

POLITISK ORIENTERING den 4. marts 2021:

Det er ikke i Israel, men i samarbejde med Kina og Rusland, at COVID-19 og andre problemer løses

Med formand Tom Gillesberg

Lyd: (Der er ingen lyd i et par korte udfald, hvor der blev stillet spørgsmål.)

Schiller Instituttet · Det er ikke i Israel, men i samarbejde med Kina og Rusland, at COVID-19 og andre problemer løses

Helga Zepp-LaRouche: 'Vælg i stedet holdbar menneskelig overlevelse'

21. februar (EIRNS) – For tiden, under så dramatiske, historiske begivenheder i gang som det andet år af en pandemi med en virus der muterer; og i Nordamerika, med omfattende skader fra energisystemer, som på forhånd var mangelfulde, fortæller fornuften os, at vi burde samarbejde som bare fanden, hjemme og i udlandet, for at rette tingene op. Se på

hvad vi gør på Mars! De nødvendige tiltag er blevet formuleret i årtier i form af en udviklingspolitik af økonomen og statsmanden Lyndon H. LaRouche, Jr., der sammen med sin hustru, Helga Zepp-LaRouche, også viste vejen vej for de diplomatiske initiativer, som kan gøre udviklingen til en realitet. Tiden er inde nu.

Modstanden mod dette udsyn fra de fallerede politisk-finansielle netværk centreret i City of London/Wall Street presser rasende på med mere og hurtigere afindustrialisering, der i første omgang har forårsaget flere kriser. Der slås nu på tromme for det internationale topmøde på 'Jordens Dag', den 22. april, til bekæmpelse af klimaforandringer, hvor Det Hvide Hus er vært. Både præsident Joe Biden og John Kerry, 'Særlig udsending for Klimaet' (National Security Council Special Presidential Envoy for Climate), gentog dette den 18. februar, på dagen hvor USA officielt genindtrådte i Paris-klimaaftalerne. De understreger, at Biden fra nu af og indtil topmødet den 22. april vil udstede de nødvendige foranstaltninger for at opnå større amerikansk reduktion af CO₂ inden udgangen af ~~året~~ dette årti. En sådan politik vil faktisk indebære ni år med flere blackouts, madmangel, oversvømmelser, brande og et hurtigt fald i forventet levealder. Kerry understregede i fredags, hvor han talte med FN's generaldirektør Antonio Guterres, at det haster med at handle på CO₂-reduktion: "Det der betyder noget er, hvad folk vil gøre i de næste 10 år".

Naturligvis tilslutter de folkemorderiske milliardærer sig. Sir Michael-'anti-kul' Bloomberg var på et konferencekald med journalister den 18. februar for at understrege, at flere kulkraftværker må nedlægges – netop på et tidspunkt, hvor det er elproduktion fra kul- og kernekraftværker, der har afholdt de centrale stater fra at gå fuldstændig i sort. Bill Gates, manden hvis speciale det er at opretholde mangler inden for sundhed, uddannelse og landbrug vha. "filantropi", har ligeledes understreget denne 10-årige tidsramme. Han sagde i

et interview i dagens *Washington Post Magazine*, at "vi skal have gennembrud i det næste årti", så vi kan bruge de følgende to årtier til 2050 "til at erstatte hele den industrielle økonomi". Hvad angår det videnskabelige spørgsmål, der er involveret i den tilsyneladende modsætning mellem kølige storme og global opvarmning, hævdede Gates standardbedrageriet i morges på Fox News, at "det sandsynligvis vil påvirke vejret at udlede yderligere kulstof i atmosfæren". Det er der "superhårde beviser for".

Den nye rapport, der er udkommet i denne måned, piller disse onde klaphatte fra hinanden – *EIR's* specialrapport: "Det store spring bagud: LaRouche afslører the 'New Green Deal'. Helga Zepp-LaRouche skriver i sin indledning: "The New Deal for menneskeheden er ikke 'grøn', men menneskelig!", Et afsluttende afsnit har undertitlen: "Vælg i stedet holdbar menneskelig overlevelse". Hun opfordrer til handling og siger:" Selvom mange institutioner synes at have lagt sig fast på den kurs, der er skitseret her [grøn økonomisk katastrofe, geopolitik og krigsfare], er det ikke for sent at vælge alternativet. COVID-19-pandemien har vist, hvor ekstremt sårbare vi i virkeligheden er som menneskelig art, og at vi realistisk set kun har en chance for at sikre vores langsigtede overlevelse ved at finde sammen i et nyt paradigme for samarbejde mellem alle nationer i denne verden for at vie os til menneskehedens reelle fælles opgaver.

"Nøglen til at overvinde krisen ligger i et menneskesyn, der ikke ser menneskeheden som en parasit på naturen, hvis aktiviteter forurener og ødelægger stakkels Moder Jord, så det ville være godt at reducere antallet af mennesker så meget som muligt (bare ikke så meget som til at efterlade oligarkiet uden tilstrækkeligt tjenestefolk!). Mennesket er simpelthen ikke et manipulerbart væsen, der kan holdes under kontrol med den moderne form for 'brød og cirkus' og degradering fra underholdningsindustrien.

"Menneskeheden er den eneste art, hvis kreative fornuft er i

overensstemmelse med universets love, og er endog en udviklet, integreret del deraf. Det er netop denne evne, der gør det muligt for menneskeheden igen og igen at opdage nye revolutionerende hypoteser om universets fysiske love, som derefter bruges i produktionsprocessen til at definere helt nye platforme for den menneskelige levestandard, forventet levetid, forståelse af de klimaforandringer, der har fundet sted i millioner af år, og yderligere perspektiv for at skabe forudsætningerne for fremtidig interstellar rumflyvning gennem koloniseringen af det nære rum".

For menneskehedens overlevelse, gør god brug af den nye rapport, og nyd de smukke billeder, der nu stråler til Jorden fra Mars takket være Percy.

'Perseverance' er sikkert fremme på Mars; præcist på pletten og parat til at søge efter liv.

18. februar 2021 (EIRNS) – NASA's Mars-rover, Perseverance, programsat til at ankomme til Mars i eftermiddags, bragede ned gennem atmosfæren og landede kl. 15.55, EST, nøjagtigt efter planen. Det var femte gang, NASA med succes landede et rumfartøj på Mars. For første gang var amerikanske og europæiske rumfartøjer, der allerede var i omløb om Mars, målrettede og i nogle tilfælde omplaceret for at fotografere og filme fartøjets indrejse, nedstigning og landing. Perseverance var i sig selv for første gang udstyret til at optage lydene [produceret af det danske firma DPA-mikrofoner]

og nogle billeder af dets indrejse, nedstigning og landing (Entry Descent Landing). Det blev beskrevet som 'første gang vi har ører på en anden planet'. Inden for få minutter efter landingen havde Perseverance selv sendt billeder af sine omgivelser tilbage. Missionschefer forventer at modtage flere billeder i løbet af den kommende dag eller deromkring.

Under en briefing efter landingen rapporterede EDL-projektleder Al Chen med glæde, at Perseverance havde fundet en god "parkeringsplads" i Jezero-krateret, godt inden for dets målområde, og var landet med meget lille hældning (1,2 grader). 'Surface-teamet', der vil fungere indenfor en Mars-tidsramme synkront med deres marsbil er allerede på arbejde og tjekker marsbilstens status, hvor dens elektriske systemer så godt ud lige efter landing. Marsbilen vil blive "pakket ud" – forskellige arme og instrumenter åbnes – i løbet af de næste par dage, og holdet begynder derefter at finde ud af, hvorhen den vil rejse og på hvilken rute, hvordan den undgår sandkrusninger og undersøger forskelle i terræn, når den kører ud for at finde et godt sted for en heliport til at teste 'Ingenuity', det første flyvende fartøj, der nogensinde er indsat på Mars.

Perseverance, kendt som "Percy" af hendes udviklere og beundrere, er et stort fremskridt i forhold til sin soldrevne forgænger på størrelse med en golfvogn. Percy vejer et ton og er på størrelse med en bil, og den er atomdrevet. (Holdet beskrev, hvordan der ikke længere er grund til at bekymre sig om, at der kommer sand på solpanelet.) Den er masser af pålidelig strøm til den toårige mission. Den understøtter avanceret udstyr, specielt designet til at søge efter liv på Mars.

Jezero-krateret er stedet for en gammel sø. Det blev udvalgt på grund af sin unikke status på Mars – efter tydeligt at have kanaler til ind- og udgang af vandet. Nær indgangen er en meget rig "delta"-region, der anses for at være ideel til at finde Mars-mikroorganismer. Medlem af videnskabsteamet Matt

Wallace beskrev stedets geologiske rigdom, og sagde at de har "år med videnskabelige undersøgelser" foran sig.

Et af de mest spændende træk ved denne mission er dens indsamlingssystem til at indsamle og opbevare overfladeprøver, der skal udvindes og returneres til Jorden i forbindelse med den første "tur-retur" Mars-mission, som må følge efter. Rørene, der bruges til at indsamle prøver, har været gennem en meget streng desinficeringsproces for at sikre, at alle fundne mikroorganismer rent faktisk ville stamme fra Mars.

Præsident Biden ringede for at lykønske holdet, og sagde at han ville lykønske dem personligt.

Mars ohøj !

18. februar (EIRNS) – Det amerikanske Mars-landingsfartøj, Perseverance, landede med succes på Mars i dag kl. 15:56. EST, alt imens Mars-rumfartøjerne fra Kina og De forenede arabiske Emirater, der ankom blot få dage forinden, kredsede om planeten. Det er vanskeligt at forestille sig et bedre billede af en forenet menneskehed, der har påbegyndt en fælles mission, der udgør essensen af menneskets rolle i universet: 'Håb', 'Himmelske Spørgsmål' og 'Udholdenhed' (Hope, Tianwen-1 og Perseverance, navnene på de respektive rumprogrammer, red.)

I sit ugentlige webcast i går talte grundlægger af Schiller Instituttet, Helga Zepp-LaRouche, om denne mission: "Dette er fremtiden, hvis mennesket skal leve som en udødelig art – hvilket var en forestilling, som min afdøde mand skabte – fordi vi er forskellige fra andre arter, fordi vi har kreativ fornuft. Vi kan løse ethvert problem gennem videnskabelige og teknologiske gennembrud ved at opdage nye love i universet. Og da det menneskelige sind er det mest avancerede element af dette univers, er der al grund til optimisme, at når vi først afstemmer vores egen eksistens og vores egen praksis med universets love, er vores chancer for at blive den udødelige art absolut tilstede. Men det kræver rumfart som en forudsætning, og jeg tror, at denne idé om nationer, der arbejder sammen for at opdage universets smukke hemmeligheder, giver en forsmag på, hvordan menneskehedens fremtid kan se ud, når vi beslutter at blive voksne".

I tankerne kan man modstille det billede af mennesket som en kreativ, rumfarende art med det billede, der har ført til det nuværende bratte fald i potentiel relative befolkningstæthed bredt over den transatlantiske region, med alle deraf følgende konsekvenser: en planetarisk pandemi; evindelige krigs- og risikoen for atomkrig; massearbejdsløshed og desperate bølger af migration og nu et dramatisk fald i den gennemsnitlige forventede levealder i selve USA. Ifølge en ny undersøgelse fra CDC faldt den gennemsnitlige forventede levealder alene i de første seks måneder af 2020 med et helt år: fra 78,8 i 2019 til 77,8 i løbet juni 2020. Det er det største enkeltfald siden Anden Verdenskrig, og det afspejler både den direkte og indirekte virkning af COVID-19-pandemien i USA og internationalt.

Pointen er ligetil: Det er den fysiske økonomi, fjols!

Og essensen af den menneskelige fysiske økonomi er ubegrænsede gennembrud inden for grundlæggende videnskab og klassisk kultur, af den slags indvarslet af menneskets mission til Mars. Som Helga Zepp-LaRouche udtrykte det i sit seneste

webcast: "På dette tidspunkt kommer den eneste fornuftens stemme virkelig fra LaRouche-organisationen og den politik, som min afdøde mand fremmede. Men der behøves en bred mobilisering blandt befolkningen for at ændre denne udvikling".

Dødsfald fra strømsvigt i Texas er et forvarsel om hvad der vil ske, hvis der kommer en Grøn New Deal.

Schiller Instituttets ugentlige webcast med Helga Zepp-LaRouche, den 17. februar 2021

c

I sin ugentlige dialog advarede Helga Zepp-LaRouche om, at de totalt unødvendige dødsfald og lidelser i Texas og andre amerikanske delstater på grund af en polarkoldfront giver et

tegn på hvad der vil ske, hvis den "store nulstilling" og dens grønne New Deal ikke stoppes. Disse dødsfald er ikke resultatet af en "naturkatastrofe", men en advarsel om hvad for en fremtid vi står overfor, hvis nedlæggelsen af ~~de~~ kul- og atomkraftbaseret elektricitetsproduktion ikke tilbagerulles. Den nye EIR-rapport, "The Great Leap Backwards" ("Det store spring bagud"), giver både en analyse af de tydelige farer ved at vedtage en grøn dagsorden, og et alternativ baseret på hendes afdøde mands, Lyndon LaRouches, videnskabelige idéer.

Helga Zepp-LaRouche diskuterede også, hvordan kampagnen for konfrontation med Rusland og Kina udsætter menneskeheden for truslen om atomkrig på et tidspunkt, hvor samarbejde ikke kun er bydende nødvendigt, men også opnåeligt. Hvis NATO insisterer på sanktioner mod Rusland over den meget opblæste Navalny-affære, burde nationer som Tyskland, Frankrig og Italien forlade NATO. Tilsvarende viser EU's manglende evne til at beskytte sine borgere mod COVID-pandemien ved igen at forkludre leveringen af ~~de~~vacciner, at denne form for overnational institution ikke er i stand til at sørge for borgernes behov – en fiasko, der også ses i de sandsynlige ødelæggende virkninger af dets kampagne for en europæisk Grøn New Deal, hvilket kunne føre til en nedbrydning af det europæiske energinet.

Hun stillede de økonomiske og strategiske tragedier, der udvikler sig i de transatlantiske nationer, i modsætning til det optimistiske potentiale i de tre samtidige rummissioner til Mars. Det faktum, at De forenede arabiske Emirater startede sit rumprogram for kun seks år siden, giver håb om at, med internationalt videnskabeligt samarbejde, kan nationer bevæge sig hen imod en fredelig udforskning af vores univers, med enorme fordele for alle.

Afskrift på engelsk:

Deaths from Power Outages in Texas Give a Foretaste of Things To Come with the Green New Deal

The LaRouche Organization Webcast with Helga Zepp-LaRouche

Wednesday, February 17, 2021

HARLEY SCHLANGER: Hello, I'm Harley Schlanger with our weekly dialogue with Helga Zepp-LaRouche, the founder and chairwoman of the Schiller Institute. It's February 17, 2021, and Helga, we have an extremely dramatic development, which seems ironically to coincide with the release of our Special Report, and that is the cold front that has hit Texas, leaving between 3 and 4 million people freezing in the dark. This is really quite dramatic, isn't it?

HELGA ZEPP-LAROUCHE: Yes, it is actually very horrible, because already 26 people died. Now, this is incredible, and you have the state of Texas, where the wind turbines froze up, the solar panels were covered with snow, so the energy production went down from an average of 25,000 MW to only 12,000 MW, and naturally you have blackouts, not only in Texas, but now there are rolling blackouts in 14 other states in the United States.

Now, this is absolutely unnecessary, and it's not a natural catastrophe. People should not look at it this way, because if you had normal coal-generated energy and nuclear energy, you would not have this situation, so people should not say this is a "natural" catastrophe. Because I would rather say, if we want to have a good note about it, we should take it was a warning from St. Peter, a warning sign what could happen with the weather if you don't have the energy required to deal with it.

Since we have this new report out, "The Great Leap Backward—LaRouche Exposes the Green New Deal," and the Great

Reset, there we have warnings in it, that this will lead to blackouts and the blackouts could be even more dramatic. We have the case of the EU, where studies were made by the scientific advisory service to the German Parliament, already nine years ago, that you could have a collapse of the entire European energy grid, and that would have much more devastating consequences than even this. But this is bad enough. I think 4 million people in Texas, in the U.S., and 5 million people in the north of Mexico are without electricity. Now, that means people can die in the cold, they can die of the effects of it in various ways, and I think it's quite important that the former governor of Texas, Rick Perry, who was also the Energy Secretary in the Trump administration, blasted this in a very powerful way, saying that if you cut out coal, if you cut out nuclear energy, then you are completely dependent on an ideologically based energy policy, and people are dying! And that is what would happen if you have an energy policy defined by such people as AOC [Rep. Alexandria Ocasio-Cortez] and the like.

So, this is a very serious warning, and I can only advise people to get the Special Report *EIR* has put out, because the consequences of what the Great Reset would do, the Texas developments give you a meager foretaste of the kind of economic collapse which would result as a consequence of the implementation of this policy. And this could lead to very dramatic developments, social chaos; it would have a devastating effect on the strategic situation, because some parts of the world are not so stupid—Japan, for example, when they had a snowstorm, I think it was last December, the Energy Minister immediately said that Japan must turn back on all of its nuclear plants; and obviously, Russia, China, India, they are all massively investing in the production of fission energy, of the third generation fission energy, and naturally, very much emphasis on fusion power [research]. But the idea that the world can live without coal plants, modern coal plants which are absolutely environmentally friendly, I think

this is really an illusion and must be corrected immediately.

SCHLANGER: One of the things I found most interesting, is that Rick Perry, in his discussion also mentioned the advances of nuclear fusion, so that's a very good sign that there are at least some people thinking.

But Helga we have another problem that this comes up against, which is the absolute dysfunction of the political parties in the United States, with a feud going on in the Republican Party which broke out this week; with the Democrats somewhat chaotic and stuck with nothing but the Green New Deal. How does this look to you?

ZEPP-LAROUCHE: It looks very worrisome, because also the fact that Kamala Harris is now conducting foreign policy with President Biden resting in Camp David. This has caused the raising of quite some eyebrows, because normally a Vice President participates maybe, in overseas phone calls, but here, Kamala Harris is conducting foreign policy all by herself. So the question is, in what condition is President Biden? Naturally, the situation in the Republican Party is one of utmost chaos.

And I think the only way how this can be addressed, is that we have to organize with The LaRouche Organization and the Schiller Institute to really promote, absolutely, the solutions of my late husband Lyndon LaRouche, and hopefully large segments of the population will understand that a change of the paradigm is absolutely necessary. At this point, the only voice of reason is really coming from The LaRouche Organization and the policies promoted by my late husband. But it needs a broad mobilization of the population to change the course of these developments.

SCHLANGER: One of the things that The LaRouche Organization is doing is conducting a series of dialogues, such as the one from last Saturday on U.S. Russia policy.

[https://laroucheorganization.nationbuilder.com/forum_worsening_us_russian_relations_reverse_them_with_new_paradigm_or_face_nuclear_war] It is clear that the war machine that was never removed under President Trump is now back on all gears, targetting Russia and China. Where do you see this headed?

ZEPP-LAROUCHE: It is extremely dangerous. We had the Atlantic Council Paper, “The Longer Telegram,” so-called, basically referring to the “long telegram” paper by George Kennan from 1946, now referring to the need to have regime change against China, especially targetting Xi Jinping to be toppled. Now, if you put yourself in the shoes of such a government as China, and you hear that coming from the largest nuclear power, and probably still the largest economy in the world, it has consequences. It leads to a hardening of positions. And in a certain sense, this is going on against Russia, with the Navalny campaign. So I think it's quite interesting that Prof. Lyle Goldstein, who is from the Naval War College, he made a couple of warnings, both in the radio and also in the *Washington Times*, basically saying that this is leading to a situation where there is practically a warlike situation between the United States and Russia, and that the people who are pushing the Navalny campaign should be aware of the fact, is it really in the interest of the West to have a very sizable nuclear power like Russia to have chaos, or is it not in the interest of the Western countries, that the nuclear weapons of Russia should be under the control of a stable, unified force—I mean, just imagine, you have a civil war in Russia and then these nuclear weapons would get into the hands of some strange, terrorist kind of forces!

I think that there is actually the need to really be aware of that, and come to the conclusion that this whole policy of sanctions against Russia is not functioning; this was, for example, just made as a statement by the head of the Kiel Institute for the World Economy [<https://www.ifw-kiel.de/>], Mr. Gabriel Felbermayr, who said that the whole idea of

sanctions against Russia does not function, because you don't get countries like China, or India, or other partners of Russia to cooperate, so therefore, the only forces which are hurt by the sanctions, is, in this case, emphatically Germany. So, this whole policy of geopolitical confrontation can only lead to a complete catastrophe, if it is pursued.

SCHLANGER: There's also a very sharp warning coming from Sergey Lavrov, the Russian Foreign Minister, about the policies of the EU, which are definitely part of this anti-Russian grouping.

ZEPP-LAROUCHE: Yes. He said that if this is stopped, if these sanctions are not stopped, that Russia is prepared to break off all relations to the EU. Now, there was a rather stupid article in the *Frankfurter Allgemeine Zeitung*, basically pooh-poohing it, saying this is just meant to cause people to now say, "Oh, we should do something now that this doesn't happen." But these liberals, and the FAZ is full of them, they don't understand the connection between cause and effect, but these policies, as I said, they lead to dramatic changes.

I mean, if you put yourself in the shoes of Russia and China, what is the natural consequence of these policies coming from the U.S., from the EU, from Great Britain? Already in October 2020, at the annual Valdai conference, Putin raised the possibility—this is not the first time it was raised, but he raised it publicly at this Valdai conference—the possibility of a Russian-Chinese military alliance. And this was brought up again on Feb. 4, this year, in a meeting between Wang Yi, the Chinese Foreign Minister, and Sergey Lavrov, discussing this option. Now, Putin in some context, also said it's not necessary, but obviously, it would be a major change in the strategic situation. What it would do is, it would protect China, if China would sort of come under the nuclear umbrella of the Russian nuclear forces, which are sizable, they're extremely modernized; Putin had introduced these new weapons systems, the hypersonic missiles, the nuclear-powered

submarines—all weapons systems which sort of make the previous plans for a global missile defense system by the U.S. and by NATO obsolete; obviously, all these countries are working high-speed in their own hypersonic missiles, so it's a dangerous arms race.

But, it would mean, if China would come under the nuclear umbrella of Russia, it would completely change the situation for good; it would basically make a limited nuclear attack on China impossible, unless you want to have World War III all the way. It would basically allow China a greater flexibility in dealing with the problems in the South China Sea, in respect to Taiwan. It would definitely have an incredible signal effect on all the countries participating in the Belt and Road Initiative. It would basically give them assurance that there can be a peaceful win-win cooperation.

Now, obviously, the efforts by the U.S. is to counter that, and that was going on already with the Trump administration, Pompeo and Esper, to build the Quad, that is, the Indo-Pacific alliance, trying to pull India into an alliance with the United States against Russia and China. But that is the kind of geopolitical games which really is what led to World War I and World War II, and I think it is really something we have to overcome: Because if this kind of geopolitical maneuvering is going on, the Damocles Sword of nuclear extinction hangs over the world. And people should really wake up.

The only consequence for European nations is to stop the sanctions campaign against Russia, to stop supporting Navalny, who is—it's a typical Western intelligence-promoted operation for regime change in Russia. I think his support in Russia is very little. He has maybe a few hundreds of supporters—that looks big when they go on the street—but in reality it's a very tiny fraction of the Russian population, and as we discussed previously, Ahurkov, one of the campaign managers of Navalny had begged the British second in command in the Moscow Embassy for money so they could do these operations. This is

really something which should not happen! Regime change policy is a complete interference into the sovereignty of a country, and it is what Obama and Tony Blair were doing, the so-called "humanitarian interventions," "spreading democracy"; democracy has gotten a very bad name as a result. And what should happen instead, is that the European nations, like Germany, France, Italy and others should leave NATO and rethink what is their security interest. I think we need to discuss a new security architecture, and that must represent the security interests of every single country on the planet, if we want to overcome the danger of nuclear war.

So, I think the consequence of this is to really leave the kind of NATO alliance, which has become obsolete in any case, after the dissolution of the Warsaw Pact, and right now, the idea to expand NATO as a global force, is really—it will lead to World War III if it's not stopped.

SCHLANGER: You mentioned China possibly going into an alliance with Russia: The Chinese made a threat that they may withhold rare earth materials that are necessary for aircraft construction and other kinds of defense contracting. How serious is that threat?

ZEPP-LAROUCHE: Well, I think it's being seriously looked at. I think the Chinese government has started an investigation, exactly of what the effect would be, as you say, on the military sector, on the production of fighter jets, and if this escalation increases, one could actually see that happening. That would be a sort of nuclear bomb, but it would be one of these signs of a prewar situation if it happens.

SCHLANGER: And speaking of pre-war, we're seeing a number of developments in Southwest Asia around Yemen, also around Syria with the Israeli strikes on Syria, threats to Iran. How does this situation look from your standpoint?

ZEPP-LAROUCHE: The situation in Yemen is a complete tragedy,

and also I can only say the world community which allows this to happen—I mean, the Yemen population is the worst humanitarian catastrophe in years; it's escalating; everybody knows it, nobody does anything decisive about it. Right now you have 2 million Yemeni children under the age of 5 who are in acute malnutrition; 400,000 of those are in acute severe malnutrition, which is acute danger of starvation. Now how easy would it be to tell the Saudis, "you open the ports, you allow the entrance of food aid," and if the EU and the United States and some other countries would really put their foot down, it could be remedied, practically in a week! The fact that this is not happening, I really think that the EU policies on the question of refugees, what they have done with Frontex [EU's border guard] backing and participating in the pushback operations against refugees, all of these policies are completely inhuman, and I think any nation in Europe that wants to have a decent policy should leave the EU! The EU and NATO, right now, are really alliances which are completely against the interests of the member states, and there is no need to have a bureaucracy in Brussels.

Look what they did in terms of getting vaccines: Ursula von der Leyen is a complete failure; this woman was a problem when she German Defense Minister. Now her record as the so-called President of EU Commission is a disaster. Why does she not resign? She should resign! And I think the European nations should leave the EU and form an alliance as republics of "fatherlands" as de Gaulle was calling for it, and you can have a multinational cooperation for the development of Africa, for the reconstruction of Southwest Asia, and you don't need a supranational bureaucracy.

These things have to be remedied, and these policies are clearly not in the interests of the European nations. And in the case of Yemen, I really appeal to all of your viewers—that is, you—to help to change the policy in respect to this genocide which is going on before our very eyes.

SCHLANGER: Now, speaking of the EU, we have the man from the British royal yacht *Britannia*, who is now moving into power in Italy, Mario Draghi, former head of the European Central Bank: This is just another disaster, and he's committing himself to the entire policy of so-called "monetary integration." Is this going to go over in Italy?

ZEPP-LAROUCHE: We have to see. Right now, you have the Lega being in the government, and they have one minister post; I think one big test case will be what happens to the Messina Bridge and also the Taranto steel plant, which Draghi basically wants to shut down, and the EU wants to shut down: This steel plant is the production facility which could actually produce the amount of steel needed for the Messina Bridge [to Sicily], which obviously would completely change the dynamic in terms of the Mezzogiorno, bringing real development to Southern Italy and Sicily. And the Lega basically wants to convince Draghi to go ahead with this bridge. Let's see how this plays out: Draghi made his first speech in the Senate which was unfortunately, everything one could expect. He made the absurd statement saying that the more there is European integration, the more Italian, the Italians become. He also called for Schumpeter-like "creative destruction," saying that some industries are not worth saving. So this is exactly what one could expect from somebody who has been in the ECB for many years, and demanding all kinds of "reforms" which created the problems in which Italy right now finds itself. So this does not look good.

SCHLANGER: To conclude, we want to go back to this question of Lyndon LaRouche's solutions, and you've been speaking very enthusiastically about the development of the space program in the United Arab Emirates. We now have a Chinese mission on Mars, and as of tomorrow, there will be U.S. rover landing on Mars. How significant is this? This really does represent—when you talk about the Texas situation being the foretaste of the bad things that could come from the Great Reset, doesn't this

project around Mars give us a foretaste of the good things that could come out of international scientific cooperation?

ZEPP-LAROUCHE: Obviously. Look, for the Mars missions—I'm still most impressed by this U.A.E. operation, because this was a Mars mission which was only started, I think six years ago; so, in an incredible speed, they caught up, at least with Japanese help, but nevertheless, and they have now an spacecraft in Mars orbit. This shows you that any developing nation—after all the Gulf States only discovered oil less than 30 years ago—and turned from total desert states into, in some cases, states which are really doing quite remarkable things, in terms of for example, the Emirates have an island which they irrigated and turned into beautiful gardens and forests. And when my husband and I were in Abu Dhabi in 2002, he made a speech there on the future of oil; this was organized by the Zayed Center. And he basically said, look, forget oil as a fossil fuel, it's too precious and should be used for chemical production, for pharmaceutical production, and use the revenue to invest in the production of water, that will green the deserts.

[https://larouchepub.com/eiw/public/2002/eirv29n23-20020614/eirv29n23-20020614_006-the_middle_east_as_a_strategic_c-lar.pdf]

And he advised basically to go for innovation and leapfrog—and this is exactly what the Emirates have done, and other Gulf States are going in a similar direction. They are cooperating with China on the Belt and Road Initiative, and now you have this Mars mission.

Now, if you think what incredible technologies are opened up with space research and space travel, we have seen it many years ago with the Apollo Project, where it's often cited that every cent investment brought back fourteen cents in terms of value as computers, as all kinds of spinoff products. But we are now on the verge of getting fusion power as a propulsion, which is the only way how human beings could safely get to Mars. There is discussion about studying the weather patterns,

the underground water, the traces of life. And obviously, not only manned Mars missions are what is being looked at, but also a village on the Moon, a city on Mars, creating the conditions for longer term existence of man on these planets, as a stepping stone for future interstellar travel. Now, that means that the character of humanity will completely be transformed, because it's very clear that once you undertake such endeavors, you cannot have a geopolitical war on Mars, or else you will not live, and you will not exist.

And the kind of international cooperation among astronauts which we have seen on the International Space Station (ISS), that is the model for the future cooperation among nations, like the United States, Russia, China, India, Europe—the best policy of Europe is their work on ESA, the European Space Agency, where its head, Mr. Jan Wörner, is enthusiastically speaking about the village on the Moon all the time; and ESA has just put out a request for young people to be trained as astronauts. That program should be enlarged. Europe should have a much, much larger space program, and if a small country like the Emirates can have a Mars mission, why cannot Germany have a Mars mission on its own? You know, Germany right now is in place 27, in terms of the number of people being vaccinated; the Emirates are in place 6 or 7.

So there's something right which the Emirates are doing, and something fundamentally wrong what Germany is doing and the EU is doing. However, this is the future, and if mankind is supposed to live as an immortal species—and that was a notion which was coined by my late husband—because we are different from other species, because we have creative reason. We can solve any problem through scientific and technological breakthroughs, by discovering new laws of the universe. And since our mind *is* the most advanced part of that universe, there is all the reason for optimism that once we attune our own existence and our own practice with the laws of the universe, our chances to become the immortal species *is*

absolutely there. But it does require space travel as a precondition, and I think this idea of nations working together to discover the beautiful secrets of the universe, that gives you a taste of what the future of man can look like, when we decide to become adults.

SCHLANGER: Well, Helga, it's always good to end with a healthy dose of optimism, as you just did. For our viewers, let me remind you: You can get the new report "A Great Leap Backward—LaRouche Exposes the Green New Deal" on why we have to defeat the Great Reset and the Green New Deal, go to <https://schillerinstitute.com> and get an invoice for it.

And Helga, I guess that's what we have now, so we'll see you next week.

ZEPP-LAROUCHE: And join the Schiller Institute!

"Vi har så meget at opdage" om vores univers Schiller Institutets ugentlige webcast med Helga Zepp-LaRouche den 10. februar 2021

I sin ugentlige dialog i dag stillede Helga Zepp-LaRouche de spændende horisonter, der blev åbnet af tre næsten samtidige rumflyvninger med ankomst til Mars, i modsætning til det igangværende polariserende cirkus i det amerikanske senats

retssag mod tidligere præsident Trump. Mars-missionerne, sagde hun, "viser, hvor menneskeheden skal hen... Vi har så meget at opdage." Hun pegede på de russiske og kinesiske forskeres vellykkede udvikling af COVID-vacciner og deres vilje til at dele dem, som et andet eksempel på den form for samarbejde, der kræves i en krisetid som denne.

Se i stedet på den utrolige situation i USA rettet imod Donald Trump og hans tilhængere. De seneste afslørninger der viser, at ledere af oprøret fra de "Stolte drenge" (Proud Boys) og "Ed-vogtere" (Oath Keepers) var forbundet til FBI, gør det klart, at angrebet på kongresbygningen den 6. januar ikke blev tilskyndet af Trump, men faktisk var en "fælde". Og mens skueprocessen fortsætter, er der en optrapning for regimeskifter mod Putin og Xi, der anføres på vegne af dem, der presser på for den store nulstilling (Great Reset). Hun opfordrede seerne til at studere den kommende EIR-specialrapport om den store nulstilling/grønne New Deal (www.larouchepub.com/eir) og til at deltage i rundbordsdiskussionen om optrapningen af konflikten mod Rusland denne lørdag kl. 19 dansk tid (www.schillerinstitute.com), som nødvendige skridt til at blive de oplyste borgere, der kræves for at skabe et nyt paradigme for samarbejde blandt suveræne stater.

We Have So Much to Discover' About Our Universe

The LaRouche Organization Webcast with Helga Zepp-LaRouche

Wednesday, February 10, 2021 <https://laroucheorganization.org>

HARLEY SCHLANGER: Hello, I'm Harley Schlanger. Welcome to our weekly dialogue with Helga Zepp-LaRouche. It's February 10, 2021.

And we're seeing some extraordinary developments in the United States, of chaos, of the circus-type environment around the impeachment. Helga, what's your best reading of what's going on around this situation?

HELGA ZEPP-LAROUCHE: It is a circus, but let me say something optimistic in the beginning: because you have three Mars missions—one is already in orbit from the U.A.E., another one today from China, and then still another one from the United States on Feb. 18. So that shows you where mankind should be going. But before we come to that, let's look at what needs to be overcome, and one of those situations is exactly what you are referring to, the unbelievable situation in the United States. Looking at it from a distance, so to speak, I think it's a very, very dangerous development because you have a clear effort to declare former President Trump a non-person; you have a trampling on the Constitution. Yesterday, 56 Senators voted for impeachment, which means they don't respect the Constitution, because the Constitution says you can only impeach a sitting President or official, but not a former one. And it is clearly designed to completely confuse the population, brainwash the population.

It will increase the polarization, and the whole thing is phony, because there is now plenty of evidence that the storming of the Capitol was planned long before Jan. 6, probably immediately after the election took place, there were preparations. The FBI now has evidence that there were 200 people, whom they arrested on Jan. 6, who were involved in the preplanning: Some of these people were FBI informants, or had high-level security clearance from the FBI, such as some of the people from the Proud Boys, and also the so-called Oath

Keeper head Caldwell. So, this is a sting operation if you ever have seen one, and it is clearly designed to make sure that Trump can never run for office again, so the whole thing is fraudulent.

But you have to see it in the context of other things which are going on in the United States as well: And that is, censorship. What we had seen already beginning against then-President Trump when he gave press conferences, the major TV stations intervened and said, "no, we don't agree with the content of what he is saying," overriding and overruling the President of the United States. Now you have a whole pattern of blogs and websites are being banned by the social media. You cannot mention certain words any more. If you say "vote fraud" you are being banned; if you say certain other things which don't fit the official narrative, so it completely suppresses any kind of open discussion and the First Amendment. And then, you have this very worrisome effort to criminalize the Trump base: Naturally one is against violence of any kind, but when the former CIA station chief for Afghanistan and Pakistan, and Director of the CIA Counter Terrorism Center—a person called Robert Grenier—says one has to use the same methods one used against insurgencies in Afghanistan and Iraq against those domestic terrorists, because they swim in a larger environment of support in the population.

This is really incredible: This should upset any person who loves democracy, for that matter, or freedom. And I think it is creating an atmosphere of real—I think McCarthyism is a mild word for saying it—and it's a very dangerous development. So I can only call on all people to keep free debate, keep open truth-seeking of matters, and—I think it's a very dangerous development, that's all I can say.

SCHLANGER: What I find interesting is that parallel to what's being done against Trump and the Trump supporters, is the escalation for regime change in Russia against Putin, which

sort of goes back to the whole issue of Russiagate as targetting both the United States and Russia. What's the latest you have on this anti-Putin move?

ZEPP-LAROUCHE: Well, this Navalny story is really a concoction. First of all we should remember that Navalny was not very well-known in Russia until recently, until this so-called "poisoning" through the Russian government was supposedly happening.

As a matter of fact, if you look at his older statements, he is a rightwing person, he called some people "cockroaches" and using a language which we know from Germany from 80 years ago, so he's not exactly a hero or a nice person. But he is being used to absolutely go for street demonstrations to finance those; there is this video which was published by RT, where one of his top campaign managers, Vladimir Ashurkov, is seen in 2012, where he talks to a member of the British embassy who in reality was an MI6 agent, where Ashurkov asks this British so-called diplomat for \$10-\$20 million a year, because that would enable them to organize mass demonstrations in Russia.

So this is the reality of this operation, and Maria Zakharova just said in a press conference, that it is very clear that there are powerful circles behind Navalny from the West, and some of them demonstrated in these street demonstrations, members from the embassies and consulates, from Germany, from Poland and from Sweden, which is going against any statutes and standards of the diplomatic service. So Russia expelled these individuals; then, in a reciprocal move, these countries expelled Russian diplomats. But then the thing was crowned by an unbelievably provocative event, which just took place in Brussels, in the Polish mission to the EU, with EU participation, but also U.K., U.S., and Canada, and they basically discussed with Ashurkov and also another person, Leonid Volkov, who is another person from the Navalny team. And they discussed how all these countries should respond together to the jailing of Navalny.

This is a real intelligence operation, and it is aimed to create an environment where you have internal opposition emerging against Putin, and it has the same character as we discussed last week, with the paper of the Atlantic Council targetting Xi Jinping for regime change. [<https://www.atlanticcouncil.org/content-series/atlantic-council-strategy-paper-series/the-longer-telegram/>]

Now, needless to say, that if from one nuclear power, and the EU, they are running regime change operations against the other two major nuclear powers, this is really very, very dangerous. And I think, it's completely disgusting. Then also the so-called "foreign minister" of the EU Josep Borrell went to Moscow; he had discussions with Lavrov, supposedly they were very relaxed and friendly. But when Borrell went back to Brussels he gave a press conference and said that he mainly discussed Navalny and the question of human rights, so that then Lavrov said there are two stories: One is what Borrell said at the press conference in Moscow, and another was what he said when he was back in Brussels, so who is running EU foreign policy?

Lavrov also said, and this is extremely worrisome, that Germany would have opened secret files to Navalny when he was in Germany making this so-called movie about luxury mansion of Putin. In other words, the German secret services gave Navalny files which is extremely provocative. And it turns out now that this so-called luxury palace has been empty for many years; Putin has never been in it, and it is being restored to become a hotel. But it was manipulated with Photoshop methods, to look like a private mansion. So these are these methods, which are really prewar creating an enemy-image of a country, and I think it's completely disgusting.

Even more disgusting is that the German foreign minister Heiko Maas spent €21 million, obviously, of taxpayers' money, to finance the opposition in Belarus.

Now, I don't know—this is all really counterproductive, and it should be denounced. It's a kind of warmongering, and any clear-thinking citizen should really distance himself or herself from these kinds of operations.

SCHLANGER: You mentioned the Atlantic Council paper targetting Xi Jinping. There's also the commander of StratCom, the Strategic Command for the nuclear defense of the United States, talking about the likelihood of nuclear war, and the Chinese are continuing to very strongly discuss that. At the same time, they're holding open the possibility of a better relationship. What's your reading on that?

ZEPP-LAROCHE: There was a very interesting article in *People's Daily*, where the author makes the point that if the United States is worried about a nuclear war, then the easiest thing not to have it, is not to make a strike against Russia or China, because it is China's policy under all circumstances, to have a no-first-nuclear-strike policy. And as you say, they again and again say now is the time to have a new definition of the relationship between the United States and China. So it is very clear that the warmongering comes not from Russia and people should not fall into this trap, because once you are in the dynamic where you keep shouting negative things, you know, you get a reaction. And the *Global Times* chief editor Hu Xijin, answered and said, "Well, obviously, China must increase its nuclear arsenal, and build at least 1,000 ICBMs to be credible," but that is the kind of reaction you get. And I think the world is really confronted with so many real problems, that this kind of geopolitical warmongering is really more superfluous than anything else on this planet.

SCHLANGER: One of the problems we've been focussed on is the push for the Green New Deal, a global green economy, a green financial bubble, and this just continues to unfold with Biden's initial executive orders. But there is a real reaction against it from certain countries. How is this developing over

the last week?

ZEPP-LAROUCHE: It is a bubble, as we discussed many times. The financial system is hopelessly bankrupt. The central banks have pumped money, trillions and trillions into the system since 2008, when you already had a systemic crisis, and it is very clear this cannot be maintained forever. So in one sense, this idea to pump another \$30 trillion into the system for green investments, which will ruin the economy! If you go to these low energy flux-density levels, you cannot maintain a modern industrial power, and it really is a last-ditch effort to bail out the banks, to bail out the speculators. And it is more than cynical: One aspect is, and this is unbelievable, that the EU, otherwise famous for their pushback operation in the context of Frontex, which shows you what the mindset is of these bureaucrats; but what they have now done is they have made agreements with 31 African countries to mass produce solar and wind energy and turn it into hydrogen; ship the hydrogen then from Africa to Europe because if you go all green technology and energy in Europe, you cannot build as many wind parks (one shouldn't call them "parks")—offshore and onshore wind hubs and solar panels in Europe, because it would cover the entire territory with these things. So what they are planning to do, is to import 80% of their energy from these operations in Africa.

Now, obviously the African nations are poor and they are desperate for all kinds of deals, but it ruins the environment in Africa, it means no industrial development, which is what they really would need, and just shows you the absolutely cynical character of this Green policy, which one can only call an "eco-dictatorship" and in reality, "eco-fascism": Because it does reduce the population capacity of the Earth, and therefore, one can call it an eco-fascist policy, for sure.

SCHLANGER: One thing we're seeing in Europe, particularly in Germany, is rising prices for electricity, and also a new wave

of industrial layoffs, and this is also pretty troubling.

ZEPP-LAROUCHE: Yes, the economy is collapsing. You have massive layoffs in all major industries, Thyssen, MAN, and various others, but also many small and medium industries are going bankrupt. And the energy prices increase, I think there was in January alone, in Germany, an energy price increase of 7.5% at once, and when all of these schemes are implemented, it will get worse and worse. And the idea behind it is what the Greens have discussed since a long time: To change the behavior of the population by increasing the prices such that most people cannot afford electric appliances, or warm heating, or going by train somewhere. So it is really an absolute imposition of massive austerity policy, *de facto*, in respect to the living standard of the population. We should really fight against it.

We will be bringing out tomorrow, *Executive Intelligence Review* will publish a Special Report on the Green New Deal, on the Great Reset, and I can only encourage our viewers to get this report, because this is designed to explain to people what will be the effect of such a policy and what can be done against it.

SCHLANGER: The other thing we should take up is this question of what went wrong in Europe, in particular, with the vaccines, what EU Commission President Ursula von der Leyen did to make it impossible for people to get vaccinated in many European countries. But at the same time, the Russian vaccine, which everyone was scoffing at and making fun of, now is becoming almost a prize for the Russians. What can you say about this?

ZEPP-LAROUCHE: It is very clear that the EU—that's now being discussed everywhere—I mean, the EU does not care about its member states and their population. So they were falling behind very massively in ordering vaccines, and now there is a recognition that if Europeans are going to get themselves

vaccinated, they'd better buy vaccines from Russia and China. Even Alexander Dobrin from the [Bavarian Christian Social Union] CSU said that this is what should be done. And Merkel talked with Putin and also with Xi Jinping, so this is underway.

But if you look at China, they have now said that they will donate vaccines to 53 developing countries, and in addition to that, they have agreements for sale of vaccines to another 22 countries. They have developed altogether six vaccines, and I think all the slanders against China are really contradicted by what is happening in terms of deeds. So, I think there is a clear tendency to recognize that all these accusations against China are completely ill-founded.

SCHLANGER: I find it interesting: We started with the question of the Mars missions, and I know we'll talk about in just a moment, but at the same time, we're seeing the potential that exists in Russia and China for scientific breakthroughs that are of benefit to the whole world. And of course, in the United States as well, the vaccine program is moving ahead, although there are problems.

But let's go back now to the question of Mars. This is really extraordinary—this is a big week. I don't know if there's an air traffic control system on Mars, but there's a lot of incoming spacecraft!

ZEPP-LAROCHE: This is really exciting, because yesterday, the orbiter Hope from the United Arab Emirates, the U.A.E., arrived in orbit of Mars, and they will make images of weather patterns on Mars for future expeditions. This is very exciting, because if you look at some of the pictures from the laboratories in the United Arab Emirates, you see all these men and women—the men dressed in their typical Arabic garb—and it's just such a completely different image about the future of the Arab world. The last time the Arab world was in the forefront of science was in the Abbasid dynasty, around the

time of Haroun al-Rashid, al-Mansur, al-Mamun, and at that time Baghdad was the most advanced science city in the world. The Caliphs gave gold to anybody who would bring a discovery, from Egypt, from Spain, from Italy, and weigh them in gold. And this time, the head of the U.A.E. Space Agency said that they chose one of the most difficult missions, namely to go to Mars, because they thought the challenge would be such that it would provoke the greatest leap forward, the leapfrogging in science and technology. And you know what the average age is of these engineers? Twenty-seven years! And one-third of them are women. So if there is *any* way to catch up with the future, and modern world, it is exactly that.

And they quote especially a poet, whose name is Al Mutanabbi, but he was born in 915, and they quote him saying, "If you ventured in pursuit of glory, don't be satisfied with less than the stars." So I think this is very beautiful.

And as I said, today is the Tianwen-1, it has reached the orbit of Mars. It will be there for a while, and then they will plan very carefully the landing on Mars; I think it will happen in three months. But then, they have a lander and a rover, so this will be a very carefully preplanned operation.

And then, on Feb. 18th, you will have the Perseverance mission from NASA, also a lander and a rover.

So I think this idea that the future of mankind is the colonization of space, and that the best thing which could happen is that all countries work together. The way to overcome geopolitical conflict on Earth is to start to really reach for the stars, to colonize the Moon and Mars, and prepare for future interstellar travel of mankind as one.

I mean, if you look at mankind from space, you see that our little, blue planet is very small, it's very fragile, and the universe is incredibly big. We have not discovered the first secrets yet—there's so much to discover, in 2 trillion

galaxies, which we know for sure to exist. So it's really time to overcome what I call the infancy of mankind, where people squabble over territory. If we go for space science, we can completely transform everything which is called a "resource," and conflicts now which seem to be so big, will completely vanish once we reach the next phase, the next era of human civilization. So I think this is good reason for optimism.

SCHLANGER: Yes, of course, and in keeping with your late husband's life work, to have that kind of cooperation, what your friend Krafft Ehricke called the Extraterrestrial Imperative. And we should note that we're coming up on the second anniversary of Lyndon LaRouche's passing. And on that date, Feb. 12, there will be on the website, 24 hours of videos for people to become more familiar with Lyndon LaRouche.

And Helga just to conclude, in terms of addressing the geopolitical crisis, the Schiller Institute is sponsoring a roundtable this weekend to discuss the situation in Russia. Do you want to say something about that?

ZEPP-LAROUCHE: Yes, this will be a roundtable of experts; we already have very renowned speakers, Sen. Mike Gravel, I think agreed; then, Professor Edward Lozansky from the American University in Moscow, we also have possibly; Mr. Alex Krainer, the author of *Grand Deception*, the book on Bill Browder; possibly another expert from Russia; maybe Ray McGovern. So it will be a very important round of people to discuss both what's behind the operation and why the truth has to be gotten out to neutralize it. So you should all tune in on Saturday at 1 p.m. Eastern Time. So, see you then.

SCHLANGER: Yes, 1 p.m. this time. And I think people would find it not just fascinating but crucial, to address the crises we've been discussing. Helga, thanks for joining us, and we'll see you again next week.

'Hope', rumskibet "Håb", går i kredsløb omkring Mars; giver håb til jorden.

9. februar 2021 (EIRNS) – Efter planen gik De forenede arabiske Emiraters rumskib, "Hope", i morges succesfuldt i kredsløb omkring Mars. Fartøjet gik ned i fart fra 121.000 km/time til ca. 18.000 km/timen, så det blev indfanget i en bane omkring Mars og bevægede sig pænt på plads efter 27-minutters brænding af dets hjälperaketter. Fartøjet bringer sig nu i position til snart at overvåge vejrforholdene på den røde planet. Hope-missionen er fastlagt til at vare i et helt Mars-år (687 Jorddage).

I morgen forventes den kinesiske 'Tianwen-1' at ankomme planmæssigt til Mars, med et komplekst program planlagt for de kommende måneder. Dernæst ankommer NASA-rumskibet 'Perseverance' den 18. februar for at lande en 'marsbil' på overfladen. Denne februars trekløver bringer det samlede antal nationer, der til dato har lykkedes i deres Mars-missioner, op på fem. Hvis vi gør tingene rigtigt her på Jorden, er Mars sandelig kun begyndelsen på en ny tidsalder for fremskridt for menneskeheden.

Schiller Institutets præsident Helga Zepp-LaRouche sagde i dag: "Når man ser på Mars-missionerne i sammenhæng, viser det vejen ud af katastroferne og de geopolitiske spil", der er så farlige lige nu. Hun gennemgik disse, begyndende med USA, hvor en rigsretssag, der ikke burde foregå, gennemføres som en 'maraton i vanvid'. I dag var der fire timers argumentation om

det forfatningsmæssige grundlag for at anklage en mand, der allerede er ude af det offentlige embede, hvilket kulminerede med en afstemning på 56-44 til fordel for retssagen mod Donald Trump. I morgen er der planlagt 16 timers præsentationer. Dette skal fortsætte til søndag, før der forventes afsluttende argumenter. Det er et globalt skuespil over krisen i USA og en operation til at hjernevaske amerikanerne.

Anklagerne mod den tidligere præsident Donald Trump er fra start til slut en operation rettet imod USA. For hver dag kommer der mere frem, for eksempel om hvordan de personer, der førte an i at sikre at hændelsen den 6. januar ved den amerikanske kongresbygning, Capitol, blev voldelig, alle var kendt og forbundet til eller havde dækning af undergravende efterretningsnetværk. Der har allerede været forlydender om sagen om den nationale formand for 'Proud Boys', der har fungeret som FBI-meddeler i årevis. Nu er det kommet frem, at en leder af de paramilitære 'Oath Keepers', der deltog i angrebet på den amerikanske hovedstad den 6. januar, havde en FBI-sikkerhedsgodkendelse.

Et andet åbenlyst tilfælde af national undergravende virksomhed involverer sammensværgelser mod præsident Vladimir Putin og Rusland. Dette udføres af de samme netværk, der underminerer USA – de i London centrerede finansielle transnationale netværk, der promoverer deres eget diktatur. I går blev der afholdt en online-konference arrangeret af den polske mission ved EU i Bruxelles, med forskellige EU-nationer plus Storbritannien, USA, Canada og Ukraine for at konspirere mod Putin og i øvrigt at destabilisere Rusland. Den selvsamme russiske assistent til 'dissidenten' Alexej Navalny, Vladimir Ashurkov, der blev fanget på video i 2012, hvor han diskuterede store penge med en formodet britisk MI6-agent med det formål at organisere oppositionen mod Putin i Rusland, deltog i gårsdagens virtuelle konference i Bruxelles. I dag sprængte talsmand for det russiske udenrigsministerium, Maria Zakarova bomben om mødet, og beskrev det som en samling af

NATO-lande, der benytter Navalny til at organisere undergravende aktiviteter imod Rusland.

Tempoet og åbenlysheden i disse træk over for nationer gør det klart, hvor vigtigt det er med den nye serie online strategiske rundbordssamtaler, der igangsættes lørdag d. 13. februar af LaRouche-organisationen. Deltagelse i og støtte til dette initiativ er den bedste måde at imødegå de vanvittige operationer af alle slags, der nu truer verden. Begivenheden, der begynder kl. 19.00 dansk tid, har titlen "Forum: Forværring af amerikansk-russiske relationer – vend udviklingen med et nyt paradigme eller imødese atomkrig." https://larouchorganization.nationbuilder.com/forum_worsening_u_s_Russian_relations_reverse_them_with_new_paradigm_or_face_nuclear_war

For det andet, sørge for at få denne uges udgave af {EIR} (udgivelsesdato, 12. februar), der er en ny "Special Rapport: The Great Leap Backwards – LaRouche Exposes the Green New Deal." (Det store spring tilbage – LaRouche afslører 'the Green New Deal'. Nu er tiden inde til at abonnere. Spred ordet, spred håb.

Samarbejde imod COVID-pandemien og i rummet bevæger menneskeheden mod et nyt anti-Davos-paradigme.

Schiller Instituttets ugentlige webcast med Helga Zepp-LaRouche den 4. februar 2021

Schiller Instituttets ugentlige webcast med Helga Zepp-LaRouche den 4. februar 2021, kan også ses her:

Mens det globale oligarkiske etablissement i London følger en politik, der sigter mod at påtvinge et globalt diktatur af bankdirektører og indlede nye krige, fremhævede Helga Zepp-LaRouche, hvad hun optimistisk beskrev, som "babyskridt" hen imod et nyt paradigme, baseret på videnskabeligt samarbejde mellem suveræne stater. I sin ugentlige dialog pegede hun på aftaler indgået imellem Rusland og Kina på den ene side og nationer i Europa – inklusive Tyskland – og Sydamerika, om at levere COVID-19-vacciner, som bevis for, at der er bevægelse mod at realisere hendes opfordring til at udvikle et "globalt sundhedssystem", som den eneste måde at besejre pandemien, og forhindre udbrud af andre pandemier i fremtiden. Hun talte også om den spændende udsigt til, at tre nationer – De forenede arabiske Emirater, USA og Kina – har Mars-missioner, der når planeten i løbet af de næste uger i februar.

Denne positive udvikling stillede Helga Zepp-LaRouche i modsætning til de dystre udsigter, der blev præsenteret i Davos, da finansoligarker desperat forsøgte at påtvinge en grøn finansiell boble for at redde deres kollapsende system; med EU's manglende evne til at håndtere pandemien og den økonomiske krise, kendtegnet ved udsigten til en Draghi-regering i Italien; og med regimeskiftsoperationer rettet mod Rusland omkring Navalny-affären og mod Kina med

Atlanterhavsrådets hvidbog, "Det længere telegram (The Longer Telegram)", der anvender den geopolitiske metode, som førte til den langvarige kolde krig mod Sovjetunionen, hvilket kunne provokere en atomkrig i dag.

Helga Zepp-LaRouche talte også om den dysfunktionelle polarisering af den amerikanske politiske scene med rigsretssagen i Senatet planlagt til næste uge. Hun beskrev Nancy Pelosi, flertalsleder i Repræsentanternes Hus, og andre som folk, der er "gået grassat", især med deres ubezagelige hævngerrighed overfor Trump og hans tilhængere.

Disse babyskridt hen imod samarbejde kan danne grundlag for at fremprovokere en nødvendig "ændring i tænkningen" på verdensplan for at bryde ud af det farlige paradigme skabt af City of London og dets allierede i USA og Vesteuropa.

Mens det globale oligarkiske etablissement i London følger en politik, der sigter mod at påtvinge et globalt diktatur af bankdirektører og indlede nye krige, fremhævede Helga Zepp-LaRouche, hvad hun optimistisk beskrev, som "babyskridt" hen imod et nyt paradigme, baseret på videnskabeligt samarbejde mellem suveræne stater. I sin ugentlige dialog pegede hun på aftaler indgået imellem Rusland og Kina på den ene side og nationer i Europa – inklusive Tyskland – og Sydamerika, om at levere COVID-19-vacciner, som bevis for, at der er bevægelse mod at realisere hendes opfordring til at udvikle et "globalt sundhedssystem", som den eneste måde at besejre pandemien, og forhindre udbrud af andre pandemier i fremtiden. Hun talte også om den spændende udsigt til, at tre nationer – De forenede arabiske Emirater, USA og Kina – har Mars-missioner, der når planeten i løbet af de næste uger i februar.

Denne positive udvikling stillede Helga Zepp-LaRouche i modsætning til de dystre udsigter, der blev præsenteret i Davos, da finansoligarker desperat forsøgte at påtvinge en grøn finansiel boble for at redde deres kollapsende system; med EU's manglende evne til at håndtere pandemien og den

økonomiske krise, kendtegnet ved udsigten til en Draghi-regering i Italien; og med regimeskiftsoperationer rettet mod Rusland omkring Navalny-affæren og mod Kina med Atlanterhavsrådets hvidbog, "Det længere telegram (The Longer Telegram)", der anvender den geopolitiske metode, som førte til den langvarige kolde krig mod Sovjetunionen, hvilket kunne provokere en atomkrig i dag.

Helga Zepp-LaRouche talte også om den dysfunktionelle polarisering af den amerikanske politiske scene med rigsretssagen i Senatet planlagt til næste uge. Hun beskrev Nancy Pelosi, flertalsleder i Repræsentanternes Hus, og andre som folk, der er "gået grassat", især med deres ubezagelige hævngerrighed overfor Trump og hans tilhængere.

Disse babyskridt hen imod samarbejde kan danne grundlag for at fremprovokere en nødvendig "ændring i tænkningen" på verdensplan for at bryde ud af det farlige paradigme skabt af City of London og dets allierede i USA og Vesteuropa.

**LaRouchePAC-
underskriftsindsamling: Vi
forpligter os til Månen-Mars-**

missionen

Schiller Instituttet udbreder den følgende opfordring til verdens borgere, som et organiseringsredskab for at kræve et internationalt missions-orienteret rumprogram, som kan tage menneskeheden tilbage til Månen og videre til Mars.

Vi, de undertegnede, forpligter os til at understøtte det følgende program, og vi opfordrer vore regeringer til ligeledes at arbejde for dets virkeliggørelse:

* Vær med til at virkeliggøre Artemis-missionen, der har til hensigt at bringe menneskeheden – indbefattet den første kvinde – varigt op på Månen inden 2024, sådan som præsident Trump og hans NASAchef Jim Bridenstein har besluttet det.

- Vær med til at gøre Artemis til det første skridt I retning af en industrialisering af Månen, som en økonomisk platform for koloniserigen af Mars og for udforskningen af Solsystemet, sådan som den afdøde rumvisionær Krafft Ehricke beskrev det.
- * Vær med til at udvikle de fremtidige fusionsdrevne rumfartøjer, der skal udnytte Helium-3-forekomsterne på Månen som brændstof og muliggøre sikre og hurtige, bemandede rejser til Mars og andre dele af Solsystemet med det formål at opnå en konstant acceleration og decellaration på 1G som standard for bemandede interplanetære missioner.
- * Vær med til at virkeliggøre dette Måne-Marsprogram gennem et internationalt 50-årigt crashprogram, sådan som den afdøde økonom Lyndon LaRouche skildrede det, for at sikre et højt økonomisk afkast, hvilket kun kan opnås gennem udviklingen af nye rumfarts- og fusionsteknologier, der så bør deles internationalt som grundlag for en varig fred her på planeten.
- * Vær med til at reformere og afvise det internationale

finanssystems spekulative rovkapitalisme som et nødvendigt skridt for at sikre, at suveræne nationer kan skabe de langfristede kreditaftaler, der er nødvendige for at fremme denne mission.

- * Vær med til at fjerne hindringerne for det internationale samarbejde i verdensrummet, især hindringerne for samarbejdet mellem USA, Kina og Rusland (som for eksempel den såkaldte Wolfske lovtildføjelse, der forbyder Nasa at samarbejde med Kina).
- Dette program er i overensstemmelse med bemærkninger, som Lyndon LaRouche fremsatte på en international konference i Rusland i december 2009:
- "For at realisere de mål, vi står over for nu, er vi nødt til at give menneskeheden en ny mission – menneskeheden som helhed. Missionen er karakteriseret ved ideen om kolonisering af Mars. Dette kræver, at vi foretager den slags ændringer, med hensyn til videnskabelige fremskridt, som er nødvendige for menneskehedens fremtidige eksistens.
- "Vi har mange problemer på denne planet. Og vi kan ikke løse dem i et vidt omfang uden at gå ind i en udvikling af Solsystemet som et habitat for menneskeheden. Vi er på kanten af at gøre det videnskabeligt. Der er dog endnu mange videnskabelige opdagelser, der skal gøres, for at gøre det muligt at agere for menneskets kolonisering af Mars. Det vil ligge lidt ude i fremtiden. Men hvad vi har brug for nu, er intentionen om at udføre et koloniseringsprogram for Mars. Vi er nødt til at uddanne og udvikle generationer af unge mennesker, der er orienteret mod den slags mission. I den kommende periode vil der fødes unge mennesker, som på en eller anden måde vil være en del af koloniseringen af Mars, før det indeværende århundrede er ude.
- "Vi er nødt til at give menneskeheden en følelse af formål, et udviklingsmæssigt formål, ikke kun for planeten, men gennem indflydelsen på Jordens for de tilstødende regioner i solsystemet, og hinsides.

- "Disse mål er gennemførlige. Der er ganske vist mange problemer, der skal løses, videnskabelige problemer, som endnu ikke er løst. Vi har mange spørgsmål. Men i det væsentlige ved vi, at dette er muligt. Vi ved, at dette burde være gennemførligt inden for to eller tre generationer. Hvad vi skal gøre, er at give til folk – der vil være børnebørnene, der fødes nu – at give dem noget at realisere. De vil være der, når vi er døde og borte tre generationer fra nu af, fire generationer fra nu af. De vil være de mennesker, som faktisk koloniserer områder ud over selve Jorden. Vi er nødt til at give dem muligheden for at gøre det. Vi er i mellemtiden nødt til at give samfundet en orientering mod missionen om at opnå denne kolonisering, for vores efterkommere, om tre generationer eller derefter."
- Vi, de undertegnede, lover vores støtte til denne Månen-Mars-mission, og vi opfordrer vores regeringer til også at forpligte sig til den.
