj grad det Europæiske Forsikringsinitiativ (USA's foreslæde forøgelse). Han ønskede også den amerikanske hærs forud anbragte lager i Østeuropa. Han ønsker at afsløre propagandaen om, at NATO skulle have aftalt, ikke at deployere langs den østlige front. Dette blev betinget af »indtil situationen ændrer sig«, med et citat fra Rusland/Nato stiftelsesdokumentet, »i det nuværende og fremtidigt overskuelige sikkerhedsmiljø«, og forstærkninger, snarere end en permanent udstationering, er ikke udelukket.

Der er meget mere at sige fra konferencen, men dokumentation

vil blive overgivet til *EIR's* relevante militære reportere.

# **Putin: Rusland er forpligtet over for fredsproces i Syrien; fortsat militær årvågenhed over for terrorisme**

17. marts 2016 – Den russiske præsident Vladimir Putin holdt i dag en tale i Kreml ved en ceremoni for præsentation af statsmedaljer til dem, der deltog i den militære operation i Syrien. Flere end 700 officerer, mænd og kvinder fra luftstyrkerne, styrker på jorden og flåden, deltog i ceremonien i Skt. Georgs Sal sammen med repræsentanter fra den militær-industrielle sektor.

Præsident Putin bekræftede, at russisk militærstøtte til Bashar al-Assads regering vil fortsætte, og at den russiske flygruppe hurtigt kunne deployeres tilbage til Syrien, om nødvendigt.

»Hvis det bliver nødvendigt, vil Rusland være i stand til at forstærke sin gruppe i regionen i løbet af få timer til en størrelse, der kræves i en specifik situation, og at bruge alle de tilgængelige muligheder«, sagde Putin. »Det er ikke

noget, vi ville ønske at gøre. En militær eskalering er ikke vort valg. Derfor regner vi stadig med begge siders sunde fornuft, med tilslutning fra både de syriske myndigheders og oppositionens side til en fredelig proces.«

Den primære opgave for den tilbageværende russiske styrke i Syrien »er at overvåge våbenhvilen og skabe betingelser for en intern, politisk dialog i Syrien«, sagde Putin, inklusive elementer fra luftforsvaret for at forsvare dem. Han bekræftede også, at Rusland har hjulpet med at genoprette det syriske luftforsvars kapacitet, der tydeligvis er et meget skarpt budskab til Tyrkiet og andre magter, der stadig kunne have ambitioner i stil med Sykes-Picot i Syrien. »Vi går frem fra fundamentale, internationale normer: ingen har ret til at krænke et suverænt lands luftrum, i dette tilfælde Syrien«, sagde Putin. »Vi har, sammen med den amerikanske side, skabt en effektiv mekanisme for at forhindre hændelser i luften, men alle vores partnere er blevet advaret om, at vores luftforsvarssystemer vil blive brugt imod ethvert mål, som vi vurderer som en trussel mod russisk militærpersonel«, fortsatte han. »Jeg vil gerne understrege: ethvert mål.«

Russisk støtte til den syriske regering vil fortsætte i form af finansiel hjælp, forsyninger af udstyr og våben, hjælp til uddannelse og opbygning af syriske bevæbnede styrker, støtte til rekognoscering og hjælp til hovedkvarterer til planlægningsoperationer.

Mod slutningen af sin tale mindede Putin atter om Ruslands lektier fra Anden Verdenskrig, der har formet hans syn, som Lyndon LaRouche har påpeget, selv om Putin endnu ikke var født. Han bemærkede, at de nyeste russiske våben bestod prøven, ikke på øvelsesområder, men i ægte kamp. »Livet selv har vist, at de er en pålidelig garanti for vores lands sikkerhed«, sagde han, og dernæst, »Vi bør holde os de trusler for øje, der kommer, når vi ikke gør tingene til tiden; vi bør huske lektien fra historien, inklusive de tragiske begivenheder fra begyndelsen af Anden Verdenskrig og den Store

Patriotiske Krig, den pris, vi betalte for fejltagelser i militærbygning og planlægning, og manglen på nyt militærudstyr. Alt bør udføres til tiden, hvorimod svaghed, sjusk og forsømmelse altid er farligt.«

# Hvad betyder Ruslands militære tilbagetrækning fra Syrien for den fredsproces, der er begyndt i Genève?

Fra LaRouchePAC Fredagswebcast

18. marts 2016

*Alt dette er et mål for det faktum, at det transatlantiske område er dødt; og det vil kun begynde at vende denne død omkring, hvis der finder en revolutionær, fundamental forandring sted i politikken. Denne alternative politik gennemføres i det eurasiske og asiatiske Stillehavsområde, anført af Kina, af Rusland, og er reflekteret i den måde, hvorpå præsident Putin har nавигeret den strategiske*

*situation.*

Så den store trussel kommer fra det faktum, at et døende Britisk Imperium – der er uigenkaldeligt dømt til undergang – kæmper for sit liv og forsøger at bevare noget, der ikke længere kan bevares.

# **Det frydfulde ved at skabe overraskelser!**

## **LaRouchePAC Internationale Fredags-webcast 18. marts 2016**

Engelsk udskrift: I denne uge får vi en opdatering fra Kesha Rogers i Texas, som anfører en politik for en genoplivelse af det amerikanske NASA-rumprogram; Jason Ross fortsætter sagaen om Gottfried Leibniz; og Jeffrey Steinberg giver os Lyndon LaRouches analyse af betydningen for fredsprocessen i Syrien af de seneste udviklinger, med den russiske militære tilbagetrækning.

– DELIGHT IN CREATING SURPRISES! –

International Webcast March 18, 2016

MATTHEW OGDEN: Good Evening! It's March 18th, 2016. My name is Matthew Ogden, and I would like to thank you for joining us for our weekly Friday evening broadcast, here, on

larouchepac.com. I'm joined in the studio tonight by Jeffrey Steinberg from {Executive Intelligence Review}; and Jason Ross,

from the LaRouche PAC science team; and we're joined via video by

Kesha Rogers, multiple-time candidate for Federal office from the state of Texas, and leading member of the LaRouche PAC Policy Committee.

All of us had a chance to meet with Mr. LaRouche, both in person and via telephone connection (in the case of Kesha), earlier this morning. Mr. LaRouche had some very definite and specific ideas which he wished for us to convey. Mr. LaRouche was

{emphatic} when we met with him earlier today, that the global agenda right now is being set by Russia and by China, and their

allies. He said that the initiative in creating the future and shaping present global policy, lies with those two countries, strategically – in the case of Russia, as is very clear with what is occurring in Syria right now; and economically and scientifically – in the case of China.

You can see very clearly that the outdated and archaic methods of the trans-Atlantic system are proving to be impotent,

both in the case of resolving the current grave crises which are

facing mankind as a planetary species right now, but also impotent in setting the agenda and fulfilling and laying out the

vision for the future of mankind. The mission which has been undertaken by China, in terms of their objective to explore the

far side of the Moon – something which is going to be unfolding

over the coming two years – exemplifies the necessary identity which mankind must have in order to affirm and to fulfill our

true nature as a creative species.

Mr. LaRouche stated that something that we should develop, in dialogue with him and with each other, is to think about the

open questions, the unanswered questions about how is mankind, a

species, reflective of a much larger, and as yet not fully understood, creative characteristic of the galactic system as a

whole. This is a relationship which Johannes Kepler drew out in

very unique detail in terms of his discoveries about our {Solar}

System, but we have many, many large and unanswered questions of

what is the role of the human species in our relationship to the

galactic system as a whole, and then the complex of galactic systems as a much, much larger whole.

Mr. LaRouche said that this mission to explore the "dark side" of the Moon, so-called, is a pathway in order to begin to

understand even the opening of the questions along these lines.

The dark side of the Moon, his hypothesis was, is where you can

find some of the shadows of this much larger system, have insight

into it, and also to begin to understand mankind's role as reflective of these broader creative processes which are involved

in these great astronomical systems.

This is the spirit of the United States at our best. Our republic was founded on these kinds of unique ideas, as we've discussed here in previous weeks. The role of the great philosopher and scientist Gottfried Leibniz is a major contributor, a "founding father", or "founding grand-father"

of our republic. This is something which I know Jason Ross has presented multiple times and is in the process of having a series of developing classes on that subject; and I'm sure we'll be part of his discussion later today.

But also, this is what you can see in a great statesman, such as Abraham Lincoln – very, very much so. Franklin Roosevelt; and John F. Kennedy. Tragically, that spirit in the United States has deteriorated drastically. We see now that the leadership does indeed lie with China and with Russia; and this is something which Kesha Rogers, who is joining us here today, wrote about in an editorial which is appearing in this week's edition of the {Executive Intelligence Review} magazine. Kesha's editorial is titled, "To Save the United States Economy, Revive the Space Program."

Kesha and I had a brief conversation earlier this afternoon. I know she has some broader ideas to develop on this subject, so, without further ado, I would like to hand over the podium to Kesha Rogers.

KESHA ROGERS: Thank you, Matt. I think I'd like to start, first of all, by continuing to develop what has and must be the focal point by which we come to understand the necessity for the revival and the defense of, not just the American and U.S. space program, which I have continued to be a leader in championing the development and the necessity of our space program and what it

truly represents for the progress of all mankind. But just on the editorial that I wrote, I think, to understand it, it's not just from the standpoint of looking at the economic conditions of the United States and some practical applications to economics that the space program will provide; but we also have to look at it from the standpoint of is, the space program as a true conception of real economic value. This is what's actually missing from our thinking and what has been attacked by the current Wall Street/British imperial system, is that economic value is based, from {that} standpoint, on monetary value and not on the creative powers and progress of the human mind.

The real question at hand right now, is to bring about – as we're seeing and will be developed further in these discussions today – a new conception of what is the identity and what is the purpose of mankind. I have continued to use the example and the works of the great pioneer of space flight, space pioneer Krafft Ehricke; and looking at his conception of mankind as a space-faring creature, as the understanding of mankind's "extra-terrestrial imperative," as that which must be identified and understood.

If you look at the conditions of the space program and why it's so important, you take the example, for instance, of what China is doing now, as completely rejecting this monetarist policy; that the space program is not how much money you're

going to put into pet projects and specific projects. It is creating something that's never been created before, to actually create a new conception and identity of mankind, from the standpoint of the idea of acting on the future. That's what this idea and what is being developed, for instance with China in their investigation of the far side of the Moon. People may look at this, "Well what is this going to benefit us? How is this going to improve the economic conditions, in terms of monetary value, or any of this?" But that is the wrong way to look at it; because the problem right now is that what you have seen is two different opposing conceptions of the view of mankind. One coming from the trans-Atlantic system, coming from a collapsing imperial system that has been based on money and monetary value that is dying; and the other is represented by what Russia and China are doing. And as Matt emphasized and what I developed in my recent writing, was that this was the mindset of the great leaders of our nation, represented by the ideas of Alexander Hamilton, of Franklin Roosevelt, Abraham Lincoln, [and] John F. Kennedy. It wasn't just on the creating of new projects per se, but on a whole new different conception of the identity of mankind. And so, you take for instance, the example of what we accomplished in the United States, of landing a man on the Moon – the idea that Kennedy put forward, that by the end of decade we would land a man on the Moon and return him safely to Earth. What was the vision and intention behind that? Was it just the idea that we would go and plant our flag on the Moon? This would

be some short-term gratification and so forth? Or, was it a forward-thinking outlook, in terms of the direction of mankind in

recognizing what Krafft Ericka, the great pioneer of space flight, recognized, that mankind was not just a creature of the

planet Earth. We were not just a part of, as he called it, a "closed system," and so it was our responsibility to go out and

to do what no other animal had the capability of doing; of actually conquering and developing, coming to understand what is

the purpose of mankind and what is the development of mankind in

the universe as a creature of our solar system and of the galaxy

as a whole.

One thing that I thought was very insightful, is that Krafft Ericka wrote about the understanding of the Renaissance, the Classical Renaissance, as an achievement of human progress. And

also the Classical Renaissance is something that contributed to

the development of what became our space program and what was the

intention that guided the direction of space travel and the space

program.

I'll just read a quick quote from what he expressed on this idea. He says, "The development of the idea of space travel was

always the most logical and most noble consequence of the Renaissance ideal, which again places man in an organic and active relationship with his surrounding universe and which, perceived in the synthesis of knowledge and capabilities, its highest ideals."

So you look at this from the standpoint of Krafft Ericka

understanding that the Renaissance that was guided by the scientific breakthroughs which I'm sure you'll hear a lot more from my colleague Jason there, of Brunelleschi, or the breakthroughs that came about from the works of Kepler. That the

idea of mankind, is to create something fundamentally new, something that had never been created before, and increasing the relationship of mankind to the Universe.

Now that's economic value! That is not what is being discussed when you look at these debates going back and forth from the standpoint of these Congress Members to the space community, and what budgets are being cut and should not be cut.

But the reality is, as I stated before, we have to have, in the

defense of the space program, a new conception of the direction

of mankind. That means we're removing all limitations to progress, all limitations that are put on mankind's ability to continue to understand how to make new discoveries in the principles scientifically of what's out there. Why should we actually investigate the Solar System? What is our mission in doing so? And it's not about a money-making short-term gratification. And so, I think this emphasis that Krafft Ehricke

put on the renaissance as an ideal of looking at why we have, as

a human species, an extraterrestrial imperative, is really a continued expression of what you're seeing coming from China; not

just in their space program, but in the development of the win-win strategy of cooperation for all mankind, for every nation

to come to join together. And to further the progress of addressing the necessary challenges to the economic condition of

the planet by actually recognizing that the solutions do not lie right here on planet Earth.

So, I think that's the conceptions I wanted to get across; and what I hope to have further discussion on as we continue this

fight to identify what is the real mission of the space program,

and how we come to rid the world immediately of this current dead

system that's keeping us from advancing in the way that we should

be.

OGDEN: Thank you very much, Kesha; and I can recommend that people read what you've written in the current edition of {Executive Intelligence Review}. I also know that you're planning

on making a video statement – which will be posted on the LaRouche PAC website and available for people – developing some

of these ideas a little bit more in detail.

So, if people have been watching this website, you know that Jason Ross has also been working very closely with Kesha to develop some of these ideas with their implications from the standpoint of a scientist, whom I hope you are becoming more familiar with by now – Gottfried Wilhelm Leibniz. As we discussed last week on this webcast, I think if you begin to consider this question which Kesha just laid on the table for us,

about how do you create a future for mankind. How do you initiate

the creation of something which is completely new, as we move into the future? Now, this can never be done through the replication of the past; there's no precedent for a discovery.

A

discovery is something which is always new, and is created {de

novo} and is introduced, which changes the course of human history. Obviously, there is a lineage that goes back to Gottfried Leibniz, and many Leibnizians who have lived since him:

Karl Gauss; Bernhard Riemann; Albert Einstein; and I would even include Mr. Lyndon LaRouche in that lineage.

So, without further ado, I'm going to ask Jason to elaborate a little bit more; picking up on what Kesha just left off on.

JASON ROSS: Thanks, Matt. Well, I think if you consider how to conceptualize the value of the kinds of programs that Kesha was discussing that we're promoting today, you reach a contradiction if you try to approach them from a monetarist standpoint. That is, the kind of economics that's generally taught today, the kind of economics practiced as a religion – well, I was going to say as a religion on Wall Street; the primary religion on Wall Street is stealing – but, in general, the basis of thinking is that economy is about money; we can measure things in terms of money. How much is somebody willing to

pay for something? That's how valuable it is. That isn't. Money

doesn't measure different qualities; money doesn't measure the future potential that something is able to create. And if you base money on how much somebody's willing to pay for something,

you don't distinguish between things that are good and useful versus bad and vices. People are willing to pay for heroin; people are willing to pay for other opioids if they're addicted

to it. Does that mean that those drugs, as used by those people,

are valuable, or worth something because they're willing to pay

for them? Quite the contrary. So, we need a different way of thinking about how we can measure economic value if we're

going  
to be human economists, instead of Wall Street magicians or  
Satanists.  
So, the reason we have economy is that we aren't animals;  
animals don't have economies. Animals don't change what they  
do  
from generation to generation; they don't improve, they don't  
develop. We do. We create a new kind of time for ourselves. In  
a  
very real way, humanity is a totally new and totally distinct  
force of nature from anything else. Over geological time,  
geologists describe to us how the Earth has changed, or how a  
planet has formed; this is over hundreds of millions of years.  
Over evolutionary time, perhaps tens of millions of years,  
we're  
able to see transformations in the kinds of life that exists  
on  
the planet. Over biological time, we have short-term periods  
of  
the life of an organism, of its respiration, very much tied to  
the daily cycle of the Earth, for example. And with humans, we  
have a different kind of time. We create time. The flow of  
history isn't always the same speed.  
During the Dark Ages, when not much happened, you might say  
that human time slowed down. And with the Renaissance, and  
with  
the ability to discover more about nature by having a more  
powerful way of thinking about it, and a more powerful  
conception  
of us as human beings interacting with it; you could say that  
time sped up. We create a certain time in that we create new  
eras  
of humanity; not in the way that geology or evolution does,  
but  
willfully by developing new principles that if we were  
animals,  
you would say this is a whole new type of life all together.

Life

moving from the oceans onto land; that's a totally different quality of life. Life having developed photosynthesis and using

the Sun as a power source; that's a totally different kind of life. But we're still human beings after the discovery of the combustion engine, for example; the use of heat-powered machinery. We create in ourselves the change that's comparable only to large-scale evolutionary changes when we look at life in

general. So, we're distinct.

Now, how do we understand this? Both how do we understand that world around us that we act on and interact with; and how do

we understand our thoughts about it and our ability to progress

and use the practice of science itself? What sort of terrain is

it? What sort of world is it? The physical world and the mental

world.

Well, here's where I'd like to take up some concepts that Mr. LaRouche has been bringing up recently about Bernhard Riemann

and about Gottfried Leibniz, and a bit about Einstein, too, who

got the verification of his hypothesis of gravity waves announced

very near his birthday this year – which was on Monday. So, let's think about it. Is the terrain that we're operating on, one

which is steady and indifferent to our actions? Or, is it one where what we do and what we discover and how we interact with it, changes that world around us in a way that the world is not

fixed; either in ourselves or in our understanding of it? And, that is the case; we transform the world in changing our

mental understanding of it. The math that we use in understanding how do we conceptualize that world; that changes our interaction with it, and we're a force of nature. We change the operation of the forces of nature by improving our understanding of the world around us and of ourselves and our ability to discover such things. How can we possibly think about that quality of change?

As a couple of other examples, think about the difference between what you might say is a fixed object – let's say iron oxide. Iron oxide is basically rust; it's a mineral that's rust. It's reddish brown, it's not terribly useful; but with the development of metallurgy, instead of being a deposit of some compound, it's now a resource. It's an ore from which we can create iron and steel. The substance itself, did it change chemically? It did in terms of the potential of what we could do with it. And remember, we're a force of nature; we changed what it was. It has to be thought of that way.

Or, what's the value of a technology? How does it change over time? In the 1400s, windmills were a great invention; they were somewhat new on the scene. They allowed pumping water, they allowed grinding grain. That's excellent; that's a breakthrough.

Are windmills valuable today for making electricity? I don't think so. Consider helium; helium is an interesting element. It was first discovered in the Sun, not on Earth. It was discovered in the Sun by the kind of light that came from the Sun when that

light was broken up into a rainbow with a prism, and certain bands of the absence or presence of color were the clue that there was a new element out there named helium, after Helios, the

Sun. That element, what's it used for? You might think of it's being used to fill up balloons for children; you might think of

it being used as a gas for cooling for physical purposes or for

experiments. It's also, as Helium-3, an ideal fuel for fusion.

So, this substance transforms its meaning based on our developing

understanding. How can we think about this?

Well, let's take the example of Bernhard Riemann. In 1854, Bernhard Riemann delivered a presentation and a paper on the subject of the hypotheses that underlie geometry. That might sound like a dry title; it might sound like it has nothing to do

with physical economy or anything that we'd want to be doing right now. But this paper is very important in the view of Lyndon

LaRouche for his own development and as a way of understanding economics. So, let's say why. Very briefly, Riemann points out that our conception of space itself and of the way things operate

in space is taken for granted. The ideas that we use to understand it, they don't really come from experiments per se, or

from physical theories; they come from our thoughts about space.

For example, the idea that space has no particular characteristics of its own; that was the view of Isaac Newton. Newton said space is uniform, it's out there; things occur within

space. Space is there first, it's just space; it has no characteristics in particular. Newton said the same thing about

time; that time flows on uniformly. That's what time is; it's really not much of a definition, or an understanding.

Geometric ideas that people had, for example, are the idea that if you add up the angles in a triangle, you get 180 degrees.

Now, if you're drawing triangles on flat paper, yes that's true;

if you draw them on a curved surface like a sphere, it's not true. Triangles on a sphere have more than 180 degrees in them.

If you then ask, "What if I draw a triangle in space?"; that's a

tough question. When we connect points in space, is the space between them flat, is it curved? How could we discover that, and

what would be the basis of it having a curvature if it wasn't flat?

What Riemann does, is he discusses through all the possible ways that this could come about. He discusses in general, curvature – both of surfaces and of space; how a space could be

curved. He works out in general how you could do that; but he can't answer the question. He says, to answer the question, "What's the nature of the space, and which processes unfold?"; you have to leave the department of mathematics and you have to

go to the physics department. You can't answer questions like that just be pure reasoning; you got to have a hypothesis – "What physically makes space?" And in this way, he's coming back

to the view of Gottfried Leibniz, who, just to say very briefly,

Leibniz and Newton totally disagreed on a number of subjects. People may have heard of the dispute over their invention of the calculus; did Leibniz steal it from Newton, or vice versa? But there's a lot more there.

One of the major disputes they had was about space. Newton's view was that space and time were absolute; and Leibniz's view that space was a way of understanding co-occurrences. The relationship of things that are here at the same time – that's space; and for Leibniz, time was the evolution of things, how things change. But time didn't have its own existence. Now, that's precisely what Einstein took up in his theories of relativity; he did what Riemann said had to be done. He didn't finish the job; but he did what Riemann said had to be done. Einstein overthrew, in a very specific way, the outlook of Newton; Einstein showed that space was not flat, that it was bent

in special relativity, that it was curved in general relativity.

And very importantly, the basis of its shape, the basis of how things interact over distances – that sense of space – was based not on what a mathematician might imagine, but on what a physicist hypothesizes. Einstein hypothesized an equivalence between different observers that the laws of nature shouldn't depend on whether you're moving; something that Leibniz also said

very explicitly. Einstein considered that light moved at the same

speed to any observer; something he had been pondering since he

was a pretty young man. And he hypothesized that gravitation would transform the shape of space; that straight lines wouldn't

be straight to the extent that gravity is affecting them. This is

what was seen with the experiments about the position of stars around the eclipse of the Sun, performed earlier during Einstein's life; and it's seen in the recent verification of gravity waves.

So, most people acknowledge that Einstein, OK, this is physically important; this is a scientist, he discovered things.

What does it have to do with this other point, though, about understanding humanity, and our role in economy, and our creation

in economy? Well, what Riemann did was, he made it possible to say that human discovery is a force of nature; it reshapes nature, it transforms our understanding about the objects around

us. And the basis of that world outside of us, can't be considered independently of our increasing knowledge about it. What we know about the world around us changes it, in that it changes our ability to interact with it.

So, if we're looking for a real idea of what economics is, throw away any sense of monetarism that says money made in a whorehouse is just as valuable as money made in a steel plant; and instead say, "How do we foster scientific discovery? How do

we foster its social implementation through technologies that physically improve our power over nature and our ability to provide improving standards of living and promote the general welfare of human beings?" If this is our basis of economics, fostering that kind of outlook, then I think we can say that Gottfried Leibniz was the first physical economist in that sense.

I'll just reference to the show on Leibniz from earlier this week, and one of the documents I cited there; Leibniz's paper on

the creation of a society for science and economy in Germany. And

I think if you read that paper, you'll be astonished at how Leibniz pulls together both promotion of discovery, how that works, what kind of thoughts are needed, how people should work

together, and how to implement those thoughts to improve people's

lives to the betterment of mankind. And that really has to be the

basis of our economics.

One simple rough measure, proposed by LaRouche to measure this, is the potential population density. How many people can be

supported in a given area? That's a measure that is fixed for animals. For a certain kind of environment, the number of deer that can live there; deer don't change that. Human beings do. And

as a rough measure of economic progress, we could take that value. What's the potential population that we're able to support? The ability to use these thoughts is one that is not being expressed in the trans-Atlantic at present. In our discussion today, Mr. LaRouche talked about the positive impact

that Riemann had had on Italian science. Riemann had tuberculosis, and spent a good deal of time later in life – he didn't live that long – but later in his short life in Italy; where thoughts from Riemann influenced the development of hydrodynamics, stretching all the way into the time of airplanes

and the consideration of getting out into space.

Today, this overall outlook is best represented by Russia, and especially at present, by China. So, this doesn't have to be

a purely Chinese development; this is clearly something that we

can take up as a mission for ourselves to contribute to here in

the United States and in the nations around the globe. And we've

got very special and precious people in the past that we can look

to for insights in how to make the next breakthroughs in developing our understanding of what it is to be human, the basis

of human culture, and how best to advance human economy.

OGDEN: Thank you very much, Jason. Now, as Jason just

mentioned, and as I said in the beginning, really right now you

do see the initiative – the economic and the scientific initiative – being taken by China to lead mankind into the future; especially with the space program. You also see the initiative being taken by Russia; and this is very clearly illustrated this week with the actions that have been taken by Russia in Syria. The strategic initiative lies in Putin's actions

there. As Mr. LaRouche emphasized, Putin is setting the agenda;

he is constantly on the flank. You can see this going back to the

chemical weapons, where Putin took the initiative to say fine, we

will help Assad dismantle these chemical weapons. It can be seen

with the decision to intervene, a few months back, by Putin into

the situation in Syria; and then with the pull-out that happened

earlier this week. What's clear is that every step along the way,

Putin's actions have caught Washington and Obama by surprise; constantly breaking profile. And this is what's called "taking the flank" in a military sense. There's clear precedence, as Mr.

LaRouche always uses the example, of Douglas MacArthur's actions

in Inchon. You always, always act on the surprise.

Now, this was illustrated I think just anecdotally very well in an article that was published March 15th – Tuesday of this week – in the {New York Times}, with a very apropos headline which read "Putin's Syria Tactics Keep Him at the Fore, and Leave

Everyone Else Guessing". I just want to read the first paragraph

of that article, actually, because I think it just describes very vividly what we mean by this:

"President Vladimir Putin's order to withdraw the bulk of Russian forces from Syria seemingly caught Washington, Damascus,

and everyone in between off guard; just the way the Russian leader likes it. By all accounts, Mr. Putin delights in creating surprises."

So, this is the subject of our institutional question for this week; which Mr. LaRouche had some very specific words to say

in response to, which I'm going to let Jeff elaborate on for us.

But let me just read the text of this question to start off.

"Mr. LaRouche, as you know, earlier this week, at the start of the Geneva Peace Talks, Russian President Vladimir Putin announced that he ordered the withdrawal of some of the Russian

military forces in Syria. The withdrawal of Russian fighter planes began the next day and has continued. A residual force will remain at the naval base at Tartus and at the air base in Latakia. How do you view Putin's decision? How might it impact the Russian, American, and United Nations efforts to bring the Syrian war to an end, now underway in Geneva?"

STEINBERG: Of course, we've taking up the bulk of this week's report with a discussion about man's extraterrestrial imperative; the need for man to get off of the planet Earth, because man was never an Earthbound creature. So, we're at a point right now where Mr. LaRouche was delighted in our discussion earlier today at the prospect of over the next two years, China going through the preparations for the launching of an orbiter that will be hopefully landing on the back side of the

Moon. And will for the first time, give mankind a window into the Solar System and the Galaxy beyond. And this is something of enormous importance and enormous excitement, because it puts this nature of man as an extraterrestrial creature capable through creative discovery, of not remaining Earthbound, but of exploring the near Solar System and beyond. And it reminds me that virtually every astronaut and cosmonaut who has travelled in space, has remarked at one point or other, that having the vantage point of looking down on Earth, you become at one point overwhelmed with the fact that so much of what goes on, on the planet of Earth, is trivial relative to the challenges that are very obvious when you look at man from the standpoint of man's ability to explore the Universe and make these kinds of discoveries. And it was that approach that actually informed our discussion about the Syria situation per se. Because as Matt said, Russian President Putin has demonstrated once again that he has a certain understanding that at the core of grand strategy is always the idea of continuously moving; continuously flanking; continuously confusing your adversaries by constantly being on this kind of offensive. So, we do have the developments of the past days, where at the very moment that the Geneva second round of peace talks were beginning, President Putin announced a draw-down of the Russian military forces inside Syria. And in fact, the very next morning – Tuesday morning of this week – the first Russian bombers and other air force equipment and personnel began leaving. Now,

the

Russians are there still; make no mistake about it. Russia has established a fundamental change in the situation on the ground,

which is both a military shift and a shift at the diplomatic table taking place right now in Geneva. Russia has a permanent naval base fully established and more secured than at any time previously at the port of Tartus; and it has now a major air force facility in the Latakia province. And more recently this week, yesterday President Putin issued a statement where he said,

if the circumstances change, if the peace process does not go forward, then Russian forces can be reinforced in Syria, not in a

matter of days, but in a matter of hours. And quite clearly, the

infrastructure is in place for that to happen.

But Mr. LaRouche wanted to make a larger and much more fundamental point about what is going on here. What he emphasized

is that you can't lose sight of the fact that the war is still going on. We don't know how things are going to play out; what we

do know, is that there has been a change of conditions. In fact,

there was a major change of conditions beginning on September 30th of last year, when the major Russian military presence began. And when the situation systematically shifted from that point on, and yet at the same time, certain leading political figures around the world – the spokesman for the Jordanian government; Steffan de Mistura, the UN representative for Syria

– they all said, "We're not surprised by President Putin's announcement this past Monday." In the case of the Jordanians, the chief of staff of the Jordanian military, the chief of staff

of the Syrian military, were both in Moscow last October; and

they met with Russian Defense Minister Shoigu, they met with President Putin. And they were told quite clearly that the Russian mission was not a permanent mission; but was a limited mission in both size and in time duration. And that when the circumstances reached the point where it was feasible to reach a

diplomatic solution to the Syria crisis, that the Russian forces would begin to be withdrawn.

As Matt pointed out with the {New York Times} coverage, people in the West were scratching their heads, because they refused to take note of the fact that Putin is a strategic thinker. And very often, what he says – in most cases, in fact – is exactly what he intends to do; but he's not going to do it

in a predictable fashion. He's going to do it in a way that will

catch you by surprise. And the biggest surprise is that most political thinkers in the West, most officials in government in

the West, are ignorant and prejudiced. So, their own prejudices

prevent them from understanding how Putin thinks about these things. Their own prejudices prevent them from understanding because they're incapable of thinking in this kind of a strategic

fashion. Now the problem is, that we're still in a state of warfare; and that state of warfare will continue until certain things occur that go way beyond the borders of Syria.

Until the British Empire ceases to exist, there will be a condition of warfare on this planet. We see it, not necessarily

in the form of warfare that most people think about – soldiers shooting, artillery pieces firing, bombers dropping bombs. Look

what's happening right now in Brazil. The British Empire is waging a war against the new emerging Asia-Pacific-centered

global system. They're trying to destabilize Brazil, which is a founding member of the BRICS. There's a similar effort underway to destabilize the Zuman government in South Africa; because South Africa is the latest country to join in the BRICS initiative.

So, there are all kinds of problems going on; you can't look for a simply linear expectation or projection of what's going to happen by the situation now ongoing on the ground in Syria or in Geneva. Another example: President Obama is taking a series of measures that will lead unavoidably – unless they're reversed – to a major confrontation between the United States and China.

We had a report earlier this week from David Ignatius in the {Washington Post}, who is very often a kind of reliable leak sheet for what's going on inside the administration. And the Obama administration is preparing for confrontation with China over the South China Sea; they're waiting for a ruling from the

World Court in the Hague on a complaint filed by the Philippines.

So the United States is preparing contingencies for poking China in the eye, for carrying out new provocations against China. The

sanctions that President Obama announced this week, ostensibly against North Korea, are in fact sanctions against China; they go

way beyond what was agreed upon by China and the United States at the United Nations.

So, if you take all of these factors into account, and if you think of them as a process, not simply as a series of

discrete events, then you get a very clear idea of what Mr. LaRouche means when he says that the planet, in general terms, is

in a state of war. Now, ultimately what this state of warfare comes down to, is the fact that you have a new emerging Asia-Pacific-centered future. It's defined by the economic initiatives of China, by the One Belt-One Road policy, and most

emphatically by China's systematic plan for collaborating with other nations on the kind of space exploration that once was a hallmark of American policy; but has not been abandoned.

President Obama has spent the last seven years systematically taking down and dismantling America's space capability; and Kesha

is leading the fight to reverse that process.

Over the last 15 years, if you look at the Bush/Cheney administration followed by the Obama administration, the United

States has been under British occupation. Both Bush/Cheney and Obama were each, in their own way, governments that were at the

beck and call of the British Empire, of the policies of the British financial oligarchy operating through Wall Street. And as

the result, the United States, really the entire trans-Atlantic

region, is dead. Germany was once a great prospering economy; the

result of the "economic miracle" that Franklin Roosevelt envisioned for the post-World War II period; no replay of Versailles, but a completely different approach. Germany has now

been destroyed by the policies largely coming from the British Empire. All of continental Europe is hopelessly and irreversibly

bankrupt; and Mario Draghi's announcement of an expansion of quantitative easing and a zero interest rate policy is a

reflection that certain people are desperate over the fact that

Europe is doomed, that the United States under present circumstances. We've talked in recent months on this broadcast about the death rate increase in the United States; the true rate

of unemployment; the epidemic of heroin addiction and heroin overdose deaths; the declining life expectancy in the United States. These are all measures of the fact that the trans-Atlantic region is dead; and will only begin to reverse that death if there is a revolutionary, fundamental change in policy. That alternative policy is being carried out in the Eurasian and Asia-Pacific region; led by China, led by Russia, reflected in the way that Russian President Putin has navigated

the strategic situation.

So, the great threat is coming from the fact that a dying British Empire – which is irreversibly doomed – is lashing out and is trying to preserve something that can no longer be preserved. There was a time when the British Empire could impose

petty tyrannies on countries around the world and achieve a certain limited degree of stability. That's over with. All of the

efforts within the framework of the mindset of the British Empire, the mindset of the Obama administration, the mindset of

virtually all European leaders – the French probably the worst of the bunch on the continent – is doomed; it doesn't work. Yet,

there is an opportunity; and opportunity for all of mankind in what's going on in the Asia-Pacific region, led by China, by Russia. India is clearly stepping in to play a significant role

in this new emerging combination, cooperation among nations for

purposes that go beyond national interests, but address the

interests of all of mankind. Egypt is fully established as orienting towards that new Asia-Pacific combination.

So, this is the larger picture; this is the framework for judging the initiative taken by President Putin this week. And it

must be judged from the standpoint of the global consequences; and not just simply the consequences for the immediate negotiations around Syria. Although his actions this week have certainly greatly improved the possibility of bringing that five-year tragedy to an end.

OGDEN: Thank you very much, Jeff. I would just add, the initiative being taken by these countries also very much has to

do with the decades-long work Mr. Lyndon LaRouche and Mrs. Helga

LaRouche have undertaken. The One Belt-One Road policy that China

has adopted, is the Eurasian Land-Bridge policy which the LaRouche movement uniquely championed in the beginning of the 1990s. Now, you have an evolution of that to the World Land-Bridge; and this is what is documented so thoroughly in the

350-page Special Report that was issued by {Executive Intelligence Review} called "The New Silk Road Becomes the World

Land-Bridge". One very exciting announcement, because you mentioned Egypt, just this week there was a very high-level event

which was sponsored by the Transportation Ministry in Cairo; featuring a LaRouche collaborator, Hussein Askary, to announce the formal publication of the Arabic language of this full, 350-page World Land-Bridge Special Report from {Executive Intelligence Review}.

So, you can see that at the very highest levels of government around the world, this is what is shaping the discussion; the initiatives that the LaRouche movement have

taken for decades. And one final note along those same lines, as we announced last Friday, Mrs. Helga LaRouche just got back from a very important trip to India; at which she was one of the featured speakers in a very prominent, very high-level dialogue – the Raisina Dialogue. And if people have not seen it yet, a wonderful half-hour interview that Jason Ross conducted with Mrs. LaRouche was posted on the LaRouche PAC website earlier this week. So, if you haven't watched that yet, I would really encourage you to watch it; and to just think about everything that has been said here today. Think about these initiatives that are being taken by some of the world's leading countries to create the future; and think about the role that the LaRouche movement has played over years and decades in shaping the possibility of these initiative being taken today.

So, thank you all very much for joining us here today. I'd like to thank Kesha Rogers for joining us over video; and I would like to thank Jeff and Jason here in the studio. Please stay tuned to larouchepac.com. Good night.

**Se virkeligheden i øjnene:  
Den transatlantiske verden er  
dømt til  
undergang – Og menneskehedens  
fremtid ligger i Eurasien**

*16. marts 2016 (Leder fra LaRouchePAC) – Skribent på Daily Telegraph, Ambrose Evans-Pritchard, er blevet fuldstændig hysterisk over sin seneste »opdagelse«, nemlig, at det transatlantiske område nu går ind i en hyperinflationsnedsmelting. I realiteten burde enhver, der er ved sin fornufts fulde fem, for længst have indset, at USA og Europa allerede er dømt til undergang. USA's økonomi er håbløs, og intet, undtagen et totalt skifte i politik – der går bort fra troen på penge over menneskelig kreativitet – kan forhindre den totale ødelæggelse. Ingen økonomisk genoplivelse, eller blot økonomisk overlevelse, kan forekomme under den aktuelle politik. Det er et under, at USA stadig eksisterer på dette tidspunkt, da der ikke er nogen mekanismer til at redde*

økonomien.

Krisen kommer til udtryk på en mere grafisk måde, når man ser på de himmelstormende rater for selvmord, dødsfald som følge af narkooverdosis og den faldende forventede levealder i USA.

Vi står på randen af et globalt kollaps, som det transatlantiske område umuligt kan overleve. Krakket kan komme, hvad dag, det skal være, og det er denne realitet, der har udløst hysteriet fra sådanne som ECB-chef Mario Draghi og bladsmører for den britiske krone, Evans-Pritchard.

Eneste mulighed for det transatlantiske område er at annullere Wall Street og [City of] London – udslet dem totalt, og gennemfør så en total ændring af konceptet for det økonomiske system.

Der er to, uforenelige koncepter for økonomi. Der er det britiske/Wall Street-koncept om penge, penge og efter penge. Penge i sig selv, har intet med virkelig værdi at gøre. Det alternative system, Hamiltons system, som FDR forstod og gennemførte, afviser penge; afviser Wall Street. Dette system bygger på menneskelige opdagelser, der omsættes i videnskabelige og teknologiske fremskridt, som skaber virkelig rigdom og fremmer menneskets vækst.

Præsident Franklin Delano Roosevelt havde disse koncepter og omsatte dem til praktisk handling som præsident – indtil FBI og Republikanerne lukkede Roosevelt-programmet ned, selv inden hans død i utide. Intet som helst system, der bygger på penge og finans, kan fungere, og dette var, hvad FDR forstod.

Den russiske præsident Vladimir Putin opererer ikke ud fra et pengeorienteret system. Det kinesiske lederskab under Xi Jinping opererer ikke på basis af et pengeorienteret system. Eurasien er i færd med at blive organiseret på basis af helt andre principper, anført af Kinas bestræbelser for at realisere menneskets udenjordiske forpligtelse. Denne idé blev fremvist på den sidste dag af den Nationale Folkekongres, der

netop er sluttet i Beijing, da en af de delegerede fra Folkets Befrielseshær, Kinas første, kvindelige astronaut, gav et magtfuldt interview til CCTC om udsigterne for Kinas rumprogram. Kina er også godt på vej til at bygge verdens første, kommercielle højtemperatur-gasafkølet reaktor. Det er realøkonomi – og ikke det vanvid med penge, penge og flere penge, der har plaget USA, siden FDR's død, med ganske få, momentvise undtagelser.

På en anden måde personificerer den russiske præsident Putin det samme princip: Nøglen til alt, hvad Putin har gjort for at vende situationen i Syrien, er, at han altid er i bevægelse, altid finder på en overraskelsesflanke – på det strategiske niveau. Putin er sig udmarket bevidst, at han ikke handler alene, men at han opererer på vegne af et partnerskab med Kina. Dette gjorde Li Kiqiang klart i sin afslutningstale til den Nationale Folkekongres: Ingen tredjepart vil få lejlighed til at ødelægge det strategiske partnerskab mellem Kina og Rusland. I Indien har premierminister Modi lanceret en revolution i landbrugssektoren, som er fuldstændig afgørende for Indiens fremtid. I sit nye budget har han annonceret en 84 % 's forøgelse af investeringer i landbrugssektoren – oveni i relaterede investeringer i veje, jernbaner og produktion af kemiske produkter og godtning.

Putin drives af en dyb, personlig erfaring. En stor del af hans familie døde under nazisternes invasion af Sovjetunionen under Anden Verdenskrig. Denne erfaring former hans tankegang. Uden en erkendelse af, hvem Putin er som verdensleder, og hvor han kom fra, er det umuligt at forstå hans handlinger. Det er grunden til, at det store flertal af de såkaldte »strateger« i Vesten er forvirret over hans flankeoperationer.

---

# **Putins »overraskelse« er hans normale kreative praksis, som amerikanere må lære at beherske**

*15. marts 2016 (Leder fra LaRouchePAC)* – Den vestlige verden var forbløffet i mandags, da præsident Vladimir Putin annoncerede begyndelsen på en tilbagetrækning af Ruslands militære styrker i Syrien – lige så pludseligt og uventet, som han indledte interventionen sidste september. Men Vestens overraskelse skyldes ikke Putin, men den kendsgerning, at stort set ingen i Vesten forstår, hvordan Putin tænker. Han er måske den største strategiske tænker siden general Douglas MacArthur, en fremtids-tænkning af en kvalitet, som i svær grad mangler i USA og Europa i dag.

I en tale, der blev vist over Tv, sagde Putin, der optrådte sammen med sin udenrigsminister Sergei Lavrov og sin forsvarsminister Sergei Shoigu, at missionen stort set var gennemført, og at terroristernes offensiv imod den syriske stat var blevet knust og ved at blive drevet tilbage – en betydningsfuld sejr over terror på internationalt plan. Han bemærkede, at, mens terroristernes styrker, som hans vestlige venner støttede, vandt frem, var disse vestlige venner ikke interesseret i fredsforhandlinger, men havde nu ombestemt sig til at gå med i fredsindsatsen. Han gjorde det klart, at den russiske støtte til den syriske hær imod ISIS og al-Nusra ville fortsætte – en indsats, som de kompetente ledere inden for USA's militær og udenrigstjeneste støtter.

Flere politiske og militære kilder har informeret *EIR* om, at der finder intense diskussioner sted bag scenen, langs den linje, som samarbejdet mellem Kerry og Lavrov har lagt, og som vil blive afsløret i de nærmeste dage.

Lyndon LaRouche påpegede i dag, at denne succesfulde flankeoperation, som Putin udførte i Syrien, og som afslørede Obamas støtte til terrorister gennem hans venner i Tyrkiet og Saudi-Arabien, har lagt sig som en forhindring for det britiske imperieapparat internationalt og hjulpet Putins venner andre steder til at forsvere deres strategiske interesser – især Xi Jinping i Kina. Kineserne er nu i færd med at forberede et program, der skal lægge skat på spekulative, finansielle transaktioner – ikke for at tjene penge, men for at forhindre spekulanternes aktiviteter. Hedgefonde vil blive afkrævet bevis for, at genforsikrings- og valutatransaktioner er baseret på reel handel eller reelle investeringer og ikke er til spekulative formål – og har sendt spekulanterne ud i hysteriske anfald.

Hvorfor tolererer amerikanere ødelæggelsen af deres økonomi, politikken med evindelige krige og en valgkampagne, der er langt værre, og farligere, end en klovneforestilling? Svaret skal søges i troen på penge – det faktum, at alting måles ud fra monetære værdier og matematiske formler snarere end ud fra realøkonomiens og det menneskelige samfunds fremskridt. USA's, Europas og Japans økonomier flyder med likviditet, med penge, men det er alt sammen fiktivt. Realøkonomien er i frit fald – med infrastrukturen, der forfalder, industrien, der kollapser og massearbejdsløshed – hvilket driver et stadigt større antal arbejdende mennesker til selvmord gennem narko, eller på anden vis.

Kina og Rusland og Indien har opbygget et nyt paradigme, gennem BRIKS, AIIB og Den nye Silkevej, baseret på principper, som amerikanere engang antog som deres. Amerikanere og europæere må atter engang antage konceptet om et fælles mål for menneskeheden, baseret på den succesfulde fremgang for menneskeheden som helhed, eller også se på, at Vestens nuværende imperieherskere leder verden til Helvede.

# **EIR's interview med Irans ambassadør i Danmark, H.E. Hr. Morteza Moradian om Irans relationer med Rusland og Kina, og Irans rolle i Den Nye Silkevej efter P5+1 aftalen med Iran (på engelsk og persisk)**

Interviewet, som EIR's Tom Gillesberg lavede, fandt sted den 15. marts 2016 i København. Ambassadøren talte på persisk, som blev oversat til engelsk.

## **English:**

Interview with Iran's ambassador to Denmark, H.E. Mr. Morteza Moradian about Iran's relations with Russia and China, and Iran's role in the New Silk Road, after the P5+1 agreement with Iran. The interview was conducted on March 15, 2016 in Copenhagen, Denmark by EIR's Copenhagen Bureau Chief Tom Gillesberg. Ambassador Moradian spoke Farsi, and his statements were translated into English.

Audio:

Interview with H.E. Mr. Morteza Moradian, the ambassador from the Islamic Republic of Iran to the Kingdom of Denmark, about Iran's relationship with Russia and China, and Iran's role in the New Silk Road, from a vantage point after the P5+1 agreement with Iran. The interview was conducted on March 15, 2016 in Copenhagen, Denmark by EIR's Copenhagen Bureau Chief Tom Gillesberg. Ambassador Moradian spoke in Farsi, and his statements were translated into English. Video and audio files are available at: <http://schillerinstitut.dk/si/?p=12299>

EIR: Mr. Ambassador, thank you so much for agreeing to this interview, to give us an opportunity to hear what Iran's views are on some extremely important questions, not only for Iran, but, I think, for the whole Middle East region, and, also, for the world. When Chinese President Xi was in the Islamic Republic of Iran, there was a lot of discussion with President Hassan Rouhani, and others, and agreements signed, aimed at reviving the ancient Silk Road, which the Chinese call the "One Belt, One Road." Greek Prime Minister Tsipras was also in Teheran, and spoke about Greece's role as a bridge between Europe and Iran.

After years of war and lack of economic development, many countries in Southwest Asia are completely destroyed. What is urgently needed is the extension of the OBOR/New Silk Road policy for the entire region, as well as the Mediterranean countries – a Marshall plan, but without the Cold War connotations.

Do you see a potential for that, and if so, what are your ideas about it?

H.E. Mr. Morteza Moradian: In the name of God, the compassionate and merciful, I would also like to thank you for arranging this session for me to be able to air my views on the issues of the region, and others. Both Iran and China have high ambitions regarding transportation issues. I think that

there is extreme potential for economic development, arising from the idea raised by the Chinese president. Iran is situated at a very important juncture from a transportation point of view. This has nothing to do with the issues of today or yesterday, but it is an historical issue. Iran, and the region around it, are located along a very, very important corridor.

If we look at the important corridors in the world, there are three important ones. We can see that the North-South corridor, and the East-West corridors, all pass through Iran. The important thing is that transportation corridors necessarily need lead to the growth of economic development, and also, when economic development takes place, what follows that is peace and stability. Our country, and all of the countries of western Asia, are trying to find and develop these transportation routes. In this regard, the idea raised by China can have important consequences for the region. Just to sum it up, this idea of reviving the old Silk Road, would have a very positive influence on development.

As far as Iran is concerned, Iran enjoys a very good position in regard to all forms of transportation – air, sea and land. Iran has always followed up on the issue of reviving the old Silk Road, with China. We now see that the Chinese idea, and the Iranian idea, are now meeting at some point. I think that within the framework of two very important agreements, the Shanghai Cooperation Organization (SCO), and, also, the Economic Cooperation Organization (ECO), we can have very, very good cooperation. I will give more explanations later about the importance of the SCO and ECO cooperation. These are both in our region, and they can have cooperation with each other.

EIR: You have personally been involved in your country's relations with, especially, Russia and China – two countries which are playing leading roles in today's world, with Russia taking leadership in the fight against Daesh/Islamic State, and China pursuing an inclusive, multi-national, economic

development strategy, which is an alternative to the transatlantic monetarist policy leading to economic collapse. Now, starting a new chapter after the sanctions against Iran have been lifted, how do you foresee the future of Iranian relations with Russia, and China, and what benefits will that bring to Iran and the rest of the world?

Ambassador Moradian: As you pointed out, I think the conditions are now conducive for good cooperation and development. During the years of the sanctions, we had extensive relations with China. There is now about \$50 billion of trade between Iran and China. This has fluctuated some years, but it is between 50-52 billion dollars. China is the biggest importer of Iranian oil. We also had extensive relations with Russia during the years of the sanctions. It's natural, now that the sanctions have been removed, that the relationship between these three nations would develop further.

The important point that I would like to point out is that the three countries have common interests, and common threats facing them. We are neighbors with the Russians. We have common interests with Russia regarding the Caspian Sea, transportation, energy, the environment, and peace in the world. So, we have quite a number of areas where our interests coincide. Other there areas where we have common interests are drug trafficking, and other forms of smuggling, combating extremism and terrorism, and, also, our views on major international issues converge.

We also have quite a number of common interests with China. They include energy, in the consumption market, reviving the Silk Road, combating terrorism, the transportation corridors, and, also, in the framework of the SCO -- quite a number of areas where we have common interests. China needs 9 million barrels of oil on a daily basis. As I said, our trade relations amount to about \$52 billion.

Iran enjoys some very important factors. First of all, it has enormous amounts of energy resources. Its coastline along the

Persian Gulf runs up to 3000 kilometers. We are neighbors with 15 countries in the region. So these are very, very important points for Iran to be in the hub. I think that cooperation between these three powers, namely Russia, China, and Iran, can ultimately lead to stability and peace in the region. So the four areas – the combination of economics, trade, energy and transit – these are areas that can lead to the ideas that I mentioned. I think that effective cooperation between these three powers can lead to peace and stability, important in western Asia, and in the Middle East.

The revival of the old Silk Road, at this juncture of time, would be very meaningful. During the recent visit to Iran by the Chinese president, the two sides agreed to increase the volume of trade between the two countries, in the next 10 years, to \$600 billion.

Also, in the recent visit to Iran by President Putin, there was also agreement on Russian investment in Iran. It has to be said that our trade relations, economic relations, with Russia is not as much as it should be. But among the topics discussed when President Putin visited Iran, was to make sure that the volume of economic cooperation increases between Iran and Russia.

Just to sum up our relations with Russia and China regarding economic cooperation, we think that with Russia, it is not enough, and we want to increase that. With China, it has been very good, but we still want to develop that further. Overall the situation is promising.

You are well aware that from the point of view of stability, Iran is unique in the region, and that actually prepares the ground for this cooperation to continue.

EIR: There is already progress on extending the New Silk Road from China to Iran. On February 15, 2016, the first freight train from Yiwu, China, arrived in Teheran. The 14-day-trip covered over 10,000 km. (about 6,500 miles), travelling through Kazakhstan and Turkmenistan, saving 30 days compared to the former route. What are the plans to extend this line,

and how will that improve economic relations along the New Silk Road? And what new agreements were just made between Iran and China to develop the New Silk Road?

Ambassador Moradian: President Rouhani has very clear views on the Silk Road. In fact, President Rouhani is a specialist in transportation routes and communication. He believes that the basis for development lies in the development of transportation infrastructure. He and the Chinese president have talked over the revival of the Silk Road on a number of occasions.

There was a discussion that deviated from the main subject of the Silk Road, being propagated during the past few years. That was the idea of the new Silk Road, or the American Silk Road, so to speak, and it was not based on an historical issue. Basically, they wanted to bypass Iran, and deviate the route to bypass Iran, in effect. No one can fight against economic and geographical realities on the ground. When the route through Iran is the shortest route, and the cost effective route, then nobody can go against that. And because the Chinese ideas were more realistic, then Iran and China were able to come to some sort of understanding on the development and revival of the Silk Road.

There is also emphasis on the development of sea routes. We witnessed good investment by the Chinese in this regard, in the recent years. China has invested heavily in Pakistan, in the Gwadar port.

If I want to just come to the issue regarding Iran, then I can go through the following issues. The railroad between Khaf in Iran, and Herat and Mazar-i-Sharif in Afghanistan, is an important connection. The Khaf-Herat section has been completed, but the Herat-Mazar-i-Sharif section is still to be constructed. I think this is an important route that we believe, in my opinion, China would be advised to invest in. Also, within the framework of Danish development aid to Afghanistan, I think a portion of funds to the Herat-Mazar-i-Sharif railroad link would be an important factor.

If this route between Herat and Mazar-i-Sharif were to be

completed, then from there, there are two routes – one leading to Uzbekistan, and the other leading to Tajikistan, and that can be an important connection. At the moment, China is making good investments in both Kyrgyzstan and Tajikistan, in order to establish the links. In fact, the link between China, Kyrgyzstan, Tajikistan, Afghanistan, and Iran, is one of the most important links of the Silk Road. And there is a missing link between Herat and Mazar-i-Sharif, as I said, and I hope that the countries concerned, especially China, can help establish that link. Over the past two years, the corridor between Kazakhstan, Turkmenistan and Iran has now borne fruit, and is now connected. In fact, the train that you mentioned, that arrived in Teheran, actually came through this route, and this corridor has extreme potential. I hear that quite a number of countries in the region are interested in joining this corridor. We have another corridor linking Uzbekistan, Turkmenistan, Iran and Oman, which is called the fourth corridor. And this has also come into operation over the past year-and-a-half.

We also have other corridors, which I call subsidiary corridors. All of these subsidiary corridors can actually enhance and complement the main East-West Silk Road. One very important corridor, that you are aware of, is the North-South corridor, and a section along this corridor is now under construction – the connection between the city of Rasht, and Astara on the Caspian coast. In fact, we have reached agreement with Azerbaijan on the connection between the two cities of Astara in Iran, and Astara in Azerbaijan. This corridor also needs some investment, and we hope that countries like China can help us in developing this. Just to sum up regarding the corridors, there are two routes which need investment: Herat to Mazar-i-Sharif; and Rasht to the Azeras in Iran and Azerbaijan.

Regarding the third part of your question, about the agreements reached by Iran and China during the Chinese president's visit in Iran, 17 agreements were signed during the visit. The areas included energy, financial investment,

communication, science, the environment, and know-how. Specifically, on the core of your question about the Silk Road, the two countries agreed to play a leading, and a key role, in the development and operation of this link. They agreed to have cooperation on infrastructure, both railroad and road. For example, electrification of the railroad link between Teheran and Mashhad, is part of this connection of the Silk Road that was agreed to. The other important thing is cooperation on the port of Chabahar in Iran. The two sides agreed to have cooperation in this, and the Chinese agreed to invest in Chabahar. Regarding industry and other production areas, they agreed that the Chinese would cooperate and invest in 20 areas. Regarding tourism and cultural cooperation, the two sides also agreed to develop cooperation in this regard, within the framework of the Silk Road. I think you can see that within the framework of the Silk Road, there are quite important agreements between the two countries.

EIR: Building great infrastructure projects is a driver for economic growth, and increasing cooperation among nations. Now, after suffering under the sanctions, Iran has an opportunity to build up its infrastructure, as is going on, in cooperation with other countries, to help create the basis for Iran to play an important, stabilizing role in the region. The P5+1 agreement also cleared the way for Iran's peaceful nuclear energy program, a Memorandum of Understanding (MoU) was just signed with China, to develop peaceful nuclear energy. What were the highlights of the agreement, and what are the plans for Russian-Iranian civilian nuclear cooperation?

Ambassador Moradian: Between Iran, Russia, and China, there has been good cooperation through the years regarding the peaceful use of nuclear energy.

32:36

Because of the renegeing of the Western governments, the construction of the Bushehr nuclear power plant was left unfinished, and after the Russians agreed to pick up the

pieces, we reached an agreement, and were able to develop, and make this very important plant operational. The cooperation between Iran and Russia on peaceful nuclear energy has been very constructive. All of Iran's atomic activities have been under the supervision of the International Atomic Energy Agency (IAEA). As we have had no deviation from our peaceful nuclear program, after 10 or 12 years, the Western countries, the P5 + 1, finally came to the conclusion that Iran's nuclear program has always been peaceful. I believe that they knew this at the beginning, as well. This was just a political game. We have also had some kind of constructive cooperation with China over the past two decades on peaceful nuclear energy. During the recent visit to Iran by the Chinese president, an agreement was also signed in this regard. In the implementation of the cooperation agreement, China, Iran and America are also the three countries forming the committee for the implementation of the agreement. It was agreed during the recent visit that China will reconfigure the Arak heavy water plant. The Chinese and the Iranians have also agreed to have cooperation on the building of small-scale nuclear power plants. This, I think, is very important for Iran, in terms of producing electricity, and the Chinese welcome this. We have also signed a number of agreements with China on the construction of a number of nuclear power plants in the past. Iran, because of its extensiveness, has always welcomed cooperation on the development of peaceful nuclear energy for the production of electricity, and other things. In fact, based on the cooperation agreement between Iran and the P5+ 1, there will be agreements with a number of the members of the P5+1 regarding the nuclear issue.

EIR: You already mentioned the International North-South Transport Corridor (INSTC), linking India, Iran, and Russia with Central Asia and Europe. Is there anything more you would like to say about this project, and the benefits that are envisioned?

Ambassador Moradian: I explained about the corridors in my previous answers, but the North-South corridor is one of the most important corridors in the world. If this corridor were completed, it would be very effective in three most important areas – it would be a contributing factor in security, speed, and cost. This corridor starts in Finland, comes through Iran, then on to the Persian Gulf, from there to India, and then towards Africa. If we look at the present route now, it takes 45 days, but if we use the North-South corridor that I just mentioned, this would reduce the time to 20 days. The route will be 3,000 kilometers shorter. This can be a very important factor from a world economic point of view.

We are faced with realities, with situations, that nobody can ignore. For this reason, during the past few years, Iran has made endeavors, extensive efforts, to actually complete what I call the subsidiary corridors. Right now, in Iran, we have 10,000 kilometers of operational railroad lines. For our present government, the further development of railroad links is very important. We have plans to build another 10,000 kilometers in the future. It is my view, that in the next couple of years, we will see a revolution in transportation.

There are some missing links, which we think should be completed as soon as possible. As I said, from our point of view, the section between Rasht and Astara is very important, and it has to be completed very soon. In fact, during the recent visit of the Danish foreign minister to Teheran, this issue was also brought up. The Iranians announced that if the Danes are prepared to do so, they would be welcome to invest in this section. And we have that link to the Chabahar port. If this port is developed to utilize its full capacity, then this will serve as an important link in the North-South corridor. In the Persian Gulf we also have an island called Qeshm, which has an extreme potential. In fact, because Qeshm, itself, also has gas, and has a strategic location in the Persian Gulf, it can play an important role in the North-South corridor. We are seeing that various countries, like China, Japan, and South Korea, are interested in entering into these

areas. In fact, there was a seminar on shipping in Copenhagen, a couple of weeks ago, and I said that to the Danish participants there, that this condition is conducive to involvement for mutual benefit. The benefits to be accrued from the North-South dialogue are global. Iran is making all efforts to complete this corridor.

A lot can be said about the North-South, and East-West corridors. Just to point out, very briefly, on the East-West corridor, some very important developments have taken place. We have had good negotiations with the Turkish side. One of the most important links in the East-West corridor, is the link between the cities of Sarakhs and Sero. Sero is located on the border with Turkey, and the Turks and the Iranians are now in very extensive negotiations to develop this route. The other route is the railway link between Iran and Iraq, and this is also being constructed on an extensive level. As I said, the subsidiary corridors – the one from Kazakhstan, Turkmenistan to Iran; and the one from Uzbekistan, Turkmenistan, Iran and Oman – are now operational, and we are also planning on development, and making other subsidiary routes operational.

EIR: What about cooperation on water desalination, and nuclear fuel?

Ambassador Moradian: Iran is faced with a shortage of water. We have quite a number of projects for water desalination in the Persian Gulf. In fact, one of the main reasons that we wanted nuclear power plants in the Persian Gulf, was to use that energy to desalinate water. Currently, a number of Iranian companies are engaged in this. One of the very big projects came on stream during the past couple of years. Regarding the desalination plants, there is good cooperation between Iran and foreign countries. I think that this is another area where Danish companies can enter into the competition. President Rouhani made a trip to the city of Yazd, in the center of Iran, and he said there, that transfer

of water from the Persian Gulf to the center of Iran, to the city of Yazd, is one of the important projects that the government has in mind.

Regarding nuclear fuel, within the framework of the P5+1 agreement with Iran, it envisages extensive cooperation between Iran and these countries on nuclear fuel. Iran is now one of the countries that have the legal right to enrich uranium, and this has been recognized. So, based on the capacities that Iran has, we can exchange nuclear fuel. Within this framework, we have exchanged quite a lot of fuel with the Russians, and we have cooperation plans with China on the heavy-water plant in Arak.

EIR: Can you speak about cooperation on fighting terrorism and drug trafficking?

Ambassador Moradian: On the issues of combating extremism and terrorism, and trafficking with drugs, and otherwise, there is extensive groundwork for cooperation. The development of extremism, and the instability that follows, is extensive in the CIS countries, and part of China. Iran has extensive experience and knowledge about combating terrorism, and in this regard, Iran can cooperate with those countries regarding this menace. Afghanistan is the world's biggest producer of narcotic drugs. In fact, unfortunately, after Afghanistan was occupied by the ICEF coalition, led by America, the level of production of narcotic drugs in Afghanistan has increased extremely violently.

EIR: While the British in the Danish troops were in the Helmand province, I think the production went up about 20 times.

Ambassador Moradian: Exactly. In that region, Helmand, in particular, there was an incredible increase in the amount of production. In fact, in combatting smuggling drugs to come to Iran, to this side, Iran has been a sturdy wall, and we have unfortunately lost quite a number of our security forces in that region, bordering on 4,000. Just something on the

sideline which is very important. In fact, Iran is on the frontline in combatting drugs. When Europe talks about helping other countries stem the tide of immigrants to Europe, I think that stemming the tide of narcotic drugs coming to Europe, also requires the same sort of agreements. Iran is very active in combating and preventing drugs coming this way, and the death penalty, the capital punishment we have for the warlords of the drug traffickers, is, actually, in the pursuit of this policy of trying to prevent drugs from reaching outside of the region. Just imagine if Iran would stop cooperating, stop combatting these drug traffickers? The road would be an open highway, and just imagine how much drugs would then come across. There already exists very good cooperation between Iran, China, and Russia on combating drug trafficking. We have had multi-lateral sessions in the field of combating drug trafficking. I think that within the framework of the Shanghai Cooperation Organization (SCO), Iran can play a leading role in combating drug trafficking, extremism and terrorism. In the recent session of the SCO, it was agreed that after the sanctions were lifted against Iran, that Iran's status would be lifted from an observer to a full member. In the next session, which is planned in Uzbekistan, I think that this issue will be raised.

EIR: I think we have covered a lot of very many essential things. Is there anything else that you would like to say to our readers?

Ambassador Moradian: I would like to refer to a few points in this interview, which is about the cooperation between Iran, China, and Russia. The cooperation between Iran, Russia, and China is very important. The more this cooperation increases, the more it can help peace and security in the region. The revival of the old Silk Road is a very important issue. Within the framework of the revival of the Silk Road, the strengthening of the SCO cooperation, and the ECO cooperation is very important. In fact, the cooperation between ECO and

SCO is also very important, and has to be developed. Other very important issues that I would just like to briefly mention are – the first thing is that Iran's full membership in the SCO is important. In fact, in the area of security, SCO needs Iran's experience and influence in this regard. The next thing is that cooperation within the framework of the SCO, can enhance security and peace in the region.

The next thing, is that China must make more investment in Iran. In order to actually develop the Silk Road, it has to invest more in Iran. China must also make more investments in the port city of Chabahar, and also in the Iranian island of Qeshm.

The other point I would like to mention, is that the Eastern SWIFT (financial transaction network) is also an important idea. I think that the important countries in the East, like China and Russia, should have an alternative financial connection. And the other thing is, the monetary exchange between these two countries is important. What I mean by this, is that these countries can conduct their transactions in the local currencies of the Iranian Rial, the Chinese Yuan, and the Russian Ruble.

The other thing I would like to point out, is that China is the number one country in the world that needs energy, and Iran is one of the leading producers of such energy. But the important point to be born in mind here, is Iran's independence in its decision making regarding its energy resources – oil and gas. In fact, if you look at its record, Iran has never played games with its energy policy. Any country that wants to have economic cooperation with Iran, must take this aspect into consideration, and it is an important consideration. Other countries in our region do not operate in this way.

Finally, I am very pleased that this opportunity arose for me to air my views on economic development in the region, and very important issues that will have global consequences. Thank you.

EIR: Thank you, Mr. Ambassador.

# **Putin overrasker igen Obama; annoncerer tilbagetrækning fra Syrien**

*14. marts 2016* – I et møde i dag, der blev udsendt på Tv, med forsvarsminister Sergei Shoigu og udenrigsminister Sergei Lavrov, meddelte den russiske præsident Vladimir Putin, at han havde udstedt ordrer på at påbegynde en tilbagetrækning af Ruslands »hovedstyrke« fra Syrien, med start den 15. marts.

»Jeg mener, at de opgaver, der blev pålagt Forsvarsministeriet, generelt er blevet opfyldt. Det er grunden til, at jeg giver ordre til, at en tilbagetrækning af det meste af vores militære grupper fra Syrien, skal påbegyndes med start fra i morgen«, sagde Putin iflg. TASS' dækning af mødet. Med en lykønskning til de russiske officerer og soldater for deres arbejde tilføjede han, »Med det russiske militærs deltagelse er det lykkedes syriske tropper og patriotiske styrker i Syrien at vende tidevandet i kampen imod international terrorisme og tage initiativet i praktisk talt alle retninger.« Putin sagde, at de russiske luft- og flådebaser, der er etableret i Syrien, ville fortsætte med at operere »på en rutinemæssig måde«.

Putin havde adviseret den syriske præsident Bashar al-Assad forud for sin meddelelse om ordren.

Det var sandsynligvis ikke noget tilfælde, som kilder

bemærkede til *EIR*, at meddelelsen kom, samtidig med, at FN-forhandlingerne i Genève om en våbenhvile og en politisk afgørelse i Syrien begyndte. Putin sagde, »Jeg håber, at beslutningen i dag vil være et godt signal til alle parterne i konflikten. Jeg håber, at beslutningen i betragtelig grad vil forøge tilliden hos alle deltagerne i processen. Jeg beder det russiske Udenrigsministerium om at intensivere Ruslands medvirken i organiseringen af fredsprocessen til løsning af problemet i Syrien.«

Ligesom med alle strategiske initiativer, som Putin har taget, syntes også beslutningen og ordren fuldstændig at have taget Obamas Hvide Hus på sengen. En repræsentant for det amerikanske Udenrigsministerium, den pensionerede general John Kirby, der holdt en pressebriefing her til eftermiddag, sagde, at et spørgsmål fra en reporter var det første, han havde hørt om denne udvikling.

## Tysk valg er en uforbeholden katastrofe for den vestlige verden

»Dette er en uforbeholden katastrofe«, sagde Helga Zepp-LaRouche, formand for partiet Borgerrettighedsbevægelsen Solidaritet (BüSo) i Tyskland. »AfD er et beskidt, afskyeligt fænomen. Det var sådan, det skete i 1930'erne«, sagde hun og bemærkede ligeledes, at sådanne ekstreme højrefløjspartier eller endda fascistiske partier eksisterer over hele Europa. Denne fare, sagde hun, er resultatet af den fejlslagne politik i Europa mht. både flygtningekrisen og den økonomiske krise, og markerer slutningen på EU, der ikke længere har nogen som

helst enhed.

13. marts 2016 (*Leder fra LaRouchePAC*) – Valgene i tre tyske forbundsstater søndag resulterede i en enorm kindhest til kansler Angela Merkel, iflg. meningsmålinger fra valgstederne, med det ekstreme højrefløjsparti Alternativ for Tyskland (AfD), der bygger på at fremme anti-flygtningehysteri, der kaprede 11 % og 12,5 % i hhv. Baden-Württemberg og Rheinland-Pfalz i vest, og ikke mindre end 23 % i staten Sachsen-Anhalt i øst. »Dette er en uforbeholden katastrofe«, sagde Helga Zepp-LaRouche, formand for partiet Borgerrettighedsbevægelsen Solidaritet (BüSo) i Tyskland. »AfD er et beskidt, afskyeligt fænomen. Det var sådan, det skete i 1930'erne«, sagde hun og bemærkede ligeledes, at sådanne ekstreme højrefløjspartier eller endda fascistiske partier eksisterer over hele Europa. Denne fare, sagde hun, er resultatet af den fejlslagne politik i Europa mht. både flygtningekrisen og den økonomiske krise, og markerer slutningen på EU, der ikke længere har nogen som helst enhed.

Ledende økonomiske og politiske personer i hele Europa, men i særdeleshed i Tyskland, har åbenlyst advaret om, at den sindssyge politik, der i sidste uge blev annonceret af Den europæiske Centralbanks, ECB's, præsident Mario Draghi, både er et tegn på total desperation og en garanti for et totalt kollaps i allernærmeste fremtid. Draghis 33 % 's forøgelse af den allerede massive pengetrykning under 'kvantitativ lempelse', op til 80 mia. euro om måneden, parret med lavere negative rentesatser, er, som Zepp-LaRouche sagde i sidste uge, simpelt hen mere af den samme medicin, der forårsagede sygdommen. Hele det transatlantiske finanssystem er håbløst bankerot, og intet som helst, undtagen en politik for genindførelse af Glass/Steagall-bankopdeling for at lukke »for-store-til-at-lade-gå-ned«-bankerne ned og afskrive den spekulative gæld, kan forhindre et ukontrolleret kollaps.

I USA er fascismens realitet endelig ved at blive tvunget ind i offentlighedens bevidsthed af den farlige hofnar Donald

Trump. Men, som Tim Stanley fra det britiske *Telegraph* skrev i dag, alt imens det er sandt, at Trump gør fremstød for ulovlig og hadefuld demagogi: »Han tog ikke Amerika i krig i Irak på baggrund af usaglige beviser, etablerede Guantanamo i modstrid med menneskerettighedslove eller autoriserede tortur af fjendtlige kæmpere, stod i spidsen for den gigantiske NSA-operation med indsamling af data, lancerede en beskidt krig med droneangreb mod både terrorister og dem, der havde det uheld at leve i deres nærhed, underminerede den religiøse frihed hos ansatte, der ikke ønsker at støtte deres arbejderes sexliv, underkendte staternes ønsker mht. giftermål, tvang borgere til at købe sundhedsprodukter eller deporterede tusinder af illegale immigranter ved aggressivt at genne dem sammen.« Alt imens dette tydeligvis er en anklage mod Obama, så er det Trumps sandsynlige demokratiske modstander Hillary Clinton, der fører valgkampagne på baggrund af dette generalieblad med mord og kaos.

Hvor efterlader dette så USA? En ægte revolution af tankegangen kræves af dets borgere, omgående, hvis verden skal undfly det fremstormende helvede med global krig og økonomisk kaos. Lykkeligvis har Kina og Rusland søsat en redningsflåde og en mission for menneskeheden gennem BRIKS, Den Nye Silkevej, et internationalt rumprogram, en tilbagevenden til klassisk kultur, og »win-win«-relationer nationerne imellem.

Schiller Institutets konference i Manhattan den 7. april må bringe verden sammen på baggrund af disse principper. Det er den opgave, som denne organisation kan og må gennemføre.

# **Det er vores job at blive ved med at kæmpe og opbygge ting, som vi kan opbygge**

*10. marts 2016 (Leder fra LaRouchePAC) – Under en diskussion den 9. marts med LaRouchePAC's Komite for Politisk Strategi karakteriserede Lyndon LaRouche kampagnen for at bryde BRIKS-gruppen op som følger:*

*»Det er britisk. Se på omstændighederne. Der er visse kendsgerninger her, der er meget klare. For det første står briterne bag alt dette, og briterne triumferer over den fordærvelse, de har været i stand til at indføre i USA og i den amerikanske befolkning. Det er et faktum. Når man lige har fordøjet dette, så må man se på, hvad det er for problemer, der findes i Europa, og så bliver man virkelig lidt skræmt, for man ser hele områder af Europa, der disintegrerer for øjnene af os, og især dem, der er på den forkerte kurs.*

*Det, Putin gør, er virkelig godt; det er meget effektivt – det er rigtig godt. Og det er succesfuldt, og det hænger sammen med Kina og andre former for operationer omkring dette, der*

*bygger det op. Så det er en god situation for os mht. tingenes udsigt. Der er ikke noget problem her. Der er bekymring, men ikke noget virkelig problem.*

*Vores problem ligger hovedsageligt i USA. Det er den kendsgerning, at USA's befolkning er blevet gjort sindssyge, voldsomt, af Bush-familien, og nu af Obama. Det har været en degeneration. Disse ting er så åbenlyse, at det må siges højt, fordi det er så åbenlyst. Kongressen er i et forfærdeligt rod.*

*Hvis man indser disse ting, og man laver en liste med en sammenligning af det ene mod det andet, finder man ud af, at tingene ikke står så dårligt til i det ene kvarter, men at de er forfærdelige mht. USA og den amerikanske befolkning. USA er i en tilstand af desperation. Desperation, fordi de accepterer spekulativ investeringsbankvirksomhed, men de accepterer ikke Glass-Steagall, der automatisk ville hjælpe udviklingen. Sådan står det til. Vi har i virkeligheden ikke noget andet problem end dette. Vi har Wall Street, som er rådden, FBI er råddent, og en masse mennesker er ikke andet end de rene svindlere. Og vores befolkning er på både kunstig vis, men også aktivt, blevet demoraliseret. Demoraliseringen af den amerikanske befolkning er en meget farlig ting.*

*I Sydamerika ser man også, at udsigterne er ved at blive forfærdelige. Det behøver de ikke at være, men det er de. Så vi må virkelig samle vore tanker og ikke udbrede sygdomme, der ikke er virkelige.*

*LaRouchePAC-leder Kesha Rogers er ved at komme tilbage, og det er vigtigt. Hendes rolle med udgangspunkt i Texas, og i baggrunden dernede, er meget styrkende mht. hele situationen.*

*Wall Street og Washington ved, at Dodd/Frank-loven har været en total fiasko. De ved det! De er rædselsslagne. Folk har tendens til at være bange; en meget stærk frygt. Men det bliver bare til hysteri. Det politiske system er råddent: der var nogle styrkeområder, men det meste af det er råddent.*

*Demoralisering er nøglespørgsmålet; situationen er forfærdelig, men der er noget, der er værre: demoralisering. Og demoralisering kan selvfølgelig ikke bekæmpes, med mindre der er reel styrke bag; man kan ikke bare bluffe det.*

*Dette er en ekstremt dødbringende situation. Spørgsmålet er, om hele USA's økonomi vil kollapse, før balladen virkelig begynder. Kina befinner sig i en god situation; Putin er i en god situation, relativt set, og der finder en opbygning sted i visse dele af planeten.*

*Vi har endnu ikke fået kontrol over tingene. Vi har udsigter, men ingen kontrol. Og denne kontrol må vi selv leve.«*

Rachel Brinkley (fra LaRouchePAC Policy Committee, -red.) fra Boston sagde, at befolkningen er rasende over, at økonomien er i færd med at kollapse, og at ingen gør noget ved det.

LaRouche svarede:

*»De tror ikke på, at de kan gøre noget ved det; det er derfor. De tror på, at det er noget, der overgår dem; ikke noget, som de gør.*

*Jeg håber på, at vi kan bryde igennem med noget her, for der er gennembrud i ting, der er internationale faktorer. Men jeg har ingen præcise beviser, så jeg er lidt forsiktig. Jeg mener, at der er muligheder; helt bestemt i Kina og Rusland og så fremdeles, er der gode tegn. Men en stor del af det transatlantiske område og relaterede tilfælde er en stor katastrofe. Det vil formentlig vedblive at være en katastrofe, endda forværrende. Så vi står ved et punkt lige nu, hvor vi ikke har nogen præcis konklusion om noget som helst; vi har en masse tilkendegivelser.*

*Det kommer til at handle om globale faktorer; jeg tror ikke, der er mange chancer i lokale områder; jeg tror, at globale faktorer er de eneste, der virkelig er signifikante. For se på økonomien, se på moralen osv., som vi ser generelt. Der er*

*intet at hente her. Der er visse udviklinger, der omfatter nogle af problemområderne og giver folk en vis fornemmelse af et optimistisk syn. For situationen er ikke så dårlig, som mange mennesker tror, hvis den blev håndteret korrekt. Eller den er værre – hvilket er mærkeligt. Man har noget, som folk tror, vil være godt for dem, når det er ubrugeligt. Men de får også undertiden et frisk pust af at se frem til noget.*

*Det er vores job at blive ved med at kæmpe og opbygge ting, som vi kan opbygge. Vi ser ingen mirakler lige nu, undtagen når vi en gang imellem får en smule fordel – og det må man arbejde videre med. Og der kommer nogle lyspunkter her og der.«*

*Titelfoto: Lyndon LaRouche fortsætter med at arbejde for Det britiske Imperiums afslutning og for udløsningen af menneskehedens kreativitet.*

---

# **SPØRGSMÅL OG SVAR med formand Tom Gillesberg den 10. marts 2016: Rusland og Ukraine; Hillary**

# **Clinton; Nykredit; finansspekulation; EU-Tyrkiet; Schiller Partiet**

## **Kinas landbrugsmi nister rapporterer om nyt fremstød for at opdyrke jorden i Ruslands enorme fjernøstlige distrikt**

*7. marts 2016* – Kinas landbrugsmi  
nister, Han Changfu, talte i  
dag om Ruslands og Kinas planer om et samarbejde omkring  
opdyrkning af Ruslands enorme fjernøstlige distrikt. Han talte  
på en pressekonference på sidenlinjen af den Nationale  
Folkekongres’ årlige møde i Beijing.

Kinesiske firmaer er allerede aktive inden for landbrug på  
mere end 600.000 ha i det fjernøstlige område. Nu vil der,  
sagde Han, blive kinesisk-russisk samarbejde for at udvide  
dette gennem fælles landbrugsmæssig forskning og udvikling,  
samt uddannelse i agronomi og dyrkningsmetoder. Han opfordrede  
flere kinesiske landbrugsvirksomheder til at blive involveret.

Det russiske, fjernøstlige distrikt, der udgør to tredjedele

af USA, har store, frugtbare områder og en befolkning på kun 6,3 million (omkring to tredjedele af den amerikanske stat New Jersey).

*Foto: Sceneri fra Amur regionen, der har grænser mod Kina, ikke langt fra hovedbyen Blagovesjtjensk. Denne region med sit areal på 363.700 km<sup>2</sup> (Danmarks er 43.094 km<sup>2</sup>) og en befolkning på ca. 810.000 er blot en lille del af Ruslands enorme fjernøstlige distrikt.*
